

# Sweat Farm Fire

## *Incident Action Plan*

### Wednesday

June 13, 2007

### All Operational Periods

**GEMA**

<b>INCIDENT OBJECTIVES</b>	1. Incident Name Sweat Farm and Bugaboo Fires	2. Date Prepared 6/12/07	3. Time Prepared 1830
4. Operational Period <b>06/13/2007 All Operational Periods</b>			
5. General Control Objectives For The Incident (Include Alternatives)			
<ol style="list-style-type: none"> <li>1. Provide for the safety of the public and assigned incident resources through effective hazard / risk assessment and mitigation.</li> <li>2. Provide timely and accurate information updates to the GFC, cooperators, affected communities, and other stakeholders.</li> <li>3. Provide accurate cost accountability and documentation of expenditures for the duration of the incident.</li> <li>4. Develop and maintain coordination with local fire departments, local EOC directors, GEMA, other IMT's deployed in the area, GOAL, and private industry.</li> <li>5. Provide support on fires as requested by Georgia GFC District 8 and District 10.</li> <li>6. Conduct all incident activities in a manner free of discrimination, harassment, and inappropriate behavior.</li> <li>7. Keep the Sweat Farm Road, Kneeknocker, and Roundabout fires contained within the current established perimeters.</li> <li>8. Assist with identifying and mitigating Emergency &amp; Temporary Repairs.</li> </ol>			
6. Weather Forecast For Period			
<b>WEATHER:</b> Variable cloudiness. A good chance of showers and thunderstorms, mainly in the afternoon. Chance of measurable rain 50%.			
<b>MAX TEMPERATURES:</b> 84-88 (24 hour trend: 5 degrees warmer)			
<b>MIN HUMIDITY:</b> 40 to 45% (24 hour trend: 10% lower)			
<b>20 FT WINDS:</b> Northeast winds 3-8 through 1000, then East 5-10 mph, with gusts up to 15 mph. Becoming East-southeast 5 to 10 mph, with gusts up to 20 mph around 1600.			
<b>STABILITY/INVERSION:</b> Mixing heights near 7000 ft. Afternoon Dispersion index 40. Haines Index 4 (Low). Transport winds E 9-13. Nocturnal inversion lifting and dissipating around 1000.			
<b>LAL:</b> 3			
	<b>Sweat Farm Rd.</b>	<b>Bugaboo Scrub II</b>	<b>Roundabout</b>
<i>Max Temperature:</i>	85-88°	84-87°	85-88°
<i>Min Humidity:</i>	42-45%	42-45%	40-43%
<i>Seabreeze Passage:</i>	1630	1600	1630

## Human Resource Message

### "Work Smarter"

'Work smarter, not harder,' the saying goes. Here on the incident, working smarter includes encouraging one another in our individual assignments, maintaining the collective energy and focus of the team, and supporting each other in times of adversity, challenge and change. Remember that we are all here for a common purpose and each of us is making a valuable contribution to our mission. Today, *work smarter* and have a great day!

Please contact me if you have any HR-related questions or concerns.

Sherri Cummings  
Human Resource Specialist

**☐ WEATHER FORECAST**

**FORECAST NO:** 55

**PREDICTION FOR:** Day Ops

**SHIFT DATE:** Wednesday 06/13/07

**TIME AND DATE**

**FORECAST ISSUED:** 1900 hours 06/12/07

**NAME OF FIRE:** Sweat Farm/Roundabout

**UNIT:** Georgia Forestry Commission

**SIGNED:** *Jan Pelton*

**Incident Meteorologist**

**WEATHER DISCUSSION:** Disturbances rotating through an upper level trough should combine with daytime heating and a relatively moist airmass to produce scattered showers and thunderstorms today and again on Thursday. In addition, afternoon seabreezes should help focus shower and thunderstorm chances through Friday. However, the trough will lift out of the area to end the week, with an upper level ridge building back in for the weekend. This should result in hot, humid weather, with minimal chances for precipitation.

**The Main Concern is: Lighting potential.**

**WEATHER FORECAST DAY SHIFT WEDNESDAY:** (See table for specific incident forecasts )

**WEATHER:** Variable cloudiness. A good chance of showers and thunderstorms, mainly in the afternoon.

Chance of measurable rain 50%.

