

Big Turnaround Complex

Incident Action Plan TUESDAY/WEDNESDAY June 19-20, 2007 California FUMT— Perkins

Happy Father's Day

<p style="text-align: center;">INCIDENT OBJECTIVES</p>	<p style="text-align: center;">1 INCIDENT NAME Big Turnaround Complex</p>	<p style="text-align: center;">2. DATE PREPARED 06/18/2007</p>	<p style="text-align: center;">3. TIME PREPARED 1800</p>									
<p>4. OPERATIONAL PERIOD (DATE/TIME) June 19-20, 2007 0700 – 1900 DAY SHIFT</p>												
<p>5. CORE VALUES – ALL INCIDENTS, ALL THE TIME</p> <ul style="list-style-type: none"> A. Firefighter Safety – Everyone goes home. B. Public Safety – We will be proactive in facilitating safety of affected citizens. C. 100% Effort – We will mindfully engage all missions with our collective expertise. D. Land Stewardship – We will cause no unnecessary resource damage. E. Open Communication – Direct, respectful, and 2 way communications is the key to our success. 												
<p>6. INCIDENT OBJECTIVES / MANAGEMENT EXPECTATIONS</p> <p style="text-align: center;"><u>Management Priorities</u></p> <ul style="list-style-type: none"> 1. Provide for fire fighter and public safety. 2. Minimize the loss or damage to structures, private property, recreations sites, watershed, wildlife habitat, timber lands, and other assets. <p style="text-align: center;"><u>Operational Objectives</u></p> <ul style="list-style-type: none"> 1. Keep fire contained within established containment lines. 2. Implement suppression rehabilitation and repair. 3. Manage new ignitions within Refuge according to WFSA and FMP. 4. Continue monitoring potential fire movement. 												
<p>7. PLAN OF ACTION, STRATEGY AND PRIORITIES</p> <ul style="list-style-type: none"> 1. First priority is to protect the public assets at risk. All available air and ground resources will support the operation when necessary. 2. Second priority will be to effectively assist with initial attack of new fire starts. 3. Third priority will be to continue implementing fire suppression rehabilitation and repair.

Fire Weather Forecast

FORECAST NO: 46

NAME OF FIRE: Big Turnaround Complex

PREDICTION FOR: Day Shift

UNIT: Okefenokee Wildlife Refuge

SHIFT DATE: Tuesday/Wednesday 06/19-06/20/07

SIGNED: Rick Davis/Claire Yeo
Incident Meteorologist/Trainee

TIME AND DATE 1900

FORECAST ISSUED: 06/18/07

WEATHER DISCUSSION:

Deep layer moisture starts to build ahead of a surface front that resides north of the area. This frontal system stalls during the week and in combination with upper level southwest flow, showers and possibly strong thunderstorms tending to rain areas develop Tuesday and will continue through to the midweek.

WEATHER FORECAST TUESDAY AND TUESDAY NIGHT:

WEATHER: Becoming mostly cloudy. Scattered showers and thunderstorms developing during the afternoon and evening. Chance of rain 50 percent in day, 30 percent at night.

TEMPERATURES: **MAX** 87 to 92. (24 hour trend = down 3 degrees) **MIN** around 72.

HUMIDITY: **MIN** around 40 percent (24 hour trend = up 10-15 percent) **MAX** near 100 percent.

20 FT WINDS: **DAY** Light and variable winds in the morning then becoming south to southwest and increasing to 5 to 10 mph with gusts to 15 mph in the afternoon. **NIGHT** Light southwest

STABILITY/INVERSION: **DAY** Morning smoke and fog lifting around 0900 then smoke drifting north. Increasing instability through day. Mixing heights around 6000 ft. Dispersion Index 38. **NIGHT** Inversion to 500 feet with localized visibilities reduced to a mile or less in fog/smoke after 0200. Dispersion Index 3.

TRANSPORT WINDS: **DAY** Southwest 12-14 mph. **LAL** 3.

WEATHER FORECAST WEDNESDAY AND WEDNESDAY NIGHT:

WEATHER: Cloudy with showers and thunderstorms likely, some storms may be strong to severe. Chance of rain 70 percent in day, 40 percent at night.

TEMPERATURES: **MAX** 85 to 90. (24 hour trend = down 2 degrees) **MIN** around 73.

HUMIDITY: **MIN** around 50 %.(24 hour trend = up 10 percent) **MAX** near 100 percent.

20 FT WINDS: **DAY** Light southwest winds increasing to 5 to 10 mph with gusts to 15 mph later in the morning. **NIGHT** Light southwest

STABILITY/INVERSION: **DAY** Mixing heights increasing to around 4500 ft. Dispersion Index 25. **NIGHT** Inversion to 500 feet with localized visibilities reduced to a mile or less in fog/smoke after 0200. Dispersion Index 3.

TRANSPORT WINDS: **DAY** Southwest 14-16 mph. **LAL** 4.

SUNRISE/SUNSET: Tuesday June 18...0625/2034 Wednesday June 19...0625/2034

EXTENDED...

Deep moisture remains over the region with near normal conditions expected to end the week then slightly drier and warmer conditions over the weekend.

