

# Station Fire

CA-ANF-003622

Night Operational Period  
1800-0600

Thursday - Friday  
September 3 - 4, 2009

 **No Energy Drinks**   
**“SSWAC”**  
*“Salt, Sugar, Water, and  
Calories”*

<b>INCIDENT OBJECTIVES</b>		1. Incident Name	2. Date Prepared	3. Time Prepared
ICS 202		<b>Station</b>	09/03/2009	1000
4. Operational Period				
<b>September 3-4, 2009 1800-0600 hours Night Operational Period</b>				
5. General Control Objectives for the Incident (include alternatives)				
<p><b>Firefighter and public safety is our core value. All identified hazards will be mitigated and avoided.</b></p> <p><b><u>Control Objectives</u></b>  Keep fire west of Highway 39 and Highway 2  Keep fire south of Highway 14, Pearblossom Highway, and Highway 138  Keep fire east Interstate 5  Keep fire north of the foothill communities and the Angeles National Forest Boundary</p> <p><b><u>Management Objectives</u></b>  Manage costs commensurate with values at risk.  Maximize protection of resources at risk.  Keep public informed on fire progress.  Provide for structure protection of developed properties.</p>

## Fire Weather Forecast

FORECAST NO: 8

NAME OF FIRE: Station Fire

PREDICTION FOR: Night Ops

UNIT: CA-ANF

SHIFT DATE: September, 3<sup>rd</sup> 2009 1800-0800

SIGNED: *Matt Mehle*

TIME AND DATE

FORECAST ISSUED: Thursday 9/3/09 @ 1200

Matt Mehle and Rich Thompson /s/  
Incident Meteorologist

**WEATHER DISCUSSION:** Lingering high pressure overhead will produce another night of mild temperatures with moderate to locally poor recoveries. The best recoveries will be over the lower elevations of Branch I and upper valleys. Winds will once again be gusty this evening, but once the sunset winds will diminish and become more terrain driven with a downslope/downcanyon flow.

### **WEATHER FORECAST:**

#### **TONIGHT:**

**WEATHER:** Mostly clear. Areas of smoke... especially deeper canyons and drainages.

**MIN TEMPERATURES:** 64-74

**24 HOUR CHANGE:** little

**MAX HUMIDITY:** Lower elevations 45-60%  
upper valleys and higher elevations 25-40%

**24 HOUR CHANGE:** little

#### **20 FT WINDS:**

**RIDGETOP** – Southwest in the evening 10-20 mph with gusts up to 25 mph... becoming Northwest (at 5000ft) to north by morning 5-10 mph with gusts to 15 mph.

**SLOPE/VALLEY** – Southwest/upslope in the evening 8-13 mph with gusts up to 20 mph... becoming Northeast/downslope by morning 3-7 mph.

**STABILITY/INVERSION:** Unstable during the evening with a few cumulus clouds through sunset becoming more stable after sunset with smoke settling into the canyons and drainages.

### **FRIDAY FORECAST:**

**WEATHER:** Mostly sunny. Areas of smoke.

**MAX TEMPERATURES:** lower elevation 92-98... higher elevation 80-88

**MIN HUMIDITY:** 15-30%

#### **20 FT WINDS:**

**RIDGETOP** – Northwest to north in the morning 5-10 mph with gusts to 15 mph... becoming west to southwest winds 10-15 mph with gusts up to 25 mph in the afternoon.

**SLOPE/VALLEY** – Terrain driven winds 3-7 mph in the morning... becoming southwest/upslope 8-13 with gusts to 20 mph upper slopes.

**Extended Outlook: Saturday through Monday:** An upper level trough is still forecast to move through the area bringing increased onshore flow and a cooling trend. In addition... it now appears the bulk of the moisture from Jimena will remain south and east of the region. Temperatures will generally be in the mid 80s to mid 90s Saturday with more cooling Sunday into Monday. Daytime humidities will continue to increase over the weekend with improving recoveries. Due to the increased onshore flow afternoon and evening gusty west to southwest winds 10 to 20 mph will continue. Gusts 25-30 mph may be possible over the highest peaks.

