

Big Turnaround Complex

Incident Action Plan FRIDAY June 15, 2007 California FUMT— Perkins

<p style="text-align: center;">INCIDENT OBJECTIVES</p>	<p style="text-align: center;">1 INCIDENT NAME Big Turnaround Complex</p>	<p style="text-align: center;">2. DATE PREPARED 06/14/2007</p>	<p style="text-align: center;">3. TIME PREPARED 1800</p>									
<p>4. OPERATIONAL PERIOD (DATE/TIME) June 15, 2007 0700 – 1900 DAY SHIFT</p>												
<p>5. CORE VALUES – ALL INCIDENTS, ALL THE TIME</p> <ul style="list-style-type: none"> A. Firefighter Safety – Everyone goes home. B. Public Safety – We will be proactive in facilitating safety of affected citizens. C. 100% Effort – We will mindfully engage all missions with our collective expertise. D. Land Stewardship – We will cause no unnecessary resource damage. E. Open Communication – Direct, respectful, and 2 way communications is the key to our success. 												
<p>6. INCIDENT OBJECTIVES / MANAGEMENT EXPECTATIONS</p> <p style="text-align: center;"><u>Management Priorities</u></p> <ul style="list-style-type: none"> 1. Provide for fire fighter and public safety. 2. Minimize the loss or damage to structures, private property, recreations sites, watershed, wildlife habitat, timber lands, and other assets. <p style="text-align: center;"><u>Operational Objectives</u></p> <ul style="list-style-type: none"> 1. Keep fire contained within established containment lines. 2. Continue mop up and patrol operations. 3. Manage new ignitions within Refuge according to WFSA and FMP. 4. Prioritize and implement suppression rehabilitation. 												
<p>7. PLAN OF ACTION, STRATEGY AND PRIORITIES</p> <ul style="list-style-type: none"> 1. First priority is to protecting the public assets at risk. All available air and ground resources will support this operation when necessary. 2. Second priority will be to effectively assist with initial attack of new fire starts. 3. Third priority will be to continue the planning and implementation of fire suppression rehabilitation.

Fire Weather Forecast

FORECAST NO: 42

NAME OF FIRE: Big Turnaround Complex

PREDICTION FOR: Day Shift

UNIT: Okefenokee Wildlife Refuge

SHIFT DATE: Friday 06/15/07

SIGNED: Rick Davis
Incident Meteorologist

TIME AND DATE 1900
FORECAST ISSUED: 06/14/07

WEATHER DISCUSSION:

A fairly moist and unstable airmass remains over the region as daytime heating and the afternoon seabreeze are expected to generate scattered showers and thunderstorms in and near the fire complex today. Upper level ridging and weak surface high pressure building over the region is expected to bring a slightly warmer and drier airmass over the region this weekend into early next week. A slow moisture return next week is expected as a front approaches the region bringing increased chances for rain by mid week.

WEATHER FORECAST FRIDAY:

WEATHER: Partly cloudy. Scattered mainly afternoon showers and thunderstorms. Chance of rain 30 percent. Some storms may be strong.

MAX TEMPERATURES: 85 to 90. (24 hour trend = up 2 degrees)

MIN HUMIDITY: 35 to 40 percent (24 hour trend = down around 5 percent)

20 FT WINDS: East northeast 3 to 6 mph in the morning then becoming east southeast and increasing to 6 to 10 mph with gusts to 16 mph in the afternoon.

STABILITY/INVERSION: Mixing heights around 6500 ft.
Dispersion Index 35. LAL 3.

TRANSPORT WINDS: East southeast 10 to 12 mph.

WEATHER FORECAST FRIDAY NIGHT:

WEATHER: Partly cloudy with isolated evening showers and thunderstorms. Chance of rain 20 percent.

MIN TEMPERATURES: Low around 65.

MAX HUMIDITY: Recovery 95 to 100 percent.

20 FT WINDS: East 5 to 10 mph through 2000, then becoming light southeast.

STABILITY/INVERSION: Inversion to 300 feet with localized visibilities reduced to a mile or less in fog/smoke after 0200. Dispersion Index 3.

OUTLOOK FOR SATURDAY: Partly cloudy with isolated afternoon showers and thunderstorms. Chance of rain 20 percent. High 87 to 91. Minimum humidity 32 to 37 percent. Light winds, becoming east southeast 5 to 10 mph with gusts to 15 mph in the afternoon.

SUNRISE/SUNSET: Friday June 15...0625/2033

EXTENDED...

Warmer and drier conditions are expected through the weekend. Increasing moisture and rain chances next week.