**MAX TEMPERATURES:** 84-88 (24 hour trend: 5 degrees warmer)

**MIN HUMIDITY:** 40 to 45% (24 hour trend: 10% lower)

**20 FT WINDS:** Northeast winds 3-8 through 1000, then East 5-10 mph, with gusts up to 15 mph. Becoming East-southeast 5 to 10 mph, with gusts up to 20 mph around 1600.

**STABILITY/INVERSION:** Mixing heights near 7000 ft. Afternoon Dispersion index 40. Haines Index 4 (Low). Transport winds E 9-13. Nocturnal inversion lifting and dissipating around 1000.

**LAL:** 3

	Sweat Farm Rd.	Bugaboo Scrub II	Roundabout
Max Temperature:	85-88°	84-87°	85-88°
Min Humidity:	42-45%	42-45%	40-43%
Seabreeze Passage:	1630	1600	1630

**WEATHER FORECAST FOR WEDNESDAY NIGHT:**

**WEATHER:** Variable cloudiness with isolated showers and thunderstorms, mainly early. Chance of measurable rain 20%.

**MIN TEMPERATURES:** 65-68

**MAX HUMIDITY:** 95-100%

**20 FT WINDS:** East 2 to 4 mph.

**STABILITY/INVERSION:** A nocturnal low level inversion is expected around 500 feet, with localized visibilities of a mile or less in fog/smoke after 0100. Smoke drift W. Dispersion 2.

**OUTLOOK FOR THURSDAY:**

Partly to mostly cloudy. A 40 percent chance for mainly afternoon showers and thunderstorms. Highs 85-88. NE winds 3 to 5 mph, becoming East 5 to 10 mph, with gusts up to 15 mph. Min RH 40 to 45%. Mixing Height 7000 feet, dispersion index 25, transport winds NE 5 mph, becoming E 7-10 mph.

**☐ FIRE BEHAVIOR June 13, 2007**

**Vicky Edge, FBAN**

**\*\*TODAY'S FIRE BEHAVIOR WILL BE LOW\*\***

Overall, fire behavior will be low today after receiving 1 + inches of rain. Divisions WW, WY, WX, WF, WS & WG where burnout operations took place showed cooler on IR flight. Direct attack with Dozer/Tractor Plows will be effective today and with production constraints.

**Ease 3-5 mph through 1000, increasing with gust to 15mph. When Sea-breeze passes @1800 winds will become more SE.**

**RH – 42% to 45% / Temp - 85 to 88**

**Rates of Spread – Fuel Model 4 ( heavy shrub) ROS - 13 – 30 ft/min / Flame lengths – 5’ to 13’**

**Fuel Model 7 (Southern Rough) ROS - 13 to 20 ft/min / Flame lengths – 4’ to 6’**

**Probability of Ignition: 43% / KBDI: 371**

**Mixing heights today will push 6000’**

**SAFTEY:** During this time monitor and patrol lines for breaches that might cause problems when drying conditions return.

**SAFETY MESSAGE**

Incident:  
Sweat Farm

Date:  
June 13, 2007

Time:  
Day

**Major Hazards and Risks:**

- Weather
- Complacency
- Driving
- Winch Operations
- Unfamiliar with assigned area

**Weather** – There is a chance of thunder storms today with possibility of lighting. Use the 30/30 rule.

**Complacency** – Don't get complacent, be aware of your surroundings. Look up, look down, look all around.

**Driving** - Use caution while driving on wet roads. Watch for standing water on roadway it could cause you to hydroplane. Do not cross flooded roads, the road may be washed out.

**Winch Operations** – Wet roads means stuck trucks, use caution and proper winch operations

**Unfamiliar with assigned area** – If you get a new assignment, become familiar with your area. Know where your safety zones and escape routes are. Try to tie in with the person you are relieving, to find out as much information about the area as possible.

**Winch Safety**

Winching can be dangerous. There are certain things That should be done and followed, not only for your Safety, but for the safety of others and the environment.

Check your cable, look for frays and kinks in the cable.

Wear your PPE: gloves, eye protection, and hardhat.

Use winch blanket or heavy coat to keep the cable from Flying back towards the operator.

Some items that can help with winch operation: Snatch Blocks will double your pulling power, Tree straps will Help protect the trees from girdling.

