

Big Turnaround Complex

Incident Action Plan

Monday - June 18, 2007

California FUMT - Perkins

“HONORING OUR FALLEN SISTERS AND BROTHERS” NATIONAL FIREFIGHTER SAFETY STAND DOWN

Please take a moment today to remember those who are no longer with us. During your tailgate safety session review and discuss the following topics:

- Driving – policies, guidelines, and attitudes
- Human Factors & Barriers to Situation Awareness and Decision-Making
- Risk Management Process
- Physical and Emotional Wellness

A significant portion of the fire season is still ahead of us. Remember the true measure of a successful fire season is when ALL OF US make it home.

<p style="text-align: center;">INCIDENT OBJECTIVES</p>	<p style="text-align: center;">1 INCIDENT NAME Big Turnaround Complex</p>	<p style="text-align: center;">2. DATE PREPARED 06/17/2007</p>	<p style="text-align: center;">3. TIME PREPARED 1800</p>									
<p>4. OPERATIONAL PERIOD (DATE/TIME) June 18, 2007 0700 – 1900 DAY SHIFT</p>												
<p>5. CORE VALUES – ALL INCIDENTS, ALL THE TIME</p> <ul style="list-style-type: none"> A. Firefighter Safety – Everyone goes home. B. Public Safety – We will be proactive in facilitating safety of affected citizens. C. 100% Effort – We will mindfully engage all missions with our collective expertise. D. Land Stewardship – We will cause no unnecessary resource damage. E. Open Communication – Direct, respectful, and 2 way communications is the key to our success. 												
<p>6. INCIDENT OBJECTIVES / MANAGEMENT EXPECTATIONS</p> <p style="text-align: center;"><u>Management Priorities</u></p> <ul style="list-style-type: none"> 1. Provide for fire fighter and public safety. 2. Minimize the loss or damage to structures, private property, recreations sites, watershed, wildlife habitat, timber lands, and other assets. <p style="text-align: center;"><u>Operational Objectives</u></p> <ul style="list-style-type: none"> 1. Keep fire contained within established containment lines. 2. Implement suppression rehabilitation and repair. 3. Manage new ignitions within Refuge according to WFSA and FMP. 4. Continue monitoring potential fire movement. 												
<p>7. PLAN OF ACTION, STRATEGY AND PRIORITIES</p> <ul style="list-style-type: none"> 1. First priority is to protect the public assets at risk. All available air and ground resources will support the operation when necessary. 2. Second priority will be to effectively assist with initial attack of new fire starts. 3. Third priority will be to continue implementing fire suppression rehabilitation and repair.

Fire Weather Forecast

FORECAST NO: 45

NAME OF FIRE: Big Turnaround Complex

PREDICTION FOR: Day Shift

UNIT: Okefenokee Wildlife Refuge

SHIFT DATE: Monday 06/18/07

SIGNED: Rick Davis/Claire Yeo
Incident Meteorologist/Trainee

TIME AND DATE 1900
FORECAST ISSUED: 06/17/07

WEATHER DISCUSSION: ...Near critical RH for the area...

Surface high pressure is centered off the North Carolina coast ridging across the south Georgia area. This high will become established over the Atlantic with light winds early in the week giving way to light onshore surface south to southeast winds from Monday to Tuesday. By late Tuesday deep layer moisture starts to build ahead of a surface front that resides well north of the area. This frontal system stalls during the week and in combination with upper level southwest flow, a rainband over the region develops from Wednesday through to the weekend.

WEATHER FORECAST MONDAY:

WEATHER: Mostly sunny.

MAX TEMPERATURES: 92 to 98. (24 hour trend = steady)

MIN HUMIDITY: 28 to 32 percent (24 hour trend = steady)

20 FT WINDS: Light and variable winds in the morning then becoming southeast and increasing to 6 to 10 mph with gusts to 15 mph in the afternoon.

STABILITY/INVERSION: Morning smoke and fog lifting around 0900 then smoke drifting northwestward. Mixing heights around 8000 ft.

Dispersion Index 41. LAL 1.

TRANSPORT WINDS: Southeast 10 mph.

WEATHER FORECAST MONDAY NIGHT:

WEATHER: Mostly clear

MIN TEMPERATURES: Low around 70.

MAX HUMIDITY: Recovery near 100 percent.

20 FT WINDS: Southeast 5 to 10 mph through 2000, then becoming light and variable.

STABILITY/INVERSION: Inversion to 300 feet with localized visibilities reduced to a mile or less in fog/smoke after 0200. Dispersion Index 2.

OUTLOOK FOR TUESDAY: Becoming mostly cloudy during the afternoon/evening. Isolated afternoon and evening showers and thunderstorms. High 87 to 92. Minimum humidity 30 to 35 percent. Light winds, becoming south to southeast 5 to 10 mph with gusts to 15 mph in the afternoon. Chance of rain 20 percent.

SUNRISE/SUNSET: Monday June 17...0625/2034

EXTENDED...

