## Fire Weather Forecast

**FORECAST NO:** 23

**NAME OF FIRE:** Big Turnaround Complex

**PREDICTION FOR:** Day and Swing Shift

**UNIT:** Okefenokee Wildlife Refuge

**SHIFT DATE:** Sunday 05/27/07

**SIGNED:** Phil Manuel

**TIME AND DATE** 1900

**Incident Meteorologist**

**FORECAST ISSUED:** 05/26/2007

---

### WEATHER DISCUSSION:

On shore winds off the Atlantic Ocean will continue today. A large area of high pressure covers the southeastern United States. Clockwise flow around the high is resulting in the persistent easterly winds.

The main concern: **Moderate wind gusts between 1300 and 2000.**

---

### WEATHER FORECAST SUNDAY:

**WEATHER:** Partly cloudy.

**MAX TEMPERATURES:** Around 87. (24 hour trend = up 2 degrees)

**MIN HUMIDITY:** 32 to 38 percent (24 hour trend = down 2)

**20 FT WINDS:** Northeast 2 to 5 mph in the morning...becoming east and increasing to 5 to 10 mph during the afternoon with gusts to 15 mph.

**STABILITY/INVERSION:** Mixing heights around 6000 ft in the afternoon.

Dispersion Index 65. Haines Index 4.

**TRANSPORT WINDS:** East 18 mph.

---

### WEATHER FORECAST SUNDAY NIGHT:

**WEATHER:** Mostly clear.

**MIN TEMPERATURES:** Low around 58. (24 hour trend = unchanged)

**MAX HUMIDITY:** Recovery...80 to 100 percent.

**20 FT WINDS:** Southeast 5 to 10 mph during the evening (1800 - 2200 EDT)...becoming light and variable after 2200 (10 PM).

**STABILITY/INVERSION:** Inversion to 400 feet. Dispersion Index 4.

---

**OUTLOOK FOR MONDAY:** Partly Cloudy. Northeast 2 to 4 mph in the morning...becoming east 5 to 10 mph with gusts to 15 mph in the afternoon. High around 87. Minimum humidity 32 to 38 percent.

---

**SUNRISE/SUNSET:** Sunday May 27th...0627/2022

---

### EXTENDED...

High pressure will remain centered along the Carolina Coast. This will result in mainly dry conditions with an east or southeast wind. Little or no precipitation is anticipated through mid week. The sea breeze may generate a few showers toward the end of the week, but the activity is not expected to be widespread.

	Tuesday	Wednesday	Thursday	Friday

## Fire Behavior Forecast

<b><u>Forecast No. 38</u></b>	<b><u>Prediction for Day Shift</u></b>
<b><u>Name of Fire: Big Turnaround Complex</u></b>	<b><u>Shift Date: May 27, 2007</u></b>
<b><u>Time and Date Forecast Issued</u></b> <b><u>1800 hrs 5/26/2007</u></b>	<b><u>Signed : Stewart Turner</u></b> <b><u>Fire Behavior Analyst</u></b>

### **Weather Summary (See Detailed Weather Forecast in the IAP):**

Partly cloudy with temperatures reaching the high 80's. Minimum relative humidity will range from 32-38%. East winds will range from 5-10 mph sustained in the afternoon. A Haines index of 4 and a dispersion index of 65 are forecast.

**General Fire Behavior:** When the clouds dissipate around 1600 fire behavior will increase. Moderate fire behavior after the morning inversion breaks around 0930. Fire behavior will increase to active by 1100 and very active during the peak hours 1600 through 2000 hrs. Anticipate and plan for very active to extreme fire behavior with any head fire. There is a potential for extreme fire behavior with any head fire from 1800 to 1900 hours. During peak hours swamp shrub and swamp bay fuels will burn intensely on the surface producing 8 to 15 foot lengths and spread rates of 10 to 12 feet/minute. Brisk east winds will facilitate torching and short range spotting out to 100 yards. The swamp fuels will produce moderate backing spread rates of 2-4 feet/minute. During peak burning hours, pine fuels will spread at 60-80 feet/minute with very high intensities in the palmetto/gallberry rough (15-30 ft flame lengths). Single tree and group torching in open canopy pine can produce spotting out to 300 yards. Young, closed canopy pine plantations (5-10yrs) have the potential to support sustained crown fire. Probability of ignition will be 70% during the peak burning period.

