

Incident Status Summary (ICS-209)

Incident: **Orange Blossom**

1. Incident Name: Orange Blossom		2. Incident Number: FL-BCP-00H3NX	
3. Report Version: Initial <input checked="" type="checkbox"/> Update Final	4. Incident Commander(s) & Agency or Organization: Cass Palmer ICT3, FLPR Justin Turnbo ICT3, BICY	5. Incident Management Organization: Type 3 Team	6. Incident Start Date/Time: Date: 04/22/2014 Time: 0530
7. Current Incident Size or Area Involved: 2822 Acres	8. Percent (%) Contained or Completed: 40 % Percent (%) of Perimeter to be Contained: 60 %	9. Incident Type: Wildfire B. Incident Description: C. Cause: Unknown D. Suppression Strategy: (Full Suppression (100%))	10. Incident Complexity Level: <input checked="" type="checkbox"/> Single Complex Type 3
11. Report Time Period: From Date/Time: 04/26/2014 1800 To Date/Time: 04/27/2014 2000			
12. Prepared By: Print Name: Steve Smith - SITL Date/Time Prepared: 04/27/2014 1900		13. Approved By: Print Name: Cass Palmer Signature: _____	
14. Date/Time Submitted: 04/27/2014 1922		15. Primary Location, Organization, or Agency Sent To: SACC	
16. State: FL	17. County / Parish / Borough: Collier	18. City: Immokalee	
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership: FL-BCP	
22. Latitude/Longitude: Latitude: 26° 13' 40" Longitude: 81° 2' 20"	23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Township: Range: Section: 1/4 Sec: of 1/4 Sec:	
25. Short Location or Area Description (list all affected areas or a reference point): 25 miles NE of Ochopee, Florida			26. UTM Coordinates: Zone: Easting: Northing:
27. Note any electronic geospatial data included or attached (indicate data format, content, and collection time information and labels):			
28. Significant Events for the Time Period Reported (summarize significant progress made, evacuations, incident growth, etc.): Fire continued to burn thru interior pockets of pine and shrub fuels. Active fire was observed throughout the overnight hours. Burnout operations have been conducted along the southern and western perimeters with varied success.			
29. Primary Fuel Model, or Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc.):			

Incident Status Summary (ICS-209)

Incident: **Orange Blossom**

Fuel Model: Southern Rough Fire moving through pinelands in a grass/shrub component.				
30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc.):	Structural Summary	# Threatened (up to 72 hrs)	# Damaged	# Destroyed
	Single Residences	0	0	0
	Multiple Residences	0	0	0
	Mixed Commercial / Residential	0	0	0
	Nonresidential Commercial Property	0	0	0
	Other Minor Structures	0	0	0

31. Public Status Summary: <i>Number of Civilians (Public) Indicated Below:</i>				32. Responder Status Summary: <i>Number of Responders Indicated Below:</i>			
	Previous Report Total	# this Reporting Period	Total # to-date		Previous Report Total	# this Reporting Period	Total # to-date

33. Life, Safety, and Health Status/Threat Remarks: 35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): Current weather consists of winds with a South/Southeasterly direction. Afternoon temps reached the mid 90's and humidities dropped to around 40%. High pressure to the ENE will keep a southeasterly flow across the area. The Gulf sea breeze will try to set up along the coast, but will once again have trouble progressing east. Moisture will be increasing. This will keep Relative Humidity higher, but also allow for increasing chances of showers and thunderstorms.	34. Life, Safety, and Health Threat Management: <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">No Likely Threat</div> <div style="border: 1px solid black; padding: 2px; margin-bottom: 2px;">Potential Future Threat</div> <div style="border: 1px solid black; padding: 2px;">Mass Notifications in Progress</div>

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour timeframes:

Fire will continue to burn actively in the pine and shrub fuels throughout the interior of the fire. Fire may spread along the western and northern perimeters as burnout operations are attempted. Fire spread has been predominantly fuels driven, following fingers and pockets of pine/shrub fuels. When winds and fuels line up very active fire spread and increased rates of spread occur.

12 hours:

24 hours:

48 hours:

72 hours:

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Keep current fire to the east of Nobles Grade to prevent large fire growth to the west. Keep fire west of the Sanctuary subdivision located 6 miles east of the fire to prevent significant structure protection and need for additional resources. Keep fire spread north of I-75, and south of the Big Cypress Reservation/Big Cypress National Preserve boundaries.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural

Incident Status Summary (ICS-209)

Incident: **Orange Blossom**

resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

The Sanctuary subdivision is approximately 6 miles east of the fire perimeter. Fire is not expected to reach this area within this timeframe. I-75 is approximately 3 miles to the south. Fire encroachment and smoke impacts to I-75 could pose major transportation disruptions and create significant travel safety concerns.

48 hours:
72 hours:
Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours:
24 hours:
48 hours:
72 hours:
Anticipated after 72 hours:

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

41. Planned Actions for Next Operational Period:
Transition from local Type 3 IMT to SA Blue Team Type I IMT (Wilkins) will occur at 07:30 on 4/28/14. Continued line improvement along the western and northern perimeters combined with potential burnout operations. Mop-up and patrol will occur on the other perimeters as conditions warrant.

42. Projected Final Incident Size/Area: **6,000**

43. Anticipated Incident Containment or Completion Date:

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date: **\$700,000**

46. Projected Final Incident Cost Estimate:
