

# Big Turnaround Complex

## Incident Action Plan SUNDAY June 17, 2007 California FUMT— Perkins

Happy Father's Day

<p style="text-align: center;"><b>INCIDENT OBJECTIVES</b></p>	<p style="text-align: center;">1 INCIDENT NAME <b>Big Turnaround Complex</b></p>	<p style="text-align: center;">2. DATE PREPARED <b>06/16/2007</b></p>	<p style="text-align: center;">3. TIME PREPARED <b>1800</b></p>									
<p>4. OPERATIONAL PERIOD (DATE/TIME) <b>June 17, 2007    0700 – 1900    DAY SHIFT</b></p>												
<p>5. CORE VALUES – ALL INCIDENTS, ALL THE TIME</p> <ul style="list-style-type: none"> <li>A. Firefighter Safety – Everyone goes home.</li> <li>B. Public Safety – We will be proactive in facilitating safety of affected citizens.</li> <li>C. 100% Effort – We will mindfully engage all missions with our collective expertise.</li> <li>D. Land Stewardship – We will cause no unnecessary resource damage.</li> <li>E. Open Communication – Direct, respectful, and 2 way communications is the key to our success.</li> </ul>												
<p>6. INCIDENT OBJECTIVES / MANAGEMENT EXPECTATIONS</p> <p style="text-align: center;"><u>Management Priorities</u></p> <ul style="list-style-type: none"> <li>1. Provide for fire fighter and public safety.</li> <li>2. Minimize the loss or damage to structures, private property, recreations sites, watershed, wildlife habitat, timber lands, and other assets.</li> </ul> <p style="text-align: center;"><u>Operational Objectives</u></p> <ul style="list-style-type: none"> <li>1. Keep fire contained within established containment lines.</li> <li>2. Implement suppression rehabilitation and repair.</li> <li>3. Manage new ignitions within Refuge according to WFSA and FMP.</li> <li>4. Continue monitoring potential fire movement.</li> </ul>												
<p>7. PLAN OF ACTION, STRATEGY AND PRIORITIES</p> <ul style="list-style-type: none"> <li>1. First priority is to protect the public assets at risk. All available air and ground resources will support the operation when necessary.</li> <li>2. Second priority will be to effectively assist with initial attack of new fire starts.</li> <li>3. Third priority will be to continue implementing fire suppression rehabilitation and repair.</li> </ul>

ORGANIZATION ASSIGNMENT LIST	
1. Incident Name <b>BIG TURNAROUND COMPLEX</b>	
2. Date 06/16/2007	3. Time 1700
4. Operational Period <b>June 17, 2007 0700 - 1900</b>	
Position	Name
5. Incident Commander and Staff	
Incident Commander	Jay Perkins
Deputy	
Safety Officer	Dave Kirste
Information Officer	Jack Horner/Miriam Morrill (T)/Monica Neal (T)
Liaison Officer	
6. Agency Representative	
Agency	Name
FWS	Howard McCullough
FWS	Russ Langford
GFC	Eric Harris
Charlton Co. EM	Sgt. Joey Chancy
GEMA/Charlton Co.	Gary Rice
GEMA/Ware Co.	Vicki Thompson
7. Planning Section	
Chief	Christie Neill (T)
Resources Unit	John Martel
Situation Unit	Christie Neill
FOBS / FEMO	FOBS Merle Waltz -FEMO Robert Cota
Demobilization Unit	Bill Damon
GISS	Miranda Stuart/ Constance Buford (T)
GISS	Clint Roberts/ Amy Ziegler (T)
Resource Advisor	
Training	
LTAN	Mike Beasley
IMET	Rick Davis / Claire Yeo (T)
CTSP	Bill Damon
Rehabilitation	Sue Wilder
8. Logistics Section	
Chief	Michael Burchard ----- East Joe Walker ----- West
Supply Unit	ORDM – Ben Hauck , RCDM – Eugene Brooks
Facilities Unit	Michael Burchard
Ground Support Unit	Rob Hollingsworth ( T )/Randy Harwood
Communications Unit	Rod Vorndam (T)/Tony Erringer(T)
Medical Unit	Larry Nunez
Security Unit	Darrell Hanson

