

Big Turnaround

Incident Action Plan TUESDAY

June 12, 2007

Southern Area IMT Ruggiero

INCIDENT OBJECTIVES	1 INCIDENT NAME Big Turnaround Complex	2. DATE PREPARED 06/11/2007	3. TIME PREPARED 1800									
4. OPERATIONAL PERIOD (DATE/TIME) June 12, 2007 0700 – 1900 OPERATIONAL PERIOD												
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES) <ol style="list-style-type: none"> 1. Ensure firefighter and public safety through adherence to all safety standards, maintaining situational awareness and appropriate implementation of evacuations, closures, and temporary flight restrictions. 2. Protect / minimize threats / loss to private investments; key cultural features as listed in the Delegation of Authority; and protect the integrity of the Okefenokee Wilderness. 3. Manage the fires within the swamp under a containment strategy in accordance with suppression actions outlined in the WFSA. Contain the fire within the Swamp Perimeter Road; South and west of Hwy. 1 and the CSX Railroad line; and east of the Swamp Road. 4. Provide accurate and timely information to agencies, stakeholders, and the public through public meetings, news releases, website updates, reports, meetings and personal contacts. 5. Manage the incident cost effectively and in an efficient manner to contain the fire within the acres and cost prescribed by the WFSA. 6. Manage any ongoing and future road and fireline rehab work. Document upland habitats that require restoration work, and provide that documentation to the ESR-BAER Group Team Leader promptly. 												
6. WEATHER FORCAST FOR OPERATIONAL PERIOD See attached Weather and Fire Behavior Forecast for detailed information.												
7. GENERAL/SAFETY MESSAGE A. There are 6-35 trains/day on the CSX tracks in Branch I: there are few automatic railroad crossing warning devices: stop before crossing the tracks and verify it is safe before crossing the tracks. B. GFC will assume command on any escapes /IA outside Perimeter Road; assist as needed. C. Include snag awareness in all briefings. D. SOF's and FOB's to notify DIVS as they enter/leave divisions.

Fire Weather Forecast

FORECAST NO: 39

NAME OF FIRE: Big Turnaround Complex

PREDICTION FOR: Day Shift

UNIT: Okefenokee Wildlife Refuge

SHIFT DATE: Monday 06/12/07

SIGNED: Rick Davis
Incident Meteorologist

TIME AND DATE 1900

FORECAST ISSUED: 06/11/07

*****Strong to Severe Thunderstorms Possible Today*****

WEATHER DISCUSSION:

A weak trough of low pressure over North Florida will keep easterly low level flow over the area today as an upper level disturbance moves over the region. These features will combine with increasing moisture for increased cloud cover producing lower temperatures with showers and thunderstorms likely across the complex today. Scattered showers and thunderstorms are expected tonight into Thursday.

WEATHER FORECAST TUESDAY:

WEATHER: Mostly cloudy. Showers and thunderstorms likely, some storms may be severe. Chance of rain 60 percent.

MAX TEMPERATURES: Around 85. (24 hour trend = down 10 degrees)

MIN HUMIDITY: 50 to 55 percent (24 hour trend = up 20 percent)

20 FT WINDS: East 3 to 5 mph in the morning then becoming east-northeast and increasing to 6 to 10 mph with gusts to 16 mph in the afternoon. Winds gusty and erratic near thunderstorms.

STABILITY/INVERSION: Mixing heights around 4000 ft.

Dispersion Index 35. LAL 4.

TRANSPORT WINDS: East-southeast 10 to 12 mph.

WEATHER FORECAST TUESDAY NIGHT:

WEATHER: Mostly cloudy with scattered showers and thunderstorms. Chance of rain 50 percent.

MIN TEMPERATURES: Low around 70.

MAX HUMIDITY: Recovery near 100 percent.

20 FT WINDS: East northeast 5 to 10 mph through 2100, then northeast decreasing to 3 to 5 mph.

STABILITY/INVERSION: Inversion to 500 feet. Dispersion Index 4.

OUTLOOK FOR WEDNESDAY: Mostly cloudy with scattered showers and thunderstorms. Chance of rain 50 percent. High around 85. Minimum humidity 50 to 55 percent. Northeast winds 3 to 7 mph, increasing to 6 to 11 mph with gusts to 18 mph in the afternoon.

SUNRISE/SUNSET: Tuesday June 12...0624/2032

EXTENDED...

Temperatures will slowly increase as relative humidity slowly decreases, and a chance of precipitation will persist Thursday with lower chances for rain into the weekend.