Deepening southwest flow is expected to bring increasing moisture, with increased chances for precipitation.

	Wednesday	Thursday	Friday	Saturday
Low	72°	72°	71°	71°
High	87°	88°	88°	90°
Min RH	40-45%	50-55%	50-55%	50-55%

Fire Behavior Forecast

INCIDENT	<i>Big Turnaround Complex</i>	OPERATIONAL PERIOD	06/18/07 Day Shift
ADMINISTRATION UNIT	<i>Okefenokee NWR</i>	FORECAST #	60
WEATHER SUMMARY:			
Mostly sunny. Minimum humidity 28-32%. Maximum temperatures 92 to 98 degrees. Light and variable winds in the morning becoming southeast and increasing to 6 to 10 mph with gusts to 15 mph in the afternoon. See attached Fire Weather Forecast.			
GENERAL FIRE BEHAVIOR: Day Shift			
	Swamp Fuels	Upland Pine	
Flame Length (feet)	14	18	
Rate of Spread (ch/hr)	45	57	
Spotting Distance (miles)	0.3	0.3	
Probability of Ignition (%)	52	69	
SPECIFIC FIRE BEHAVIOR:			
<p>All Divisions: Today is the last critical fire weather day, especially if sea breeze winds are sustained over 10 mph and humidity dips below 25%. Any breakouts or new IA in unburned fuels will exhibit significant fire behavior, including crown fire behavior. The predicted rates of spread and flame lengths are based on an established fire on higher ground with max wind speeds in the warmest and driest period of the day. The most active remaining portion of the fire will be in bay fuels, which will continue smoldering in duff and roots over muck soils. Expect increasing ground fire behavior and reburns with isolated torching in Divisions WE and WF with increased smoldering and creeping in machine piles, stumps and duff. Please alert the FBAN if open flame is detected, especially along a contiguous front. In areas where pine litter is reburning, the needle cast is modeled at 3-4 ch/hr with 1½ foot flame lengths. Reburn flame lengths could be higher in the presence of preheated aerial fuels.</p> <p>Structure: Okefenokee administrative site should not be impacted by fire spread during this operational period.</p> <p>IA: Expect significant fire behavior today on any new starts outside of the main fire perimeter, especially when in the presence of a stronger sea breeze. Holdover lightning starts may be detected within the incident initial response area. Also, watch for reburn in recently dropped pine litter, particularly on the drier north end of the fire.</p>			
AIR OPERATIONS:			
No restrictions after 0900.			
SAFETY:			
Watch out for reburn potential in both needlecast and preheated shrub layer. Maintain situational awareness around snags, especially when wind speeds increase. Don't become complacent during the mop-up phase in slow-moving fuels. The situation could change dramatically, in the event of IA or a slopover.			
Predicted ERC for today is 38... 90th percentile is 35.			

/s/ Michael S. Beasley

[Six Minutes Home Page](#)

PROPER USE OF TRIGGER POINTS

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of firefighters. Keeping an eye out for the 18-Watchout Situations and establishing operational / environmental limits ("trigger points") ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision makers, but serve as predetermined cues to prompt you to re-evaluate the situation and associated risks, and help you to determine and implement the proper course of action.

- Preplan! Don't wait until you're in the wrong place at the wrong time---with no time.
- Trigger points should be based on measurable factors such as:
 - RH
 - Winds
 - Fire Behavior
 - Topographical boundaries
 - Time constraints/Time of day
 - Time/distance to safety zones
 - Loss of support resources (airtankers, helicopters, etc.)
 - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, etc.)
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is appropriate. (See the Incident Response Pocket Guide)
 - Gather information to assure good Situational Awareness
 - Assess hazards to anticipate serious risks
 - Establish hazard controls to mitigate serious risks
 - Make decisions based on your ability to mitigate those serious risks
 - Evaluate effectiveness of current actions
- Command/Leadership responsibilities when changing tactics
 - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command
 - Account for all your people
 - Make sure everyone knows and follows the new plan

8. Medical Emergency Procedures	
<p>Medical emergencies will be reported to the Division Supervisor. The Division Supervisor will assume command and call for the closest line medic, and resources in the division that are EMT qualified. The Division Supervisor will notify communications by radio or cell phone (Big Turnaround ICP 912-496-4175), and on the WEST SIDE of the fire DIV WI WM Z WE WF WH Logistics will also be notified to assist. Communications to notify MEDL @ 904-955-0022 / The report should include type of illness/injury and exact location of the incident. Communications will clear the air for emergency traffic only and will request key personnel to report to communications. If an air medical helicopter is used within the fire perimeter, communications should notify the air operations director and helibase.</p> <p>After 2100 hours emergencies in Kingsland and/or Folkston: after hour contact is night security Allen Neal 606-521-6017. Before 2100 call communications @ 912-496-4175. DO NOT DELAY TREATMENT CALL 911 WHEN LIFE THREATENING. Communications will call MEDL and designated paramedics will be routed to the scene to facilitate transportation or other logistical needs.</p>
