## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER</b> 7	<b>TYPE OF INCIDENT:</b> Wildland Fire
<b>INCIDENT NAME:</b> Lodgepole	<b>OPERATIONAL PERIOD</b> Day & night, 7/28/13
<b>DATE ISSUED:</b> 27 July 2013	<b>TIME ISSUED:</b> 1900
<b>UNIT:</b> Salmon-Challis NF	<b>SIGNED</b>  Ken Loda, FBAN

### INPUTS

**WEATHER SUMMARY** See the preceding Fire Weather Forecast.

**FUELS CONDITIONS** Fuel moisture: One-hour fuel moisture can be expected to be about 11% at 0700. That will drop to about 2% from about 1200 to 1700. The 10-hour fuels are at 4%, and 100-hour fuels are about 4%, and the 1000-hours are about 8%. After 2000 the fuel moistures will slowly add 7% through the night. Live fuel moisture: The live fuel moisture is around 117 – 160% in conifers, about 94% – 125% in the shrubs. However, this varies with elevation, aspect, and setting.

### OUTPUTS

**GENERAL FIRE BEHAVIOR** The heavier fuels (100- and 1000-hours) are little influenced by changes in relative humidity, and in their present condition will burn to some extent through the night. When winds align with slopes expect overall behavior to become extreme. General atmospheric instability (Haines index) is an indicator of potential for large fire growth, and the daytime Haines index is 5 – moderate, nighttime is 4 – low.

**Day Shift:**

Fuel Model	ROS (ch/hr)		Flame Length (ft)		PIG	Spot_Dist
	Head (Mid/Max)	Backing	Head(Mid/Max)	Backing		
High Load Dry Climate Shrub understory	14/18	1	9/11	3	90%	.3-.4 mile
Grass/Brush	27/41	1	5/6	2	90%	.2 mile

Fire behavior predictions are for the hottest and driest period of the day with mid-range and maximum winds.

**Night Shift:**

Fuel Model	ROS (ch/hr)		Flame Length (ft)		PIG	Spot_Dist
	Head (Mid/Max)	Backing	Head(Mid/Max)	Backing		
High Load Dry Climate Shrub understory	7/14	1	6/9	1	30%	.1-.3 mile
Grass/Brush	4/7	1	1/2	1	30%	.1 mile

**Thunderstorm related conditions:**

Fuel Model	ROS (ch/hr)		Flame Length (ft)		PIG	Spot_Dist
	Head	Backing	Head	Backing		
High Load Dry Climate Shrub understory	30	1	14	3	see	.7mile
Grass/Brush	7	1	2	2	above	.1 mile

### SPECIFIC FIRE BEHAVIOR

**Spotting:** Rollout, torching and spotting is likely throughout the day.

**Crown fire potential:** Short crown runs are possible, particularly when the slope aligns with winds, or in thunderstorm related gusts. Rates of spread of a crown fire would be up to 147 chains per hour in the gusts.

### SAFETY

**SAFETY** With the gusty winds, watch for falling snags in addition to extreme fire behavior.

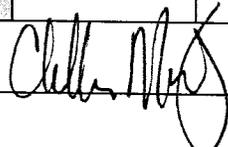

**AIR OPERATIONS** Gusty and erratic winds may inhibit effective air operations in the afternoon.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

## Human Resource Message

### *“Respect” Check*

As the number of personnel on this incident grows, please take the time to think about how we interact with each other. Here are some things to think about:

Awareness of how **OUR** behavior affects others is one way to prevent harassment and other Civil Rights violations. Humor and “fun” need to be a part of our teamwork picture, but not when it is at the expense of others. Know and understand the boundaries of respecting others!

Laughter is great, but....

When is a joke --- not a joke?

When it embarrasses someone,

When it is negative humor,

When it is a put-down based on someone’s sex, race, color, National origin, age, religion, and mental or physical disability.