4/34

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #13	TYPE OF FIRE: Wildfire
FIRE NAME: Station	OPERATIONAL PERIOD: Thursday Night 9/3/09
DATE ISSUED: September 3, 2009	TIME ISSUED: 1200
UNIT: Angeles NF, Los Angeles County	SIGNED: /s/ Shelly Crook/John Robertson FBANs

## INPUTS

### WEATHER SUMMARY

**Refer to Weather Forecast for details:** Mostly clear. Areas of smoke. Min Temp – 63-74°. Max RH – 25-60%. Ridgetop Winds – SW 10-20 mph gusting to 30 in PM becoming Northerly 5-10 mph in AM. Slope/Valley Winds – SW 8-13 mph with gusts to 20 in PM becoming Downslope 2-5 mph in AM.

### FUELS

Very heavy loading of decadent brush (chaparral, ceanothus, chemise, scrub oak, manzanita) (FM4, SH5, SH7) across the entire fire area, 15 foot high with Pine and Big Cone Doug Fir in the drainage bottoms and ridge tops above 4000'. The dead component in much of the brush exceeds 60%, heavy stands of grass are completely cured. Minimum fine fuel moisture: 4-8%, 1000 hour: 5-8%, Live fuel moisture: 60-65%. ERC's are running above 90%.

## OUTPUTS - FIRE BEHAVIOR

**GENERAL:** Local Thresholds for active fire behavior: Winds (over 15 mph), RH (less than 25%), Temperature (over 90°) and BI (over 201). Predicted BI for today was 193 (down 45)

- \* Last night's fire behavior was very active along the uncontrolled fires edge, with active backing fire, upslope and down slope runs and short range spotting. For tonight expect similar fire behavior.
- \* **Under 2500'** expect the fire to burn actively until around 2400-0200. After that the fire behavior should begin to moderate due improved humidity recoveries. Under 2500' Upslope Maximum Fire Behavior: ROS 20-40 c/h, FL 8-15, Spot Dist 1/5 m, PI 60%. Backing Fire: ROS 10-15 c/h, FL 4-8.
- \* **Above 2500'** expect the fire to burn more actively as a result of lesser humidity recoveries. Expect a gradual decrease in fire activity, bottoming out around 0400 to 0500. Upslope Maximum Fire Behavior: ROS 30-60 c/h, FL 15-25, Spot Dist 1/5 m, PI 85%.
- \* At about 2100 to 2200 expect the winds will shift to NE on ridges and to downslope in the drainages.

### SPECIFIC:

**Branch I and II** – For the divisions along the Foothill Drive corridor, the fire activity has diminished greatly as a result of the successful suppression efforts. Expect to find isolated areas of heat in the interior especially where fuels were heaviest.

For the Mt Wilson area expect the main fire to connect with the burnout on the north side of the of the mt. The fire to the north of Mt Wilson has crossed the San Gabriel River and is poised to make a run upslope toward Newcomb Pass. Should this occur during today burning period, tonight's NE ridgetop and downslope winds will encourage fire spread down slope below south of Newcomb Pass.

**Branch IV and V** – Expect fire behavior similar to last night. Fire will continue to move downslope where is not contained by line. Upslope runs will occur from spots or roll outs. In the Magic Mt area fire will continue to spread to the west along the Pacoima drainage. Watch out for upslope runs starting low in the canyons. Burnout favorable early in the shift. In the Bare Mt area fire will continue to back down slope and transition to upslope runs after crossing drainages. General movement will be to the NE. Burnout conditions most favorable late in the shift, after the wind shift.

**Branch XX** – Expect the fire to continue to spread actively as it moves to the east towards Twin Peaks & Hwy 2. This area will likely exhibit the most active fire behavior on the incident. Downslope winds will encourage spread down Bobcat, Devils and Chileno Canyons towards Cogswell Reservoir.

### AIR OPERATIONS

- Evening: smoke most likely on north flank, however smoke may be present across the entire fire area.