Food Unit	Debbie Todd(T)	
9. Operations Section		
Chief	Sid Beckman/Mike Minton (T)	
Chief	Gary Humphrey	
a. Branch I/II - Division/Groups		
Branch Director		
Deputy		
Division/Group	A-M	John Markalunas
Division/Group	REHAB	Elmer Orosco
Division/Group

## Fire Weather Forecast

**FORECAST NO:** 44

**NAME OF FIRE:** Big Turnaround Complex

**PREDICTION FOR:** Day Shift

**UNIT:** Okefenokee Wildlife Refuge

**SHIFT DATE:** Sunday 06/17/07

**SIGNED:** Rick Davis/Claire Yeo  
Incident Meteorologist/Trainee

**TIME AND DATE** 1900

**FORECAST ISSUED:** 06/16/07

---

**WEATHER DISCUSSION:** ...Near critical RH today for the area...

An upper ridge extends over the area during this period. Surface high pressure is centered off the North Carolina coast ridging across the south Georgia area. This high will become established over the Atlantic with light winds early in the week giving way to light onshore surface south to southeast winds from Monday to Tuesday. By late Tuesday deep layer moisture starts to build ahead of a surface front that resides well north of the area. This frontal system stalls during the week and in combination with upper level southwest flow, a rainband over the region develops from Wednesday through to the weekend.

---

**WEATHER FORECAST SUNDAY:**

**WEATHER:** Mostly sunny.

**MAX TEMPERATURES:** 90 to 95. (24 hour trend = up 3 degrees)

**MIN HUMIDITY:** 28 to 32 percent (24 hour trend = down around 3 percent)

**20 FT WINDS:** Light and variable winds in the morning then becoming east southeast and increasing to 6 to 10 mph with gusts to 15 mph in the afternoon.

**STABILITY/INVERSION:** Morning smoke and fog lifting around 1000 then smoke drifting westward. Mixing heights around 7000 ft.

Dispersion Index 50. LAL 1.

**TRANSPORT WINDS:** East 10 to 12 mph.

---

**WEATHER FORECAST SUNDAY NIGHT:**

**WEATHER:** Mostly clear

**MIN TEMPERATURES:** Low around 65.

**MAX HUMIDITY:** Recovery near 100 percent.

**20 FT WINDS:** East southeast 5 to 10 mph through 2000, then becoming light and variable.

**STABILITY/INVERSION:** Inversion to 300 feet with localized visibilities reduced to a mile or less in fog/smoke after 0200. Dispersion Index 2.

---

**OUTLOOK FOR MONDAY:** Mostly sunny. High 90 to 95. Minimum humidity 30 to 35 percent. Light winds, becoming east southeast 5 to 10 mph with gusts to 15 mph in the afternoon.

---

**SUNRISE/SUNSET:** Sunday June 17...0625/2033

---

**EXTENDED...**

Increasing moisture and rain chances.

# Fire Behavior Forecast

<b>INCIDENT</b>	Big Turnaround Complex	<b>OPERATIONAL PERIOD</b>	06/17/07 Day Shift
<b>ADMINISTRATION UNIT</b>	Okefenokee NWR	<b>FORECAST #</b>	59
<b>WEATHER SUMMARY:</b>			
Mostly sunny. Minimum humidity 28-32%. Maximum temperatures 90 to 95 degrees. Light and variable winds in the morning becoming east southeast and increasing to 6 to 10 mph with gusts to 15 mph in the afternoon. See attached Fire Weather Forecast.			
<b>GENERAL FIRE BEHAVIOR: Day Shift</b>			
	<b>Swamp Fuels</b>	<b>Upland Pine</b>	
Flame Length (feet)	14	6	
Rate of Spread (ch/hr)	42	23	
Spotting Distance (miles)	0.3	0.3	
Probability of Ignition (%)	45	59	
<b>SPECIFIC FIRE BEHAVIOR:</b>			
<p><b>All Divisions: The next <u>three days</u> will be critical, especially if seas breeze winds are sustained over 10 mph and humidity dips below 25%. Any breakouts or new IA in unburned fuels will exhibit significant fire behavior.</b> The predicted rates of spread and flame lengths are based on an established fire on higher ground with max wind speeds in the warmest and driest period of the day. The most active remaining portion of the fire will be in bay fuels, which will continue smoldering in roots and muck soils. Expect increasing ground fire behavior in Divisions WE and WF with more smoldering in machine piles, stumps and duff. Please alert the FBAN if open flame is detected, especially along a contiguous front.</p> <p>In areas where pine litter is reburning, the needle cast is modeled at 3-4 ch/hr with 1½ foot flame lengths. Reburn flame lengths could be higher in the presence of preheated shrub fuels.</p> <p><b>Structure:</b> Okefenokee administrative site should not be impacted by fire spread during this operational period.</p> <p><b>IA:</b> Expect moderate fire behavior today on any new starts outside of the main fire perimeter, especially when in the presence of a stronger sea breeze. Holdover lightning starts may be detected within the incident initial response area. Also, watch for reburn in recently dropped pine litter, particularly on the drier north end of the fire.</p>			
<b>AIR OPERATIONS:</b>			
No restrictions after 0900.			
<b>SAFETY:</b>			
Watch out for reburn potential in both needlecast and preheated shrub layer. Maintain situational awareness around snags, especially when wind speeds increase. Don't become complacent during the mop-up phase in slow-moving fuels. The situation could change dramatically, in the event of IA or a slopover.			
<b>Predicted ERC for today is 39... 90<sup>th</sup> percentile is 35.</b>			

