

Sweat Farm Fire *Incident Action Plan* *Tuesday*

June 12, 2007

All Operational Periods

<http://www.wffoundation.org>

GEMA

INCIDENT OBJECTIVES	1. Incident Name Sweat Farm and Bugaboo Fires	2. Date Prepared 6/11/07	3. Time Prepared 1830
4. Operational Period 06/12/2007 All Operational Periods			
5. General Control Objectives For The Incident (Include Alternatives)			
<ol style="list-style-type: none"> 1. Provide for the safety of the public and assigned incident resources through effective hazard / risk assessment and mitigation. 2. Provide timely and accurate information updates to the GFC, cooperators, affected communities, and other stakeholders. 3. Provide accurate cost accountability and documentation of expenditures for the duration of the incident. 4. Develop and maintain coordination with local fire departments, local EOC directors, GEMA, other IMT's deployed in the area, GOAL, and private industry. 5. Provide support on fires as requested by Georgia GFC District 8 and District 10. 6. Conduct all incident activities in a manner free of discrimination, harassment, and inappropriate behavior. 7. Keep the Sweat Farm Road, Kneeknocker, and Roundabout fires contained within the current established perimeters. 8. Assist with identifying and mitigating Emergency & Temporary Repairs. 			
6. Weather Forecast For Period			
WEATHER: Variable cloudiness. Showers and thunderstorms likely, especially after 1300. Some storms could contain hail and strong wind gusts. Chance of measurable rain 60%.			
MAX TEMPERATURES: 84-88 (24 hour trend: 10 degrees colder)			
MIN HUMIDITY: 48 to 53% (24 hour trend: 12% higher)			
20 FT WINDS: East winds 3-5 mph through 1000, then East-northeast 5-10 mph, with gusts up to 20 mph. Becoming east 5 to 10 mph, with gusts up to 20 mph around 1800.			
STABILITY/INVERSION: Mixing heights near 5000 ft. Afternoon Dispersion index 32. Haines Index 4 (Low). Transport winds SE 8 mph through 1000, the becoming E 9-12 mph.			
	Sweat Farm Rd.	Bugaboo Scrub II	Roundabout
<i>Max Temperature:</i>	85-88°	84-87°	85-88°
<i>Min Humidity:</i>	48-51%	50-53%	48-51%
<i>Seabreeze Passage:</i>	N/A	N/A	N/A

Fire Behavior Forecast

INCIDENT	<i>Big Turnaround Complex</i>	OPERATIONAL PERIOD	06/12/07 Day
ADMINISTRATION UNIT	<i>Okefenokee NWR</i>	FORECAST #	54

WEATHER SUMMARY:

Mostly cloudy with showers and thunderstorms likely. Chance of rain 50%. Minimum humidity 50-55%. Winds becoming east-northeast 6-10 with gusts to 15 in the afternoon. See attached Fire Weather Forecast.

GENERAL FIRE BEHAVIOR: Day Shift

	Swamp Fuels	Upland Pine
Flame Length (feet)	12	6
Rate of Spread (ch/hr)	17	17
Spotting Distance (miles)	0.3	0.3
Probability of Ignition (%)	31	36

SPECIFIC FIRE BEHAVIOR:

All Divisions: Overall, fire behavior should be significantly reduced from yesterday with cooler, moister conditions. That obviously lessens any threats to the line and makes control easier on initial attack... although 6-foot flame lengths are still predicted for pine stands. It will also, however, make it harder to root out the lingering heat that may cause problems later. Least affected by the change in weather will be ground fire in the bay fuels which will continue to smolder. Remember, fire behavior predictions are based on generalized fuel moistures which are hooked to higher humidities and area precipitation..... some areas may burn more vigorously before increasingly widespread rain coverage.

Structure: Okefenokee administrative site should not be impacted by fire spread during this operational period.

IA: Expect moderate to active fire behavior once fires become established.

AIR OPERATIONS:

No restrictions after 0900.

SAFETY:

With another round of lightning yesterday, there's a good chance for new starts... as you work in one area, be alert for fire from another.

Predicted ERC for today is 38... 90th percentile is 35.

☐ SAFETY MESSAGE

Incident:

Sweat Farm

Date:

June 12, 2007

Time:

Day

Major Hazards and Risks:

- **Weather**
- **Downed Power Lines**
- **Driving**
- **Work around Air Operations**
- **PPE / Sanitation**

Weather – There is a chance of thunder storms today with the possibility of excessive lightning. Use the 30/30 rule. See the IRPG Statement below left. **Monitor Command Repeater for Weather Updates**

Downed Power Lines – Treat all downed power lines as if they were live wires. There is potential that they are, they can have back feed from a generator or power supply.

Driving - Use caution while driving on wet roads. Watch for standing water on roadway it could cause you to hydroplane. Do not cross flooded roads, the road may be washed out.

Working around Air Operations – Heads up when aircraft are working in your area. Stay clear of retardant and water drops. If around Dip Sites give aircraft room to operate with a clear approach and departure path.

PPE – Insure All personnel on fireline have all Fire PPE. ATV operations require hardhat w/chin strap or helmet, long sleeve Nomex shirt. Never operate beyond operators capabilities, remember ATV’s can overturn on flat ground.

Sanitation – Keep yourself clean, Dirt on the skin can block pores which can cause you to over heat. So take a bath and use soap and water to clean your skin. Also dirty clothing decreases the protection of the garment.