	Thursday	Friday	Saturday	Sunday
Low	72°	71°	71°	70°
High	90°	91°	92°	94°

Fire Behavior Forecast

INCIDENT	<i>Big Turnaround Complex</i>	OPERATIONAL PERIOD	06/19-20/07 Day Shift	
ADMINISTRATION UNIT	<i>Okefenokee NWR</i>	FORECAST #	61	
WEATHER SUMMARY:				
<p><u>Tuesday:</u> Scattered showers & t-storms in the afternoon & evening. Minimum humidity 40%. Maximum temperatures 87 to 92 degrees. Light and variable winds in the morning becoming south to southwest and increasing to 6 to 10 mph with gusts to 15 mph in the afternoon.</p> <p><u>Wednesday:</u> Showers and thunderstorms, some strong to severe. Minimum humidity 50-55%. Maximum temperatures 85 to 90 degrees. Winds south to southwest 5 -10 mph with gusts to 15 mph. See attached Fire Weather Forecast.</p>				
GENERAL FIRE BEHAVIOR: Tuesday Day Shift				
	Tuesday	Wednesday	Tuesday	Wednesday
	Swamp Fuels	Swamp Fuels	Upland Pine	Upland Pine
Flame Length (feet)	12	4	6	5
Rate of Spread (ch/hr)	40	15	21	17
Spotting Distance (miles)	0.3	0.3	0.3	0.3
Probability of Ignition (%)	44	23	58	23
SPECIFIC FIRE BEHAVIOR:				
<p>All Divisions: The predicted rates of spread and flame lengths above are based on an established fire on higher ground with max wind speeds in the warmest and driest period of the day, prior to any precipitation on Tuesday and outside the current fire perimeter. The most active remaining portion of the fire will be in bay fuels, which will continue smoldering in duff and roots over muck soils. After moisture is received, expect only smoldering and creeping fire behavior in Divisions WE and WF. Reburn risk on Tuesday & Wednesday should be minimal, due to high humidity.</p> <p>Structure: Okefenokee administrative site should not be impacted by fire spread during this operational period.</p> <p>IA: Expect moderate fire behavior on Tuesday and minimal fire behavior on Wednesday with any new starts outside of the main fire. Thunderstorm downdrafts may accelerate any established fire. Lightning activity today and tomorrow may ignite new fires.</p>				
AIR OPERATIONS:				
No restrictions after 0900.				
SAFETY:				
Maintain situational awareness around snags, especially when wind speeds increase. Practice the 30/30 rule around thunderstorms to prevent exposure to lightning (see pg. 75 of the IRPG)				
Predicted ERC for today is 32 and below 30 for Wednesday... 90th percentile is 35.

Safety Message

Big Turnaround Complex

June 19-20, 2007

Severe Weather – potential for lightning, high winds, rain, and possibly hail. In your IRPG review Hazard Tree Safety, pg. 80 and Thunderstorm Safety, pg. 74.

Driving – if we get the predicted rains the roads will become impassable in areas. When the rain starts falling have a plan. Seeing more and more public out on the Perimeter Road checking things out, continue looking out for the other driver.

Communications – implement recommendations from Com Unit to resolve Commo problems on Westside of the Incident. Identify deadspots, provide feedback to the Comm Unit.

Initial Attack – remember our IA responsibilities. Ensure LCES is in place before beginning operational tactics.

GA-OKR-007021
Okefenokee Wildlife Refuge
California Interagency Fire Use Management Team

Entrapment Avoidance

Scenario

[Six Minutes Home](#) > [NIFC Home](#)

You are a crew member on a crew on a wildfire building line along the flank of a fire. Suddenly, your crew boss directs the crew to use the escape route and move to the designated Safety Zone. Upon arrival at the Safety Zone the crew boss directs the crew to begin to prepare to deploy their shelters.

What Are The Critical Issues

Avoiding situations where firefighters become entrapped is the first concern when devising strategy and tactics. The following discussion points are among the things that should be considered.

Critical Safety Measures

Review how LCES relates to the 10 Standard Fire Orders.

Discuss safety zone, entrapment, and deployment area.

- Safety zone - a preplanned area of sufficient size and suitable location that is expected to prevent injury to fire to firefighters from known hazards without using fire shelters
- Entrapment - when a firefighter is trapped between the oncoming fire and a safety zone, causing burnover with or without a fire shelter deployment
- Deployment area - a selected topographical site that must be used when retreat to a safety zone is cut off by fire, has little or no fuel to cause flame impingement on the fire shelter, which will disintegrate it

Discuss escape routes.

- Escape route - the travel route or path that provides the safety margin allowing the firefighter a retreat to the safety zone before the flame front overtakes the firefighter
- Have multiple escape routes in case of cut off
- Scout and personally observe hazards (e.g., cliffs, loose soils, rocks, vegetation, steep slopes, etc.).
- Precut escape lanes to safety zones.
- Use predicted fire behavior to assess impact on escape routes.
- Time your escape routes before needing to actually use them. Account for slowest firefighters and or equipment. Know your escape time.
- Clearly mark escapes routes.
- Do not locate escape routes near chimneys, saddles, narrow canyons or box canyons.

8. Medical Emergency Procedures	
<p>Medical emergencies will be reported to the Division Supervisor. The Division Supervisor will assume command and call for the closest line medic, and resources in the division that are EMT qualified. The Division Supervisor will notify communications by radio or cell phone (Big Turnaround ICP 912-496-4175), and on the WEST SIDE of the fire DIV WI WM Z WE WF WH Logistics will also be notified to assist. Communications to notify MEDL @ 904-955-0022 / The report should include type of illness/injury and exact location of the incident. Communications will clear the air for emergency traffic only and will request key personnel to report to communications. If an air medical helicopter is used within the fire perimeter, communications should notify the air operations director and helibase.</p> <p>After 2100 hours emergencies in Kingsland and/or Folkston: after hour contact is night security Allen Neal 606-521-6017. Before 2100 call communications @ 912-496-4175. DO NOT DELAY TREATMENT CALL 911 WHEN LIFE THREATENING. Communications will call MEDL and designated paramedics will be routed to the scene to facilitate transportation or other logistical needs.</p>
