Date and Time Imagery Delivered to Incident: June 10, 2016, 0400		Electronic file sent to: FTP.NIFC.GOV	
Comments /notes on tonight's mission and this interpretation: There was some perimeter expansion on the north and east side of the fire. There was no heat shown in the area between the perimeter from the incident and last nights IR flight. Most of the fire has scattered heat sources and no areas of intense heat. There was light cloud cover at the time of the flight, however, heat sources were detected throughout the fire area.
