SAFETY MESSAGE
June 13, 2007 0700-1900

<i>Major Hazard and Risks:</i>
➤ Equipment Safety Maintenance
➤ Rehab Safety
➤ Roads, Roads, Roads.....
➤ Check all of your equipment daily with safety in mind. Things to look for include leaking hydraulic lines, fully charged fire extinguishers and pine needles in enclosed cab filters and air conditioning units.
➤ Rehab is an important function of any fire assignment. Fire weakened trees, backing of equipment and transports, and traffic congestion, are but a few areas of concern. During your shift, identify at least one other safety concern and share it with the group during de-briefing. Lets all be safe out there.
➤ Driving any of these roads has the potential of injury. The traffic on US 90 is particularly hazardous. Be absolutely sure you use your turn signals and give plenty of advanced notice when turning to the ICP. Drive defensively and watch your speed. In order for us to do our jobs we must arrive safely

STANDARD FIREFIGHTING ORDERS

1. **Keep informed on fire weather conditions & forecasts**
2. **Know what your fire is doing at all times**
3. **Base all actions on current & expected behavior of the fire**
4. **Identify escape routes & safety zones, and make them known**
5. **Post lookouts when there is possible danger**
6. **Be alert. Keep calm. Think clearly. Act decisively.**
7. **Maintain prompt communications with your forces, your supervisor and adjoining forces.**
8. **Give clear instructions and insure they are understood.**
9. **Maintain control of your forces at all times.**
10. **Fight fire aggressively, having provided for safety first.**
