

**Fire 235
(325 acres)**

**Potter Mountain Complex
OR-UPF-000235
08/01/2015-08/15/2015
REPAIR MAP**

AREAS OF CONCERN

FR 100:

Extensive Felling Operations were implemented along the 100 road to remove hazard trees and threats to FR100 and control lines. Patrol is still absolutely necessary to ensure the integrity of the control lines. Crews are advised to continue to utilize extreme caution and limit exposure while in patrol status.

Patricia Creek Drainage:

Most ground fuels within Patricia drainage were consumed naturally or as a result of firing operations. The potential for canopy re-burn should be considered. Isolated smokes still remain within the interior of the drainage (marked on the map). These smokes could pose a threat to control lines if the canopy were to ignite as a result of fire aligning with winds and/or extreme environmental conditions.

REHAB AREAS

Waterbars:

Waterbars were constructed along the northern and western handlines of the fire.

FR 160:

FR 160 was opened to assist in fire suppression operations; the road will be repaired and closed to the public once fire 235 is no longer in patrol status.