If you get that little nagging feeling about something, you are going to say or do – then DON’T and listen to your internal voices.

If you need assistance, talk to your supervisor or contact the HRSP.

*Have a SAFE day and take time to do  
A “Respect” check!*

## Resource Advisor's Message – July 28, 2013

### Archaeological Resources

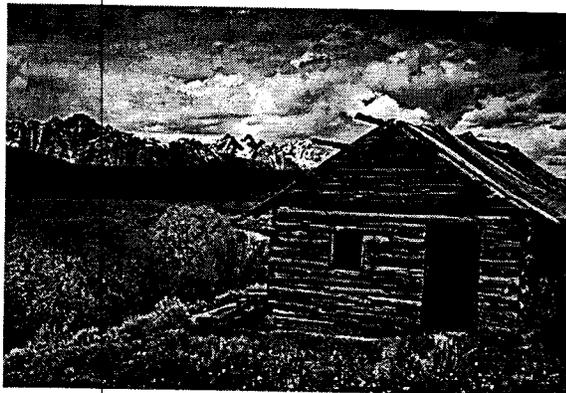

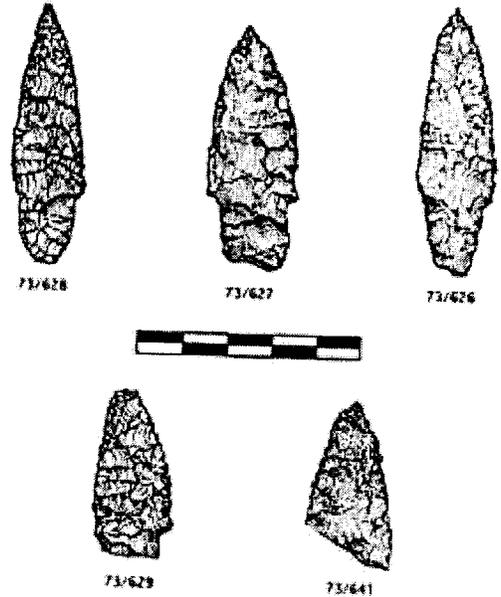

Archaeological resources are an irreplaceable part of America's heritage. Several pieces of legislation have been enacted that protect these resources.

Over a century ago, President Theodore Roosevelt signed into law the Antiquities Act of 1906. Through a succinct piece of legislation, the Antiquities Act allowed for the:

- establishment of a Federal policy to protect antiquities
- designation of a means to set aside areas as National Monuments
- establishment of a permitting process for research of antiquities and a penalty for unauthorized access to antiquities

The National Historic Preservation Act was signed into law by Lyndon B. Johnson on October 15, 1966, is legislation intended to preserve historical and archaeological sites in the United States of America. The act created the National Register of Historic Places, the list of National Historic Landmarks, and the State Historic Preservation Offices.

The Archaeological Resources Protection Act (ARPA) was enacted in 1979. The main focus of ARPA is on regulation of legitimate archeological investigation on public lands and the enforcement of penalties against those who loot or vandalize archeological resources. Both the original statute and, especially, the amendments to it in 1988 provided authority to Federal officials to better manage archeological sites on public land.

ARPA essentially gave teeth to the historic preservation laws. For a felony offense, first time offenders can be fined up to \$20,000 and imprisoned for up to one year. Second time felony offenders can be fined up to \$100,000 and imprisoned for up to 5 years. Section 7 of ARPA enables Federal or Indian authorities to prosecute violators using civil fines, either in conjunction with or independent of any criminal prosecution. Section 8 (b) of the statute allows the court or civil authority to use forfeiture of vehicles and equipment used in the violation of the statute as another means of punishment against convicted violators.

When artifacts are stolen from prehistoric and historic sites, their context and subsequent archaeological value is removed. In short, if you find an artifact- projectile point, pottery shard, bottle- enjoy it where it is located. Take a picture, but leave it where you found it.