### SAFETY.

- Under persistent weather, variations in fire behavior are the result of changes in fuels and topography so be sure to look up, around and down.
- "The optimist sees opportunity in every danger; the pessimist sees danger in every opportunity." Churchill

# STATION INCIDENT SAFETY MESSAGE

Thursday-Friday Night Shift

09/03/2009 1800-0600

**MAJOR HAZARDS:**

- HAZARDOUS MATERIAL
- POTENTIAL ALLIGNMENT OF TOPOGRAPHY, WIND AND FUEL
- INCIDENT DRIVING - Hwy's 5, 14, Angeles Highway 2, Forest Roads w/in Incident

Fire Order of the Day – Be alert, keep calm think clearly, act decisively.

- **Hazardous Materials**– When conducting operations, especially mop-up near homes, outbuildings and illegal trash dumps be careful about exposing yourself to Hazardous Materials. Items such as paint, varnish, pesticides, cleaners, batteries, automotive fluids and plastics can give off toxic vapors that can be very harmful.
- **Fire Behavior** – Expect the unexpected and be prepared to react accordingly. Review “Severe Fire Behavior Potential” (IRPG p.76). Monitor current weather conditions and forecasts.
- **Firing Operations/LCES** – Be aware of your surroundings during firing operations. Maintain situational awareness. Make sure everyone gets a thorough briefing and fully understands the complete plan.
- **Hydration** -- Drink water before, during and after shifts. Be alert for signs of dehydration and heat stress in yourself and others. Mix liquid intake at three waters to one sports drinks such as Gator Aide. Avoid energy drinks such as Red Bull, Nitro, etc. These will dehydrate you.

**Look Up, Look Down,  
Look Around**

- \*Fuel Characteristics – Assess prior to beginning operations.
  - \*Fuel Moisture – Read daily shift plan and assess on site
  - \*Fuel Temperature – Varies with exposure to direct sunlight.
  - \*Terrain & Fuel Accumulations – Scout prior to beginning operations and during operations.
  - \*Wind – Measure, observe, feel and notice changes.
  - \*Atmospheric Stability – Observe.
  - \*Fire Behavior – Monitor constantly prior to and during operations.
  - \*Safety – Ask questions in unfamiliar situations.
- The only dumb question is the one that wasn't asked..

**L.C.E.S**

- **Lookouts**- Relative humidity is down and ignition probabilities up. Check your surroundings!
- **Communications**- Know your radio frequencies, and be cognizant of any problems with direct communications.
- **Escape Routes**- Know them, discuss them, and reassess them!
- **Safety Zones**- Evaluate the “black” as your safety zone. Reassess the problems.
- **HYDRATE, HYDRATE, HYDRATE!**

Safety Officers: Marty Hamel & Dave Morton

## Human Resource Message

# PREVENT SEXUAL HARASSMENT

SEXUAL HARASSMENT at work, including emergency incidents, occurs whenever unwelcome conduct on the basis of gender, adversely affects a person's ability to do their job, and contributes to a hostile work environment. Sexual harassment includes, but is not limited to, the following types of conduct:

- # Unwelcome sexual advances
- # Requests for sexual favors
- # Discussing sexual activities
- # Telling off-color jokes
- # Unnecessary touching
- # Displaying sexually suggestive pictures
- # Using demeaning or inappropriate terms
- # Using indecent gestures
- # Using crude and offensive language
- # Commenting on physical attributes

"Inappropriate behavior is harassment including sexual and racial harassment and shall not be tolerated". Fireline Handbook, Chapter 6, Common Responsibilities.

DIANE SIMPSON AND KATHLEEN KREVAS  
(CENTRAL PARK) (SAN PABLO DAM) 27/34

# IMPORTANT MESSAGE FROM THE DEMOB UNIT

We will be demobing a considerable amount of resources during a short timeframe. To ensure your demob goes smoothly please observe the following:

