Phone:</b> 541-416-6593	<b>National Coordinator:</b> Melinda McGann <b>National Coord. Phone:</b> 208-387-5900
<b>Ordered By:</b> Jacob Rosenberg	<b>Order Number:</b> A-11	<b>Aircraft/Scanner System:</b> N144Z/Phoenix	<b>Pilots/Techs:</b> Johnson/Nelson/Navarro
<b>IRIN Comments on imagery:</b> 1 Flight Lines, Good imagery on all parts of the fire.		<b>Weather at time of flight:</b> Clear	<b>Flight Objective:</b> Perimeter identification and hotspot location
<b>Date and Time Imagery Received by Interpreter:</b> 8-26-2016 @ 0105 (PDT)		<b>Type of media for final product:</b> PDF Maps, Shapefiles, and KMZ	
<b>Date and Time Imagery Delivered to Incident:</b> 8-26-2016 @ 0330 (PDT)		<b>Electronic file sent to:</b> Incident Dropbox workspace and also the NIFC FTP Site: <a href="http://ftp.nifc.gov/incident_specific_data/pacific_nw/2016_Incidents_Oregon/2016_2500Road_OR-551S-000006/IR/20160826/">http://ftp.nifc.gov/incident_specific_data/pacific_nw/2016_Incidents_Oregon/2016_2500Road_OR-551S-000006/IR/20160826/</a>	
<b>Comments /notes on tonight's mission and this interpretation:</b>  There are numerous isolated heat sources throughout the upper and lower polygons. The upper portion of the fire has some intense heat about midway up the east side. The heat perimeter expanded a little on the east side of the upper portion of the fire. The middle portion of the fire has a few isolated heat sources in it. The bottom polygon has the most intense and scattered heat out of the three portions of the fire. The fires are located south of Salmon Creek, east of Fogarty Creek State Park, west of the Siletz River and north of the South Depot Bay Creek. Also to note, the sensor picked up some heat 4 miles northeast of the upper portion of the fire.
