**WEATHER DISCUSSION:**      *...MUCH WARMER TODAY...*

High pressure aloft over the area will strengthen over the next couple of days. This will result in a substantial warming trend and more pronounced nighttime subsidence inversions. The marine layer, which was 2500 to 3000 feet deep the past couple of days will be less deep Sunday morning as the onshore low-level gradient weakens. Expect about 10 degrees of warming Sunday. Humidity recovery on Sunday night on upper slopes and ridges will worsen. The general, or ridge-top, wind will remain out of the west, but switch to northwest Monday. Weak offshore low-level flow develops late Sunday night into Monday morning. The warming trend continues Monday, followed by a cooler pattern beginning Tuesday .

**WEATHER FORECAST FOR Sunday:**

**WEATHER:** Sunny. Smoky. Morning low clouds and fog below 1500 ft far west.

**TEMPERATURES:** West of Rocky Butte Trail 80-90 F      **TREND: UP 10**  
East of Rocky Butte Trail: 90-100 F

**MINIMUM HUMIDITY:** West of Rocky Butte Trail: 20-30%      **TREND: DOWN 8-15%**  
East of Rocky Butte Trail: 10-20%

**20 FT WINDS**

**Below 2000ft:** Up-slope to 6 mph, increasing to 6-10 mph with gusts to 15 mph after 1400.  
**Above 2000ft:** Northeast to East 5 mph or less early then variable. Wind becoming West 6-12 mph with gusts to 20 mph after 1400. Strongest gusts in exposed areas and West aligned canyons.

**WEATHER FORECAST FOR Sunday Night:**

**WEATHER:** Clear. Smoky. Areas of low clouds and fog below 1000 feet far west late.  
**TEMPERATURES:** 55-65 degrees, but to 70 ridges above 2000 feet.  
**HUMIDITY RECOVERY:** Generally 60-80% or greater, but only up to 25% highest ridges.

**20 FT WINDS**

**Below 2000ft:** Up-slope 6-10 mph with gusts to 15 mph through 1900, then becoming down-slope 7 mph or less by midnight.

## OUTPUTS

### FIRE BEHAVIOR

**GENERAL:** The fire is burning in a mix of grass and brush with stands of Oak trees and litter that are extremely dry, very drought stressed, and have a heavy fuel loading. The fire continues to be fuel and topography driven and can make rapid upslope runs with short to long range spotting. Surface winds will predominately upslope/upcanyon and higher level winds (2000'-3000' level) will be from the west. Fuels north of the Nacimiento River have not burned since the Sam Jones Fire in 1953 (1611 acres) which makes them prime for spot fire growth.

Probability of Ignition: 77-92%  
100 HRFM: 97<sup>th</sup> Percentile

FDFM: 3% East of Rocky Butte,  
4% West of Rocky Butte

ERC: Above 97<sup>th</sup> Percentile  
1000 HRFM: Above 97<sup>th</sup> Percentile

### SPECIFIC:

#### West of Rocky Butte Truck Trail: Division D, Division E, Division G

**Flame Lengths-** Head fire: 9-20 ft. in Grass, 21-33 ft. in Brush, Flanking fire: 3-6 ft. in Grass, 6-10 ft. in Brush

**Rate of Spread-** Head fire up to 100 ft/min in understory Grass, Up to 260 ft/min in open grass,  
Up to 212 ft/min in open Brush field

**Spotting Distances-** Up to 1/2 mile

#### East of Rocky Butte Truck Trail: Division H, Division I, Division J, Division L

**Flame Lengths-** Head fire: 8-18 ft. in Grass, 19-30 ft. in Brush, Flanking fire: 3-6 ft. in Grass, 6-9 ft. in Brush

**Rate of Spread-** Head fire up to 80 ft/min in understory Grass, Up to 207 ft/min in open grass,  
Up to 177 ft/min in open Brush field

**Spotting Distances-** Up to 1/2 mile

#### Division A, Division P, Division M, Division R, Division W, Division Z

No growth expected. Interior islands and heavier fuels will continue to burn out and smolder

If fire activity increases from interior islands or spot fires, utilize the Division H fire behavior outputs

### AIR OPERATIONS:

Smoky conditions may make visibility difficult for air resources

Sunrise: 0632 Sunset: 1935

## SAFETY

- Post lookouts and have identified escape routes or safety zones due to the steepness of the terrain and frequent spotting.
- Don't become complacent while mopping up. Watch for snags and dead oak trees while working

# CHIMNEY SAFETY MESSAGE

INCIDENT: Chimney Fire CA-SLU-008948

DATE: August 28, 2016

TIME: 0700-0700

## Situational Awareness at All Times!

*When It comes to Safety, The only thing worse than being oblivious to the unknown is ignoring the obvious...*

**Personnel:** Manage yourself and those around you for fatigue; many have deployed for extended periods. As fatigue increases, injuries tend to increase also. Keep an eye on your crew and your buddy.