	Sunday	Monday	Tuesday	Wednesday
Low	68°	70°	70°	71°
High	92°	91°	91°	91°

Fire Behavior Forecast

INCIDENT	Big Turnaround Complex	OPERATIONAL PERIOD	06/15/07 Day Shift
ADMINISTRATION UNIT	Okefenokee NWR	FORECAST #	57
WEATHER SUMMARY:			
Partly cloudy, with scattered afternoon showers and thunderstorms. Chance of rain 30%. Minimum humidity 35-40%. East northeast winds from 3 to 6 mph in the morning then becoming east southeast and increasing to 6 to 10 mph with gusts to 16 mph in the afternoon. See attached Fire Weather Forecast.			
GENERAL FIRE BEHAVIOR: Day Shift			
	Swamp Fuels	Upland Pine	
Flame Length (feet)	9	7	
Rate of Spread (ch/hr)	31	22	
Spotting Distance (miles)	0.4	0.4	
Probability of Ignition (%)	44	50	
SPECIFIC FIRE BEHAVIOR:			
<p>All Divisions: The predicted rates of spread and flame lengths are based on an established fire with max wind speeds in the warmest and driest period of the day. On the south half of the fire, you can expect a smoldering type fire with no significant fire spread. The driest remaining portion of the fire is Branch IV near the recent burnout and Branch I in the far north nearest Waycross, GA. Expect increasing ground fire behavior in Divisions WE and WF with more smoldering in machine piles, stumps and duff. Please alert the FBAN if open flame is detected, especially along a contiguous front.</p> <p>In areas where pine litter is reburning, the needle cast is modeled at 4 ch/hr with 2 foot flame lengths. Reburn flame lengths could be higher in the presence of preheated shrub fuels.</p> <p>Structure: Okefenokee administrative site should not be impacted by fire spread during this operational period.</p> <p>IA: Expect moderate fire behavior today on any new starts outside of the main fire perimeter, especially when gusty sea breeze or thunderstorm downdrafts are present. Holdover lightning starts may be detected within the incident initial response area. Also, watch for reburn in recently dropped pine litter on the north half of the fire where conditions are drier.</p>			
AIR OPERATIONS:			
No restrictions after 0900.			
SAFETY:			
Watch out for reburn potential in both needlecast and preheated shrub layer. Maintain situational awareness around snags, especially when wind speeds increase. Take appropriate safety measures during lightning activity.			
Predicted ERC for today is 36... 90th percentile is 35.			

/s/ Michael S. Beasley

Rehab Specifications

Dozer Lines

General Description: Rehabilitation of suppression constructed “Dozer Lines” and “Berms” is necessary to avoid excessive soil erosion and restore natural landscape surface water flow.

Location (Suitable) Sites: See incident map for location of known dozer lines and berms. Berms with merchantable timber have been identified on incident maps. Additional lines should be rehabilitated as they are discovered in the field. All discoveries will be turned into situation unit and subsequently mapped.

Berm Definition: Berms with merchantable timber embedded within that is mixed with soil and smaller debris.

Merchantable Timber Definition: Minimum 2” top and 20 foot length.

Design/Construction Specifications

For areas with Merchantable Timber: Use excavator with thumb to remove the merchantable timber from the berm. Scatter the debris and soil into the fireline area. Lay out logs with the butt end towards the road. Leave the road open and in good shape. Merchantable timber will be removed at a later date. Ditches should be pulled and the road graded after the timber has been salvaged.

For areas with Non-merchantable Timber: Use heavy equipment to scatter debris and soil into the fireline area. Leave the road open and in good shape. Ditches should be pulled and the road graded after the timber has been salvaged.

Safety Message

Big Turnaround Complex

June 15, 2007

Situational Awareness

- Identify trigger points for disengagement and re-engagement
- Re-evaluate, change your plan as needed
- Evaluate risk vs. gain
- LCES is in place before engaging in any assignment
- Be alert to wind shifts

Remember L.C.E.S. is an ongoing process. Refer to the Risk Management Process (page 1) in your I.R.P.G

Keep your safety as the primary focus. Don't become complacent. Remember, yesterday is not today, every operational shift is different.

Work/Rest- all personnel assigned to the Complex will follow work/rest guidelines. No shift shall exceed 16 hours without prior approval from the Incident Commander.

GA-OKR-007021
Okefenokee Wildlife Refuge
California Interagency Fire Use Management Team

Today's discussion is from the Miscellaneous Category.

[Six Minutes Home Page](#)

g

Fireline Mission Analysis / Decision Making

- Define tasks based on fire assignment
- Structure strategies, tactics and objectives
- Identify potential impact of unplanned events on a fire
- Critique existing plans
- Devise contingency plans
- Question/seek information, data and ideas related to fire plan
- Cross-check information sources
- Anticipate consequences of decisions
- Use data to generate alternatives
- Gather pertinent data before making a decision, evaluate information and assess resources
- Identify alternatives and contingencies
- Provide rationale for decision

8. Medical Emergency Procedures	
<p>Medical emergencies will be reported to the Division Supervisor. The Division Supervisor will assume command and call for the closest line medic, and resources in the division that are EMT qualified. The Division Supervisor will notify communications by radio or cell phone (Big Turnaround ICP 912-496-2111), and on the WEST SIDE of the fire DIV WI WM Z WE WF WH Logistics will also be notified to assist. Communications to notify MEDL @ 904-955-0022 / The report should include type of illness/injury and exact location of the incident. Communications will clear the air for emergency traffic only and will request key personnel to report to communications. If an air medical helicopter is used within the fire perimeter, communications should notify the air operations director and helibase.</p> <p>After 2100 hours emergencies in Kingsland and/or Folkston: after hour contact is night security Allen Neal 606-521-6017. Before 2100 call communications @ 912-496-4175. DO NOT DELAY TREATMENT CALL 911 WHEN LIFE THREATENING. Communications will call MEDL and designated paramedics will be routed to the scene to facilitate transportation or other logistical needs.</p>