	Thursday	Friday	Saturday	Sunday
Low	66°	64°	66°	67°
High	85°	87°	88°	90°
Min RH	55-60%	40-45%	35-40%	35-40%

Fire Behavior Forecast

INCIDENT	<i>Big Turnaround Complex</i>	OPERATIONAL PERIOD	06/12/07 Day
ADMINISTRATION UNIT	<i>Okefenokee NWR</i>	FORECAST #	54
WEATHER SUMMARY:			
Mostly cloudy with showers and thunderstorms likely. Chance of rain 50%. Minimum humidity 50-55%. Winds becoming east-northeast 6-10 with gusts to 15 in the afternoon. See attached Fire Weather Forecast.			
GENERAL FIRE BEHAVIOR: Day Shift			
	Swamp Fuels	Upland Pine	
Flame Length (feet)	12	6	
Rate of Spread (ch/hr)	17	17	
Spotting Distance (miles)	0.3	0.3	
Probability of Ignition (%)	31	36	
SPECIFIC FIRE BEHAVIOR:			
<p>All Divisions: Overall, fire behavior should be significantly reduced from yesterday with cooler, moister conditions. That obviously lessens any threats to the line and makes control easier on initial attack... although 6-foot flame lengths are still predicted for pine stands. It will also, however, make it harder to root out the lingering heat that may cause problems later. Least affected by the change in weather will be ground fire in the bay fuels which will continue to smolder. Remember, fire behavior predictions are based on generalized fuel moistures which are hooked to higher humidities and area precipitation..... some areas may burn more vigorously before increasingly widespread rain coverage.</p> <p>Structure: Okefenokee administrative site should not be impacted by fire spread during this operational period.</p> <p>IA: Expect moderate to active fire behavior once fires become established.</p>			
AIR OPERATIONS:			
No restrictions after 0900.			
SAFETY:			
With another round of lightning yesterday, there's a good chance for new starts... as you work in one area, be alert for fire from another.			
Predicted ERC for today is 38... 90th percentile is 35.			

/s/ Bruce C. Davenport

7. Control Operations Patrol and mop-up 300 feet. Identify potential reburn areas and continue to suppress re-burn pockets. Use available heavy equipment to maintain and improve roads. Perform rehab as per attached rehab standards in approved areas. Backhaul excess hose lay and equipment.							
8. Special Instructions <u>*SEE COMMUNICATIONS PLAN FOR CLOSEST COMMAND REPEATER AND FREQUENCY.</u> Be prepared to assist with I/A as requested. Logging operations support will be coordinated through Incident Communications. Remember to stop at all railroad crossings. Identify and fell snags that potentially endanger firefighters or members of the public. Inform Communications of any problems with the Command Repeater such as dead spots, broken transmissions, etc. Look for any pumps on your Divisions, obtain serial numbers and give GPS locations to Supply or pick up the pump and return it to Supply.

Rehab Specifications

Dozer Lines

General Description: Rehabilitation of suppression constructed “Dozer Lines” and “Berms” is necessary to avoid excessive soil erosion and restore natural landscape surface water flow.

Location (Suitable) Sites: See incident map for location of known dozer lines and berms. Berms with merchantable timber have been identified on incident maps. Additional lines should be rehabilitated as they are discovered in the field. All discoveries will be turned into situation unit and subsequently mapped.

Berm Definition: Berms with merchantable timber embedded within that is mixed with soil and smaller debris.

Merchantable Timber Definition: Minimum 2” top and 20 foot length.

Design/Construction Specifications

For areas with Merchantable Timber: Use excavator with thumb to remove the merchantable timber from the berm. Scatter the debris and soil into the fireline area. Lay out logs with the butt end towards the road. Leave the road open and in good shape. Merchantable timber will be removed at a later date. Ditches should be pulled and the road graded after the timber has been salvaged.

For areas with Non-merchantable Timber: Use heavy equipment to scatter debris and soil into the fireline area. Leave the road open and in good shape. Ditches should be pulled and the road graded after the timber has been salvaged.

HEALTH AND SAFETY MESSAGE

Major Hazards and Risks:

***Thunderstorm Safety**

***Railroad Crossings**

Narrative:

*** Thunderstorm Safety:** We have the chance of thunderstorms in the forecast today. A weather alert will be announced on the radio as soon as possible, but be heads up for development. They could form right over you before the message gets out. Review the Thunderstorm Safety section on page 75 of your IRPG. The 30/30 rule is on this page also.

*** Railroad Crossings:** There are several railroad crossings that we cross getting to this fire each day. Some have the automatic gate and some have STOP signs. There are also those that have no markings. As you come to the railroad crossings, remember to look both ways before crossing. The trains have resumed their normal speed of 55mph on most of the crossings. They are moving faster than you think, so don't think you can beat them across the tracks.

REMEMBER AND FOLLOW:

***The 10 Standard Fire Orders**

***The 18 Situations That Shout Watch Out**

***LCES**

Fire Order of the Day: Keep informed on fire weather conditions and forecasts..

.

YOUR Safety is our NUMBER ONE goal.