**Driving:** Slow Down, Wear your Seatbelt at all times and Increase your Following Distance.

**Complacency:** ALL PPE must be worn, including shrouds, when working on the fire line. Mop up requires your situational awareness even without active fire. Unburnt fuels can reignite suddenly and turn against you.

**Fatigue:** Manage yourself and those around you for excessive fatigue; many have driven long distances or been redeployed from other incidents. Use the buddy system and take breaks as needed. As fatigue increase, injuries tend to increase also.

**Eat and drink fluids** on a regular basis to maintain an appropriate energy level for any expected work assignment. Remember, you are the only one that knows your limitations.

**Hazard trees:** Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Review and follow **Hazard Tree Safety**, pg. 22-23 in your IRPG.

**Ash Pots:** the droughts stricken fuels consumed entirely by fire are creating flat ash pots with hot coals underneath. Watch your footing.

### Backhaul is in progress:

- Use proper lifting techniques.
- Be aware of stump-holes, steep slopes, and
- Watch out for trip hazards and loose footing

### Heat Illness Prevention:

- Drink plenty of fluids:
  - Water and Gatorade
- Rest when you can.
- Find shade when you can
- Eat nutritious food regularly

Incident Commander: Glenn Patterson

# FIRE SUPPRESSION REPAIR & REHABILITATION PLAN CHIMNEY INCIDENT: CA-SLU-8948

Agency Contact: CAL FIRE – Alan Peters (805-903-3406)

August 20, 2016

Fire Suppression Repair (RESP) is the repair of damage resulting directly from fire suppression activities, primarily the construction of control lines. It is not the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire itself. Rehabilitation is closely related and involves mitigation of potential adverse environmental effects from wildfire. Collectively, this effort uses the nickname “*Rehab*”. The “Rehab Plan” below details the measures necessary to address the concerns of CAL FIRE. Site-specific tactics and strategies developed may be different based on objectives.

Damaged facilities will be upgraded to their pre-fire condition. Projects too large or complex to be completed by the Fire Suppression Repair Group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by the Operations Section and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities.

### Instructions for suppression repair during mop-up

Scattered trash shall be collected and back-hauled to staging areas, drop points and base camp.

When operationally feasible, dozer operators and/or hand crews shall install waterbreaks (waterbars) on all dozer lines as well as secondary access roads while performing mop-up operations. Berms taller than 1 foot shall be pulled and spread out to the pre-incident contour.

### Waterbreak/Waterbar/Cross Drain spacing

Line or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Spacing	150'	150'	75'	75'

Waterbreaks shall be cut diagonally with a minimum depth of 6” into existing grade with a 6” berm for a minimum height of 12”. Outlets shall be open and directed into non-erodible material, into the green where feasible.

### Inventory and Mapping

Suppression personnel shall note potential rehab needs and report them to the Rehab Group leader. Please collect GPS data and download as soon as possible to the GISS trailer.

### Control lines

- Install waterbreaks, when feasible, while crews and dozers are actively onsite on roads and handlines. Waterbreaks shall have proper angle and open outlets to insure effective drainage. Waterbreak spacing should vary depending on slope. Waterbreaks are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode the soil and transport sediment.
- Waterbreaks shall be constructed at an approximately 30 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated areas.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with hand tools.
- Berms and push-piles shall be spread out to the extent feasible. This may be accomplished by back-blading and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially important to remove or disperse.

### Staging Areas/Safety Zones/Helisports/ Drop Points

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks.
- Spread berms.

### Fences

- All fence cuts or other damage shall be spliced or otherwise repaired to a condition equal to or better than they were found.

### **Roads**

Roads used in fire suppression activities shall be maintained in a condition equal to or better than they were found.