### **Specific Fire Behavior:**

**Branch I:** Needle cast and rekindle will continue to cause control problems in this branch. Needle cast has filled in containment lines providing an escape path to green fuels for any reburn occurring near containment lines. Low to moderate intensity burnout along portions of the swamp edge break from DIV F to the branch break has created a high potential for reburn.

**Branch II:** Fire activity increased around 1600 hours with movement to the north off of the old burnout toward Chesser Island. This area backed with 4-8 foot flames and a hank (head/flank) fire of 10-20 feet. Expect to see this activity today especially if there is any southern component to the wind. The burnout in the Roasting Ear Island area continues to back well towards the east and south. The fire edge will continue to back to the East in DIV G-J. Today the fire should reach the edges of Bee Gum and diminish in activity. Backing spread during peak hours in the swamp shrub will range from 2-4 feet/minute moving near 1/3-1/2 mile per day. DIV K will continue to have reburn potential in the needle cast.

**Air Operations:** Inversions will persist until 0900. No restrictions to air operations due to smoke or winds

### **Safety:**

*Flame lengths of 8-11 feet: fires may present serious control problems-torching out, crowning, and spotting. Control efforts at the head of the fire will probably be ineffective.*

Flame lengths greater than 11 feet: crowning, spotting, and major runs are common. Control efforts at the head of the fire are ineffective.

# SAFETY MESSAGE

---

**INCIDENT: BIG TURNAROUND COMPLEX**

**DATE: May 27, 2007**

**TIME: 0700-2400**

---

## Major Hazards and Risks:

**HYDRATION** – There was a commercial campaign with the slogan – Hydrate or Die- while this is a true statement it is somewhat dramatic. For fire fighters a more accurate slogan would be hydrate or get a headache, or develop a cough, or get a cold or a sinus infection. Water is critical for health as well as life. In the swamps of Georgia it is easy to not drink enough water due to the higher humidity but you are losing fluids all day long. Monitor your hydration level by monitoring the color of your urine. If it is very dark you are very dehydrated. A very light yellow or clear color indicates you are well hydrated.

**MEMORIAL DAY –WEEKEND** –There will be increased traffic on the roadways through Monday. People unfamiliar with all the fire traffic and unfamiliar with the area will be traveling through and local students are free for the summer. Please be courteous and drive defensively. Have your headlights on at all times. Maintain a safe speed for the traffic conditions.

**COMPLACENCY** – We are at the stage in all fires where many divisions are transitioning from active fire fighting to mop-up and patrol. Many task forces are staged to support burnouts that may or may not happen or to protect structures that may never be directly threatened. YET, at a moments notice you may be called upon to deal with a re-burn or an Initial Attack. This is the time when your professionalism and dedication wins the day and keeps you safe and effective.

---

## REMEMBER THE BASICS – THEY CAN SAVE YOUR LIFE

- 10 Standard Fire Orders
- 18 Situations That Shout Watch Out
- L.C.E.S. = Lookouts, Communications, Escape Routes, Safety Zones
- Look Up, Look Down, and Look Around

**YOU ARE RESPONSIBLE FOR YOUR PERSONAL SAFETY**

8. Medical Emergency Procedures	
<p>Medical emergencies will be reported to the Division Supervisor. The Division Supervisor will assume command and call for the closest line medic, and resources in the division that are EMT qualified. The Division Supervisor will notify communications by radio or cell phone (Big Turnaround ICP 912-496-2111). Communications to notify MEDL @ 904-955-0022 / 928-606-2393 / 520-560-2742.</p> <p>The report should include type of illness/injury and exact location of the incident. Communications will clear the air for emergency traffic only and will request key personnel to report to communications. If an air medical helicopter is used within the fire perimeter, communications should notify the air operations director and helibase.</p> <p>After hours emergencies in Kingsland and/or Folkston: Call 911, then call communications @ 912-496-2111. Communications will call MEDL and designated paramedics will be routed to the scene to facilitate transportation needs.</p>	
9. Prepared by (Medical Unit Leader) <b>Jesus Hernandez / Nathan Becker</b>	10. Reviewed by (Safety Officer) <b>Bruce Malloy</b>

# ***INCIDENT EMERGENCY PLAN (IEP)***

The goal of this Incident Emergency Plan (IEP) is to provide the guidelines necessary to Locate, Triage, Extricate, Treat and Transport accident Patients. The Division/Group Supervisor will initially oversee the emergency. Radio communication will be on the "Command Frequency". Names of injured or deceased individuals should not be given over the radio. Deceased individuals and their equipment are not to be moved, except to accomplish rescue work or to protect the health and safety of others. It is expected this organization will come from resources assigned within the Division or nearest adjoining forces.