IMT Safety Officer: John Walker

HUMAN RESOURCE MESSAGE

PATIENCE AND TOLERANCE IS OUR GUIDE

As we close out our responsibilities on this fire,

.....Remember George Constantinos words.

.....Remember the wisdom and humor of Deputy Chancey

.....Remember the concern Joe Hopkins expressed for the local citizens

.....Remember the feeling of gratitude showered on you by those citizens.

And even more importantly during our final stage here, remember SITUATIONAL AWARENESS...

This is one of those **WATCH OUT** situations!!! **Be Aware....**

Lots of things happen during the final days of an incident, and many of them are not positive!! -----

Mick

8. Medical Emergency Procedures	
<p>Medical emergencies will be reported to the Division Supervisor. The Division Supervisor will assume command and call for the closest line medic, and resources in the division that are EMT qualified. The Division Supervisor will notify communications by radio or cell phone (Big Turnaround ICP 912-496-2111). Communications to notify Larry Nunez MEDL @ 904-955-0022 or Med Unit @ 912-218-9101.</p> <p>The report should include type of illness/injury and exact location of the incident. Communications will clear the air for emergency traffic only and will request key personnel to report to communications. If an air medical helicopter is used within the fire perimeter, communications should notify the air operations director and helibase.</p> <p>After hours emergencies in Kingsland and/or Folkston: Call 911, then call communications @ 912-496-2111. Communications will call MEDL and designated paramedics will be routed to the scene to facilitate transportation needs.</p>	
9. Prepared by (Medical Unit Leader) Larry Nunez	10. Reviewed by (Safety Officer) John Walker

INCIDENT EMERGENCY PLAN (IEP)

The goal of this Incident Emergency Plan (IEP) is to provide the guidelines necessary to Locate, Triage, Extricate, Treat and Transport accident Patients. The Division/Group Supervisor will initially oversee the emergency. Radio communication will be on the "Command Frequency". Names of injured or deceased individuals should not be given over the radio. Deceased individuals and their equipment are not to be moved, except to accomplish rescue work or to protect the health and safety of others. It is expected this organization will come from resources assigned within the Division or nearest adjoining forces.

DIVISION/GROUP SUPERVISOR

- Conduct Size-up of the Incident (Nature of Accident, Number/Type of Resources, Location)
- Coordinate "Line EMT" response to the accident (Utilize Closest EMT's).
- Begin "TRIAGE"
- Determine and initiate treatment and transportation needs
- Evaluate special needs (Law Enforcement, Heavy Rescue, Haz Mat)
- Coordinate with Air Attack for Air-Medical transportation needs
- Preserve the scene for accident investigation

MEDICAL GROUP SUPERVISOR (This position will be filled, only if needed)

- Supervise TRIAGE, Treatment and Transportation Unit Leaders.
- Place orders through Communications for ground ambulance, medical personnel, as needed
- Ensure proper security and traffic control.

TRIAGE UNIT LEADER (This position will be filled, only if needed)

- Locate and TRIAGE all patients and relays information to Medical Group Supervisor.
- Ensure that Airway, Breathing and Circulation stabilization of patients is addressed during TRIAGE.
- Coordinate with Treatment Unit Leader for patient stabilization, extrication, and movement to treatment area.
- Utilize the "START" TRIAGE system.

TREATMENT UNIT LEADER (This position will be filled, only if needed)

- Establishes Immediate, Delayed and Minor treatment areas.
- Direct treatment and stabilization of Patients.
- Prioritize Patients for transport.
- Request medical personnel and supplies, as needed.
- Ensure continual TRIAGE of patients in treatment area.
- Coordinate with TRIAGE Unit leader for delivery of patients to the treatment area.
- Coordinate with the Transportation Unit Leader for delivery of patients to ambulances.
- Ensure documentation of patient conditions and treatments on TRIAGE tags.

TRANSPORTATION UNIT LEADER (This position will be filled, only if needed)

- Coordinate all patient transportation to medical facilities, air and ground.
- Establish communication with hospitals receiving patients.
- Coordinate with Treatment Unit Leader to determine number and category of patients.
- Designate ambulance/helicopter loading areas.
- Determine mode (air/ground) of patient transportation.
- Ensure patients information and destination is recorded.

- MINOR: Walking Wounded
- DELAYED: **CAN** Follow Simple Commands
- IMMEDIATE: Respirations have been restored
Respirations above 30
Radial Pulse Absent
Capillary Refill > 2 seconds
CAN NOT Follow Simple Command
- FATALITY: No Respirations after head tilt

FINANCE NOTES

Please allow yourself sufficient time in order to complete Time and Equipment Demob before 1900.

Ensure Equipment Shift Tickets have correct dates.

If you cannot and do not take a lunch or dinner break, you must document the reason in the remarks section of the crew time report.

**** Examples: No dinner meal break taken because; no meal available; unable to leave post; break taken at end of shift.**