Thunderstorm Safety

Approaching thunderstorms may be noted by a sudden reverse in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature. Rain, hail, and lightning occur only in the mature stage of a thunderstorm.

Observe the 30/30 rule: a) If you see lightning and hear thunderclaps within 30 seconds take storm counter-measures identified below. b) Do not resume work in exposed areas until 30 minutes after storm activity has passed.

- Take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, wire fences, utility lines and other elevated conductive objects. Make sure the place you pick is not subject to flooding.
- If in the woods, move to an area with shorter trees.
- If only isolated trees are nearby, keep your distance twice the tree height.
- If in open country, crouch low minimizing contact with the ground. You can use a pack to sit on, but never lay on the ground.
- If you feel your skin tingle or your hair stand on end, immediately crouch low to the ground. Make yourself the smallest possible target and minimize your contact with the ground.
- Don't group together.
- Don't stay on ridgetops, in wide open areas, near ledges or rock outcroppings.
- Don't operate land line telephones, machinery, or electric motors.
- Don't handle flammable materials in open containers or metal handtools.

WE CAN ORDER MORE! DRINK MORE

Safety Officers: Mark Munns, John Godwin, Julian Beasley, Tommy Hawkins, Shelby Charlie, Jerry Domgrouske, Robert Grossard, Don Ranne, Phil Spor, Pete Stewart, Charles Wood.

INCIDENT ACTION PLAN SAFETY ANALYSIS										1. Incident Name Sweat Farm & Roundabout Fires		2. Date 6/11/2007		3. Time Day Shift								
LCES* Analysis of Tactical Applications Lookouts Communications Escape routes Safety zones										Other Risk Analysis												
Branch	Indirect Fireline	Burn out Operations	Power lines	Road Conditions	Frontal Assault	Anchor Points	Extreme Conditions	Reburn Potential	Snags	Insects, snakes	LCES Mitigations						Other Risk Mitigations					
Sweat Farm	1, 3, 4, 5, 7, 8, 10	1, 3, 4, 5, 6, 8, 10, 13, 37	15	12, 20, 29	1, 3, 4, 5, 7, 8, 24, 29	8	1, 6, 7, 8, 10	1, 3, 5, 7	6	2	1. Establish & maintain LCES. Report LCES checks twice daily to DIVS on line & staggng.						18. Take plenty rest breaks and encourage to drink water NOW through briefings. 19. Watch out for complacency and fatigue. 8. Utilize Fire Departments for structure protection. Tailgate briefings on WUI hazards. 20. Defensive driving will be addressed in all briefings. 21. All personnel must meet the 2:1 work/rest ratio. Line supervisors and Safety will monitor closely.					
											2. Look UP, DOWN and AROUND - Use protective spray with deet on skin (Not on Nomex), permethrin can be used on nomex clothing. Do Not try to catch or kill snakes!											
											3. Post experienced Lookouts. Make sure LCES is in place and make known.											
											4. Use Air Attack as Lookout.											
Roundabout Fire				12, 20				1, 3, 5, 7	6	2	5. Flag escape routes on right side of escape route facing outward. Create new escape routes as you progress. Maintain LCES at all times.						22. Notify EOC of need to close CSX track adjacent track to ensure safety of firefighters due to excessive smoke or fire activity. 23. Recongnize, Communicate & Avoid Hazmat situations. 24. Line Supervisors will provide clear, concise briefings. 25. Review Structural "Watch Out" situations.					
											6. Post lookout for Snags, Runs, and Spot Fires.											
											7. FBA/Metereoroligist to develop weather watch system.											
											.8 Ensure Fireline is Anchored.											
											9. All Firefighters must review current weather, predicted weather & fire behavior forecast.						26. Ensure Traffic Planning is safe and enforced. Heed Defensive Driving techniques noted in Safety Messages. 27. Avoid trash dumps in line construction & avoid smoke from dumps 28. Relocate staggng area when driving conditions warrant. 29. Air Attack and/or lead plane will always be in the air to coordinate aircraft.					
											10. Keep Firefighters informed of any changes in predicted weather, consider at least a two day weather pattern when planning burnout operations.											
											11. Refer to IRPG, pg. 12 on Power Line Hazards.											
											12. Observe all traffic signals and speed limits.											
											13. Ensure any burnout operations have been clearly communicated to ALL, prior to burning.						30. Personnel on ground will stay out of drop zones. 31. Use spotter when backing vehicle(s). 32. Use bandanna to filter smoke in heavy smoke areas.					
											14. Ensure GOOD tailgate briefings with resources unable to attend Operational Briefing (Include Ops, Logs, Fin & Plans info.).											
											15. Scout ahead of tractor operations to avoid making contact with power poles and guide wires when tying into roads. Power companies are working in some DIVS, avoid all down lines as they may become charged.

Human Resource Message

**"Personal Hygiene - Cleanliness is next to Incident
Commanderliness"**

Appropriate personal hygiene is essential to avoid falling ill or passing germs on to others. Proper personal hygiene is also a courtesy that should be shown to fellow co-workers. In these hot conditions that we are working in, it takes no time for any of us to work up a sweat and begin to develop a not so nice odor! Please be courteous to both your body and your co-workers by taking daily showers to maintain good personal hygiene! Thanks!

**Sherri Cummings
HRSP (T)
