**☐ FIRE BEHAVIOR**

John Kern - FBAN

**Bugaboo Incident NF in Florida/Florida Div. of Forestry Forecast #38 6/03/2007**

**General:** Fire activity will be minimal today. We got 3" of rain over all parts of the burn. Very dry muck (deep) and high chemical content fuels will be able to hold heat. Continue to watch for hot stump holes and falling trees.

	KBDI (today/yesterday)	ERC (today/yesterday)
Olustee (south of fire)	457/719	N/A wet fuels/38
Eddy Tower (Div. A)	481/720	N/A wet fuels/38

With winds (20' above ground) of 5-10 MPH with gusts and the predicted Temp. and RH, we could see the following fire behavior. These estimates will be for fires that get rolling, most fire activity will be more "nominal" (insignificant).

DAY TIME	Rate of Spread (ch/hr)			Flame Length (Feet)		
	5 MPH	10 MPH	25 mph Gusts	5 MPH	10 MPH	25 mph Gusts
Wind Speed						
FM 4 Volatile Fuels	12	30	100	9	13	23
FM 7 Southern Rough	4	10	34	3	4	6
GR9 – Very High Load, Humid Climate Grass	4	10	36	4	5	9
FM 9 – Long needle leaf litter	1	3	12	1	2	3

The PROBABILITY OF IGNITION – 20-30% (depending on shading).

Spotting distances 0.1-0.2 average, with gusts to 25 it increases to 0.5 miles. (Not likely, but possible)

All Divisions: Watch for trees falling over as soil around roots is saturated.

**Air Operations:** Morning smog should burn off by 9 AM **Safety:** Heavier fuels and live fuels are still very dry. Watch for hot stump holes and muck pockets

## TAILGATE BRIEFING SHEET 2 OF 2

**SAFETY MESSAGE**                      **June 3, 2007 0700-0700**

*Major Hazard and Risks:*

- Footing - on Equipment & in the Woods
- Snags
- Wet Roads

- Your footing will be a source of concern for the next few days until it dries out some. Use a three-point grip for safety when you are getting on and off equipment. Step over rather than on logs.
- Expect the fire & wind weakened, drought ridden trees to be further undermined by the recent rain. Post lookouts and watchout for hazard trees. Avoid and flag them. Push over/fell as necessary.
- Drive cautiously with your headlights "on". Give yourself extra room to stop. The roads may still be wet or hold standing water in many areas. The forest roads will be slippery with mud. This will require more time for you to stop.

### STANDARD FIREFIGHTING ORDERS

1. Keep informed on fire weather conditions & forecasts
2. Know what your fire is doing at all times
3. Base all actions on current & expected behavior of the fire
4. Identify escape routes & safety zones, and make them known
5. Post lookouts when there is possible danger
6. Be alert. Keep calm. Think clearly. Act decisively.
7. Maintain prompt communications with your forces, your supervisor and adjoining forces.
8. Give clear instructions and insure they are understood.
9. Maintain control of your forces at all times.
10. Fight fire aggressively, having provided for safety first.

Gene Madden, Don Neal, Dave Hildebrand, and Keith Long