/s/ Michael S. Beasley

# **Safety Message**

## **Big Turnaround Complex**

**June 17, 2007**

Wildlife is returning to the fire area. Use care when driving to and from the fire. Bear cubs have been sighted on the western divisions. Also apparently we share a couple of dip and fill sites with some alligators.

Hazard trees are still a concern. I identify and mitigate hazard trees. If mitigation is not possible, DO NOT work in the area.

**RE-EVALUATE YOUR CONTINGENCY PLANS, ENSURE EVERYONE KNOWS WHERE ESCAPE ROUTES AND SAFETY ZONES ARE!**

### **Communication Responsibilities**

- Brief others as needed
- Debrief your actions
- Communicate hazards to others
- Acknowledge messages
- Ask if you don't know

**Look Up, Down, and Around** - review the seven Fire Environment Factors in your I.R.P.G., pages 2 and 3.

## **Happy Father's Day**

**GA-OKR-007021**  
**Okefenokee Wildlife Refuge**  
**California Interagency Fire Use Management Team**

Today's discussion is from the Aviation Category.

**Scenarios:**  
[Scenario 1](#)

[Six Minutes Home Page](#)

## AVIATION "WATCH OUT" SITUATIONS

As part of risk management, especially during high activity fires, each aviation manager and employee should be asking questions.

- Is the flight necessary?
- Who is in charge?
- Are all hazards identified and have you made them known?
- Should the operation or the flight be stopped due to a change in conditions? Consider the following:
  - Communications
  - Confusion
  - Personnel
  - Weather
  - Turbulence
  - Conflicting priorities
- Is there a better way to do it?
- Are you driven by the task and sense of urgency?
- Can you justify your actions?
- Are there other aircraft in the area?
- Will the pilot accept the mission?
- Are any guidelines being ignored or policies being broken?
- Are communications getting tense?
- Are you deviating from the assigned operation or flight?

8. Medical Emergency Procedures	
<p>Medical emergencies will be reported to the Division Supervisor. The Division Supervisor will assume command and call for the closest line medic, and resources in the division that are EMT qualified. The Division Supervisor will notify communications by radio or cell phone (Big Turnaround ICP 912-496-4175), and on the WEST SIDE of the fire DIV WI WM Z WE WF WH Logistics will also be notified to assist. Communications to notify MEDL @ 904-955-0022 / The report should include type of illness/injury and exact location of the incident. Communications will clear the air for emergency traffic only and will request key personnel to report to communications. If an air medical helicopter is used within the fire perimeter, communications should notify the air operations director and helibase.</p> <p>After 2100 hours emergencies in Kingsland and/or Folkston: after hour contact is night security Allen Neal 606-521-6017. Before 2100 call communications @ 912-496-4175. DO NOT DELAY TREATMENT CALL 911 WHEN LIFE THREATENING. Communications will call MEDL and designated paramedics will be routed to the scene to facilitate transportation or other logistical needs.</p>