Report to Demob Unit at your assigned appointment time

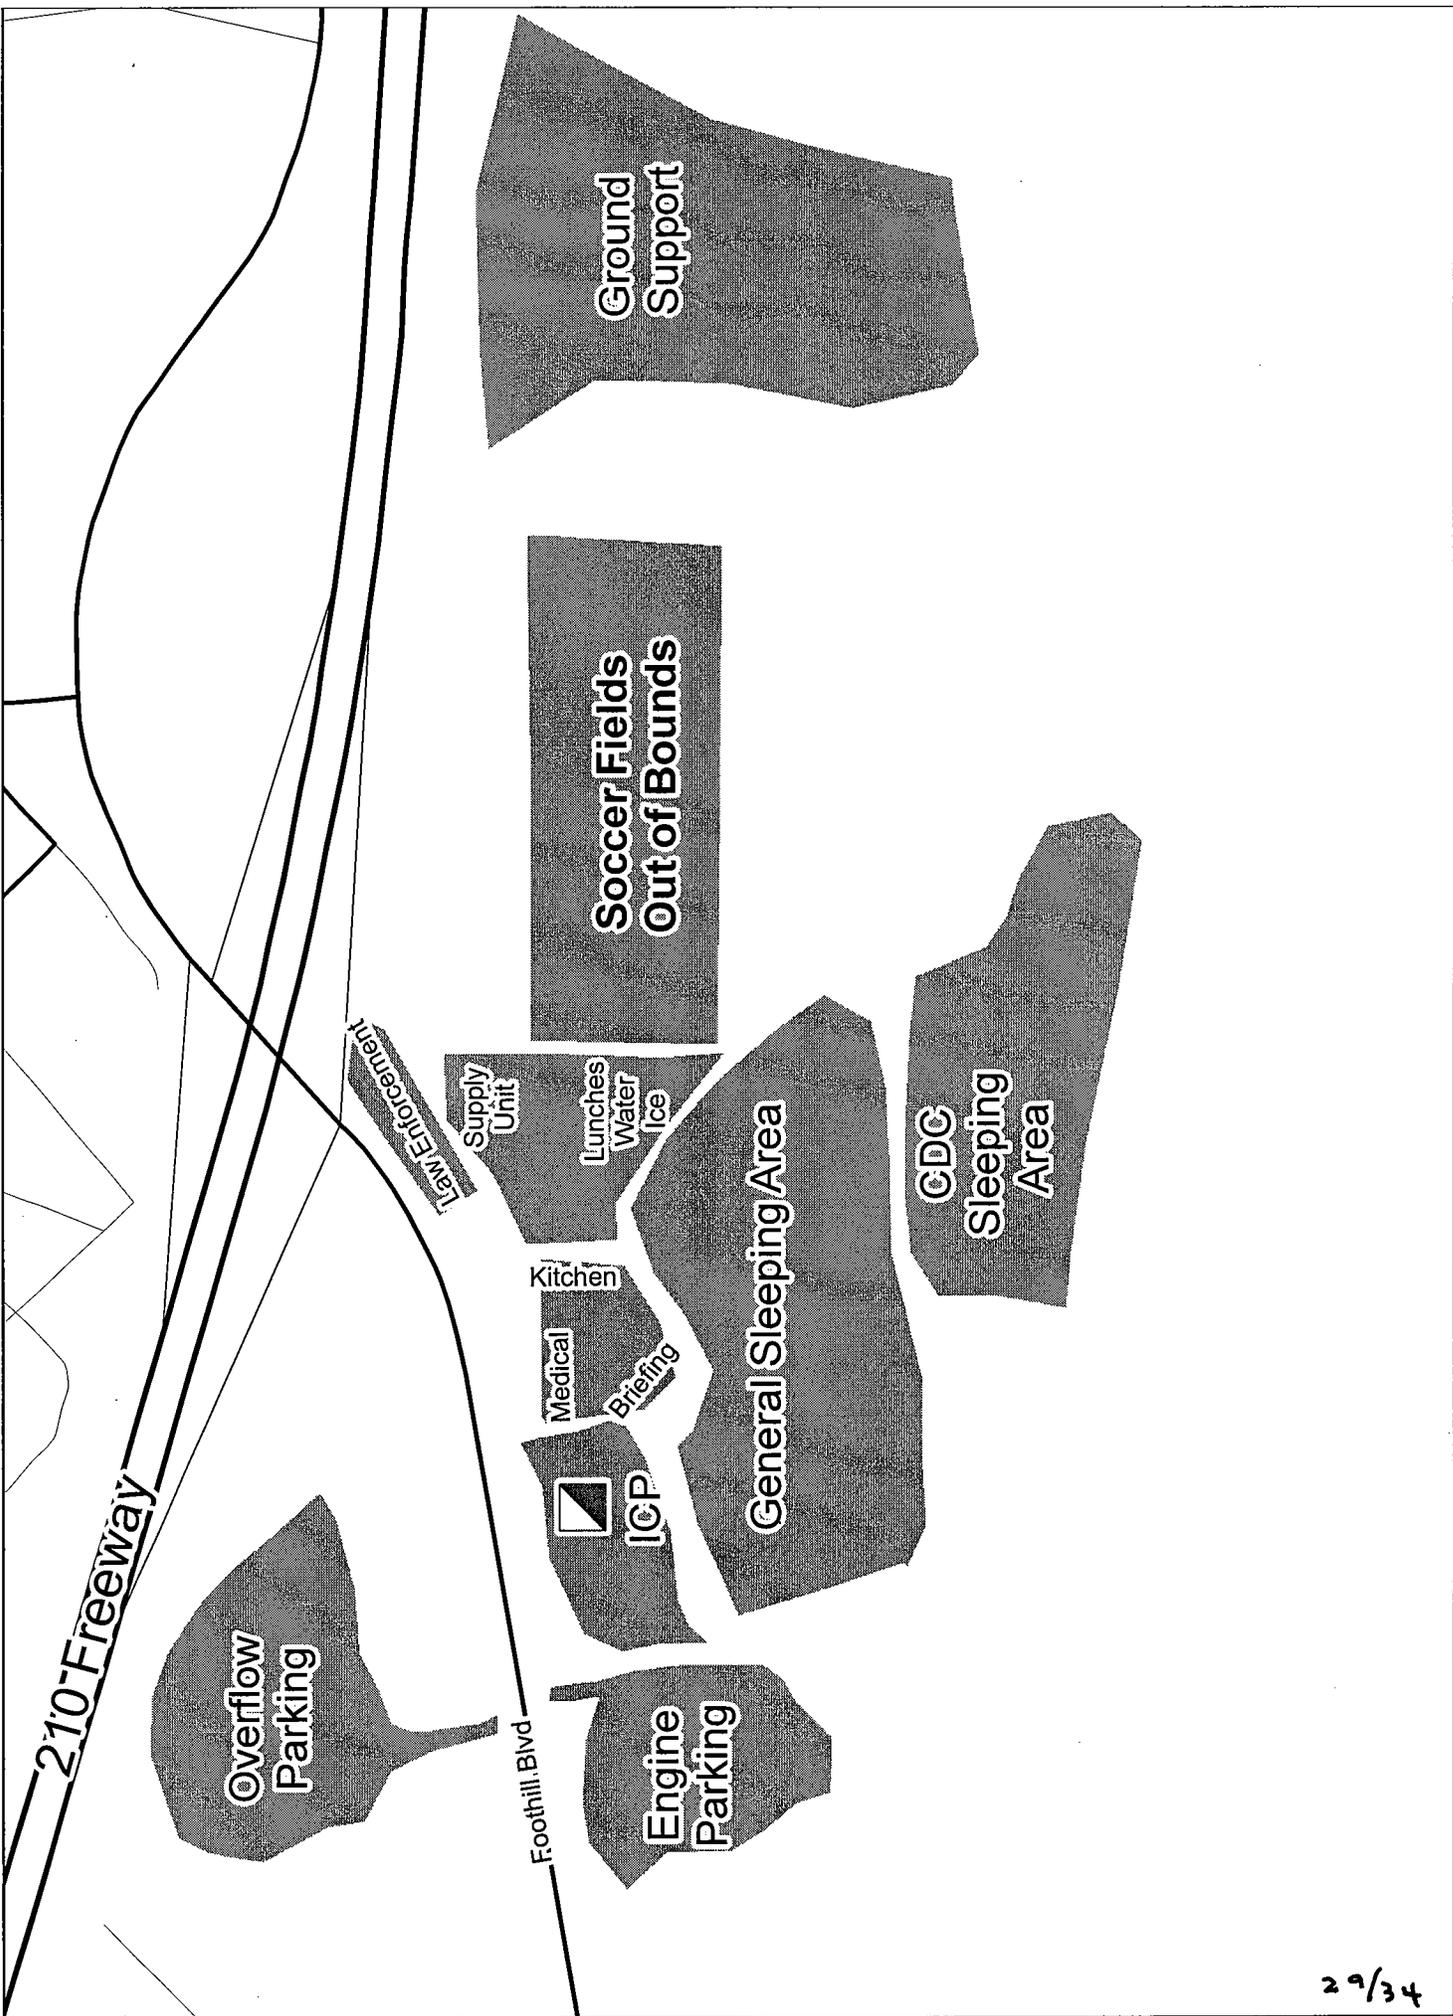

Do not begin the demob process until you receive your check-out sheet (ICS-221) from the Demob Unit

If you need a flight, the Demob Unit needs to be notified 48 hours before your demob date to complete your itinerary