## **DIVISION/GROUP SUPERVISOR**

- Conduct Size-up of the Incident (Nature of Accident, Number/Type of Resources, Location)
- Coordinate "Line EMT" response to the accident (Utilize Closest EMT's).
- Begin "TRIAGE"
- Determine and initiate treatment and transportation needs
- Evaluate special needs (Law Enforcement, Heavy Rescue, Haz Mat)
- Coordinate with Air Attack for Air-Medical transportation needs
- Preserve the scene for accident investigation

## **MEDICAL GROUP SUPERVISOR (This position will be filled, only if needed)**

- Supervise TRIAGE, Treatment and Transportation Unit Leaders.
- Place orders through Communications for ground ambulance, medical personnel, as needed
- Ensure proper security and traffic control.

## **TRIAGE UNIT LEADER (This position will be filled, only if needed)**

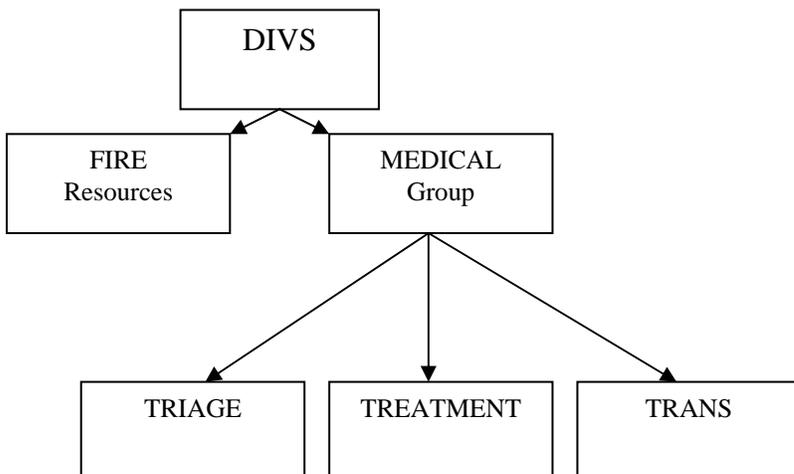

- Locate and TRIAGE all patients and relays information to Medical Group Supervisor.
- Ensure that Airway, Breathing and Circulation stabilization of patients is addressed during TRIAGE.
- Coordinate with Treatment Unit Leader for patient stabilization, extrication, and movement to treatment area.
- Utilize the "START" TRIAGE system.

## **TREATMENT UNIT LEADER (This position will be filled, only if needed)**

- Establishes Immediate, Delayed and Minor treatment areas.
- Direct treatment and stabilization of Patients.
- Prioritize Patients for transport.
- Request medical personnel and supplies, as needed.
- Ensure continual TRIAGE of patients in treatment area.
- Coordinate with TRIAGE Unit leader for delivery of patients to the treatment area.
- Coordinate with the Transportation Unit Leader for delivery of patients to ambulances.
- Ensure documentation of patient conditions and treatments on TRIAGE tags.

## **TRANSPORTATION UNIT LEADER (This position will be filled, only if needed)**

- Coordinate all patient transportation to medical facilities, air and ground.
- Establish communication with hospitals receiving patients.
- Coordinate with Treatment Unit Leader to determine number and category of patients.
- Designate ambulance/helicopter loading areas.
- Determine mode (air/ground) of patient transportation.
- Ensure patients information and destination is recorded.

- MINOR: Walking Wounded
- DELAYED: CAN Follow Simple Commands
- IMMEDIATE: Respirations have been restored  
Respirations above 30

## SIGN IN PROCEDURE

Meals may not exceed per diem rates of B-\$7, L-\$11, D-\$18.

Ticket or sign-in sheet – name, resource #(C, E, or O), fire name. Crew boss may provide manifest for names. All names of crew must be recorded for meals consumed. If recording on ticket, use front where possible.

Use govt. travel card if you have one.

Govt. will not pay for alcohol, movies or phones.

If you are on per diem, deduct any meals you sign for, or which are provided by the govt., from your travel.

The McDonalds in Folkston is offering a firefighter discount.
