Fire Behavior Forecast Number 48

Name of Fire: Zaca
Location:

Prediction For: 24 hours
8/21/07 0600 – 8/22/07 0600

Time & Date Forecast Issued: 8/20/07 1800

Signed: *Tom Leuschen*
Tom Leuschen - Fire Behavior Analyst

Weather Summary: See weather forecast: **Red Flag Warning for low RH!**

Winds – Day, SW-NW 5-10, gusts 18mph. Night, NW-NE 3-6, gusts 12mph.

RH – Day **Min, 3-12%**, Night max, 15-65%

Temp – Day max, 85-102, Night min, 52-66

Fire Behavior

General: *Potential Fine Fuel Moisture remains at 2% and Probability of Ignition at 100%*

The fire was fairly inactive in the Caliente drainage yesterday and similar conditions are anticipated today. In the event the fire crosses containment lines, the fire can be expected to have extreme rates of spread being predominately fuels and topography driven, especially when aligned with wind and solar heating. Keep monitoring unburned fuels between the fire and the line, there are several pockets with potential for runs. Due to potential for single digit RH and Probability of Ignition greater than 60% expect active burning with torching and rapid rates of spread where unburned fuels exist. Where wind, slope and fuels align expect rates of spread to be over **300** ch/hr. Flame lengths could reach **30-60ft**. Retardant has been effective holding the fire along topographical boundaries in all fuels. Daily upslope winds are dependant on solar heating and shading, therefore aspect becomes very important to monitor throughout the day.

Specific:

Div N,O,P,Q,R,S,T – Patrol for flare-ups & spots. There are some interior islands of unburned fuels that are actively backing in Santa Cruz drainage that can position itself in the next few days to make a run at the line in Division Q. It is unlikely to spot, but possible.

Div M, UU – The fire has burned out the majority of the fuels and most areas are cool. Be alert to active fire on neighboring Divisions. Spots that occur outside their line may be below you and jeopardize your safety!

Div TT– Large green areas adjacent to the line are showing smoke but appear to have been underburned. Continue to monitor these areas for increased fire activity.

Div VV, ZZ – The majority of the line to be constructed is against good black. There are areas of unburned fuels that need to be dealt with in both divisions. Consider withdrawing to the black when Probability of Ignition reaches 60% on the north aspect in the unburned fuels. Please call your fireline weather observations, including fine fuel moisture and probability of ignition into ICP.

Night Shift – Little active burning should occur on all divisions. Any activity is noteworthy and Fire Behavior would like to know about it. Please radio your nighttime weather observations to ICP.

Air Operations: Air operations will be hampered until about 0800 due to smoke and possibly again mid to late afternoon.

Safety: Continue your great situation awareness and behavior adjustments as conditions change throughout the day.

MANAGE FATIGUE

REMEMBER -- FATIGUE IS CUMULATIVE!!!!

(It's going to be a long and active fire season)

HEADS UP

EQUIPMENT SAFETY--WATCH OUT FOR HAZARD TREES AND ROCKS. STAY 200 FEET FROM EQUIPMENT. MAKE SURE OPERATORS KNOW YOU'RE IN THE AREA. This includes PG&E OPERATIONS.

Stay focused on the job, complacency can be a killer. Have tailboard safety talks as the assignment changes during the day.

ERC's are at record level. ERC's are an excellent indicator of seasonal trends.

Review ERC-- definition pg 70 in your IRPG Watch those speeds. Leave earlier, drive with courtesy. As speeds increase, so does the risk to you and your fellow firefighters. Keep that professional attitude and yourself alive.

Make sound and timely decisions

- Maintain situation awareness in order to anticipate needed actions.
- Develop contingencies and consider consequences
- Improvise within the leader's intent to handle a rapidly changing environment.

(IRPG Pg vi)

- MONITOR YOUR EMPLOYEE FOR EXCESSIVE FATIGUE
- ENSURE YOU ARE GETTING ADEQUATE REST
- GET CARE OF ANY MINOR MEDICAL NEEDS BEFORE THEY GET THE WORSE
- CONSIDER PREVENTATIVE CARE, SUCH AS VITAMINS
- DRINK ADEQUATE AMOUNTS OF WATER DAILY