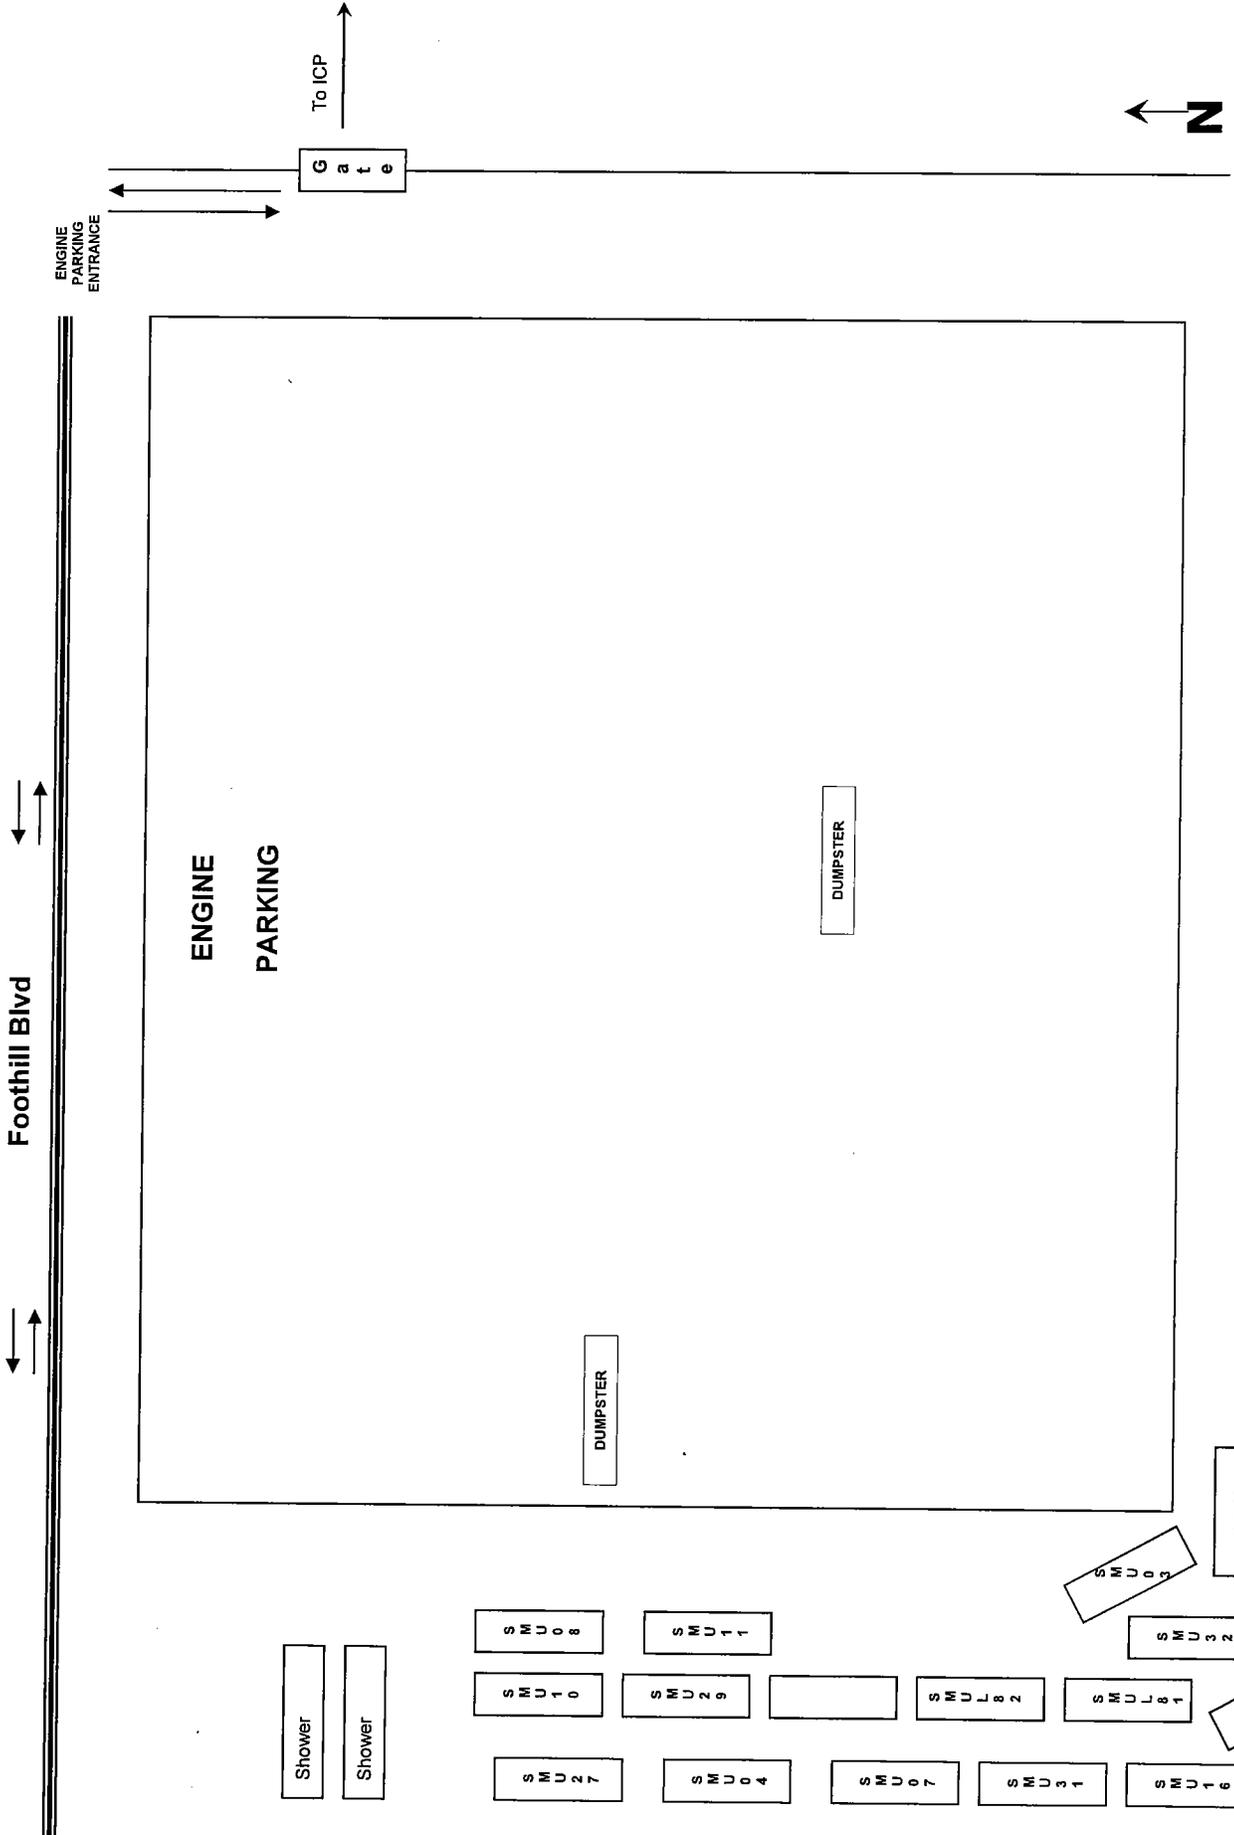

Thank you for your patience. We are working to make your demob experience efficient and painless.
