OUTPUTS

FIRE BEHAVIOR

GENERAL: The fire has been burning in a mix of grass and brush with stands of Oak trees and litter that are extremely dry, very drought stressed, and have a heavy fuel loading. The fire has been fuel and topography driven and will make rapid upslope runs with short to long range spotting if a spot were to escape containment lines. Surface winds will continue to be predominately upslope/upcanyon and higher level winds (2000'-3000' level) will be from the northeast in the morning to west in the afternoon. Fire activity will be minimal in all divisions, with smokes popping up in the afternoon and subsiding in the evening as fuel moistures and humidity increase.

Probability of Ignition: 59-78% **FDFM:** 4% East of Rocky Butte **ERC:** Below 90th Percentile
100 HRFM: Below 90th Percentile **6% West of Rocky Butte** **1000 HRFM:** Above 97th Percentile

SPECIFIC: ***Fire predictions are for new starts or spot fires outside containment lines***

All Divisions:

No growth expected. Interior islands and heavier fuels will continue to burn out and smolder. If fire activity increases from interior islands or spot fires, utilize the either the East of Rocky Butte Trail or West of Rocky Butte Trail outputs

East of Rocky Butte Truck Trail

Flame Lengths- Head fire: 5-12 ft. in Grass, 14-21 ft. in Brush, Flanking fire: 2-5 ft. in Grass, 6-9 ft. in Brush

Rate of Spread- Head fire up to 32 ft/min in understory Grass, Up to 102 ft/min in open grass,
Up to 85 ft/min in open Brush field

Spotting Distances- Up to 1/3 mile

- Dead trees could fall at any time, situational awareness is imperative

CHIMNEY SAFETY MESSAGE

INCIDENT: Chimney Fire CA-SLU-008948

DATE: September 01, 2016
TIME: 0700-0700

Situational Awareness at All Times!

When It comes to Safety, The only thing worse than being oblivious to the unknown is ignoring the obvious....

Personnel: Manage yourself and those around you for fatigue; many have deployed for extended periods. As fatigue increases, injuries tend to increase also. Keep an eye on your crew and your buddy.

Eat and drink fluids on a regular basis to maintain an appropriate energy level for any expected work assignment. Remember, you are the only one that knows your limitations.

Hazard trees: Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Review and follow **Hazard Tree Safety**, pg. 22-23 in your IRPG.

Complacency: ALL PPE must be worn, including shrouds, when working on the fire line. Mop up requires your situational awareness even without active fire. Unburned fuels can reignite suddenly and turn against you.

Driving: Slow down and safe, Wear your Seatbelt at all times and increase your following distance. Resources demobed driving home take your time driving home to maintain safety.

Fatigue: Manage yourself and those around you for excessive fatigue; many have driven long distances or been redeployed from other incidents. Use the buddy system and take breaks as needed. As fatigue increase, injuries tend to increase also.

Ash Pots: the droughts stricken fuels consumed entirely by fire are creating flat ash pots with hot coals underneath. Watch your footing.

Backhaul in Progress:

- Use proper lifting techniques,
- Be aware of stump holes, and
- Watch out for trip hazards and loose footing.

Heat Illness Prevention:

- **Drink** plenty of fluids:
 - Water and Gatorade
- **Rest** when you can.
- **Find shade** when you can
- **Eat** nutritious food regularly

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

Social Media

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section can assist you with sending and receiving mail.

CAL FIRE INCIDENT MANAGEMENT TEAM WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

Fireline personnel- (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

Aviation Operations-

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214, Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.