**GIVE IT MORE GAS**

**Safety Officers: Mark Munns, John Godwin, Julian Beasley, Tommy Hawkins, Shelby Charlie, Jerry Domgrouske, Robert Grossard, Don Ranne, Phil Spor, Pete Stewart, Charles Wood.**

INCIDENT ACTION PLAN SAFETY ANALYSIS										1. Incident Name Sweat Farm & Roundabout Fires		2. Date 6/13/2007		3. Time Day Shift					
LCES* Analysis of Tactical Applications Lookouts Communications Escape routes Safety zones										Other Risk Analysis									
Branch	Indirect Fireline	Burn out Operations	Power lines	Road Conditions	Frontal Assault	Anchor Points	Extreme Conditions	Reburn Potential	Snags	Insects, snakes	LCES Mitigations	Smoke	Traffic & Railroad	Communications	Structure Protection	Fatigue/Hydration	Multi-aircraft	Other Risk Mitigations	
Sweat Farm	1, 3, 4, 5, 7, 8, 10, 37	1, 3, 4, 5, 6, 8, 10, 13, 37	15	12, 20, 29	1, 3, 4, 5, 7, 8, 24, 29	8	1, 6, 7, 8, 10	1, 3, 5, 7	6	2	1. Establish & maintain LCES. Report LCES checks twice daily to DIVS on line & staggings.	1, 3, 4, 23, 27, 32, 33	20, 26, 28, 31, 33	1, 3, 10, 14	3, 5, 11, 19, 23, 25, 26, 27	18	29	30	18. Take plenty rest breaks and encourage to drink water NOW through briefings.
											2. Look UP, DOWN and AROUND - Use protective spray with deet on skin (Not on Nomex), permethrin can be used on nomex clothing. Do Not try to catch or kill snakes!								19. Watch out for complacency and fatigue. 8. Utilize Fire Departments for structure protection. Tailgate briefings on WUI hazards.
											3. Post experienced Lookouts. Make sure LCES is in place and make known.								20. Defensive driving will be addressed in all briefings.
											4. Use Air Attack as Lookout.								21. All personnel must meet the 2:1 work/rest ratio. Line supervisors and Safety will monitor closely.
Roundabout Fire				12, 20				1, 3, 5, 7	6	2	5. Flag escape routes on right side of escape route facing outward. Create new escape routes as you progress. Maintain LCES at all times.	1, 3, 4, 23, 27, 32, 33	1, 3, 10, 14					22. Notify EOC of need to close CSX track adjacent track to ensure safety of firefighters due to excessive smoke or fire activity.	
											6. Post lookout for Snags, Runs, and Spot Fires.							23. Recongnize, Communicate & Avoid Hazmat situations.	
											7. FBA/Metereorologist to develop weather watch system.							24. Line Supervisors will provide clear, concise briefings.	
											8. Ensure Fireline is Anchored.							25. Review Structural "Watch Out" situations.	
											9. All Firefighters must review current weather, predicted weather & fire behavior forecast.							26. Ensure Traffic Planning is safe and enforced. Heed Defensive Driving techniques noted in Safety Messages.	
											10. Keep Firefighters informed of any changes in predicted weather, consider at least a two day weather pattern when planning burnout operations.							27. Avoid trash dumps in line construction & avoid smoke from dumps	
											11. Refer to IRPG, pg. 12 on Power Line Hazards.							28. Relocate staggings area when driving conditions warrant.	
											12. Observe all traffic signals and speed limits.							29. Air Attack and/or lead plane will always be in the air to coordinate aircraft.	
											13. Ensure any burnout operations have been clearly communicated to ALL, prior to burning.							30. Personnel on ground will stay out of drop zones.	
											14. Ensure GOOD tailgate briefings with resources unable to attend Operational Briefing (Include Ops, Logs, Fin & Plans info.).							31. Use spotter when backing vehicle(s).	
											15. Scout ahead of tractor operations to avoid making contact with power poles and guide wires when tying into roads. Power companies are working in some DIVS, avoid all down lines as they may become charged.							32. Use bandanna to filter smoke in heavy smoke areas.	
										33. ALL vehicles and equipment must have lights on when running. Plastic colverts under some roads have burned and are collapsing under heavy loads, DIVS will coordinate which roads transport and tractors will use. GSP (912) 287-6500 : EMA (912) 287-4499.
