**SAFETY MESSAGE June 8, 2007 0700-1900**

*Major Hazard and Risks:*

- **Logging & Heavy Equipment Operations and Road Conditions**
- **Demob Safety**
- **Dehydration and General Health**

- Logging salvage operations and road maintenance continues. Slow down and give these machines a wide berth when passing. Watch the road surfaces. Avoid standing water and soft shoulders. By reducing your speed—you'll be safer and not rip up the forest roads too.
- Anticipating Demob can be a stressful time, and during stressful times accidents can occur. While you are going through the process think safety at all times until you arrive home to your loved ones.
- The temperature is raising and the RH is too. Dehydration is preventable by drinking 3 bottles of water to one bottle of sports drinks. Take frequent breaks. Watch your overall health by avoiding "community" food/drinks", getting proper rest and keep your hands clean.

**STANDARD FIREFIGHTING ORDERS**

1. Keep informed on fire weather conditions & forecasts
2. Know what your fire is doing at all times
3. Base all actions on current & expected behavior of the fire
4. Identify escape routes & safety zones, and make them known
5. Post lookouts when there is possible danger
6. Be alert. Keep calm. Think clearly. Act decisively.
7. Maintain prompt communications with your forces, your supervisor and adjoining forces.
8. Give clear instructions and insure they are understood.
9. Maintain control of your forces at all times.
10. Fight fire aggressively, having provided for safety first.