- Abate dust on native surface roads.
- Clean and grade ditch lines and lead off ditches as necessary.
- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Remove outside berms created during suppression activities and incorporate into road surface or re-establish existing berms where applicable.
- Install waterbreaks where waterbreaks previously existed.
- Install new waterbreaks where needed.
- Install or maintain a rolling dips where rolling dips previously existed.
- Repair fences damaged by suppression efforts.
- Slash from felled trees adjacent to roads shall be lopped and scattered, chipped or piled for burning.
- Berms and push-piles shall be spread out to the extent feasible. This may be accomplished by back-blading and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially important to remove or disperse.

### **Felled trees/slash**

- Trees felled and brush cut during suppression activities shall be treated by one of the following methods:
  - Chipped and spread on site
  - Lopped and scattered to a height of less than 1 foot
  - Consolidated into piles not to exceed 8 feet in diameter
- This treatment shall be used within 100 feet of Chimney Rock Road, Lime Mt. Road, Town Creek Truck Trail, Rocky Butte Truck Trail, and in all areas visible from any road or residence within the Running Deer Ranch subdivisions.

### **Watercourses**

- All slash, loose soil and debris deposited into watercourses during suppression activities shall be removed and stabilized.

### **Archaeological or Historic Sites encountered**

- Notify Rehab Branch Director or Archaeologist:
  - CAL FIRE –Stephanie Velasquez (951-320-2075)

## STRUCTURE DEFENSE TACTICAL ACTIONS

### **CHECK AND GO**

"Check and Go" is a rapid evaluation to check for occupants requiring removal or rescue.  
Structure Triage Category – Threatened Non-Defensible

### **PREP AND GO**

"Prep and Go" implies that some preparation of the structure may be safely completed prior to resources leaving the area. Structure Triage Category – Threatened Non-Defensible

### **PREP AND DEFEND**

"Prep and Defend" is a tactic used when a Safety Zone and TRA are present and adequate time exists to safely prepare a structure for defense prior to the arrival of the fire front.  
Structure Triage Category – Threatened Defensible

### **FIRE FRONT FOLLOWING**

"Fire Front Following" is a follow up tactic employed when Check and Go, Prep and Go, or Bump and Run tactics are initially used. A tactic used to come in behind the fire front.

### **BUMP AND RUN**

"Bump and Run" is a tactic where resources typically move ahead of the fire front in the spotting zone to extinguish spot fires and hot spots, and to defend as many structures as possible.

### **ANCHOR AND HOLD**

"Anchor and Hold" is a tactic utilizing control lines and large water streams from fixed water supplies in an attempt to stop fire spread. The goal is to extinguish structure fires, protect exposures, and reduce ember production.

### **TACTICAL PATROL**

"Tactical Patrol" is a tactic where the key element is mobility and continuous monitoring of an assigned area.

## LEVELS OF ENGAGEMENT

### PACE

Implement PACE. prior to engaging in any structure protection action.

#### **P - Primary Plan [Offense]**

Is focused on fire fighter safety and mission objectives

#### **A - Alternate Plan [Offense]**

A fall back plan that closely supports the Primary Plan

#### **C - Contingency Plan [Defense]**

Focused on the firefighter's safety, move to a safety zone or temporary refuge area

#### **E - Emergency Plan [Defense]**

Firefighter survival, deployment zones, fire shelters

### **ALWAYS HAVE A DEPLOYMENT SITE IDENTIFIED!**

### DRAW-D

**D - Defend** – Holding actions, protecting priority areas, protect the structures, hold and improve the line

**R - Reinforce** – Bring more resources to bear, add resources necessary to *advance* or *defend*

**A - Advance** – Anchor and Flank, Direct or Indirect Attack, Active burnout operations

**W - Withdraw** – Cease current activities until conditions modify, Abandon an established position or constructed line in response to an increase in fire intensity, Not a stigma, but a decision to move away from a threat

**D - Delay** – Wait until the situation has modified sufficiently to allow a different level of engagement, Waiting for conditions to meet pre-identified triggers necessary to *advance* or *defend*, not a lack of effort, but a conscious decision to maximize long term effectiveness

**MEDIA** – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

**CAL FIRE SOCIAL MEDIA POLICY** – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

Social Media

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

**LOST AND FOUND** – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

**MAIL SERVICE** – The Information Section can assist you with sending and receiving mail.

## INCIDENT MANAGEMENT TEAM

### WATER USAGE PLAN

#### *California Drought Emergency*

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

#### **Fireline personnel-** (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

#### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

#### **Aviation Operations-**

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

#### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

#### **Public/ Municipal Water Supplies-**

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

#### **Management and Supervision-**

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.
