<b>INCIDENT OBJECTIVES</b>	1. Incident Name Sweat Farm and Bugaboo Fires	2. Date Prepared 6/15/07	3. Time Prepared 1830
	4. Operational Period <b>06/16/2007 All Operational Periods</b>		
5. General Control Objectives For The Incident (Include Alternatives)			
1. Provide for the safety of the public and assigned incident resources through effective hazard / risk assessment and mitigation. 2. Provide timely and accurate information updates to the GFC, cooperators, affected communities, and other stakeholders. 3. Provide accurate cost accountability and documentation of expenditures for the duration of the incident. 4. Develop and maintain coordination with local fire departments, local EOC directors, GEMA, other IMT's deployed in the area, GOAL, and private industry. 5. Provide support on fires as requested by Georgia GFC District 8 and District 10. 6. Conduct all incident activities in a manner free of discrimination, harassment, and inappropriate behavior. 7. Keep the Sweat Farm Road, Kneeknocker, and Roundabout fires contained within the current established perimeters. 8. Assist with identifying and mitigating Emergency & Temporary Repairs.			
6. Weather Forecast For Period			
<b>WEATHER:</b> Partly Cloudy. Chance of measurable rain 10%. <b>MAX TEMPERATURES:</b> 89-92 (24 hour trend: Up 1 to 2) <b>MIN HUMIDITY:</b> 30 to 35% (24 hour trend: Steady) <b>20 FT WINDS:</b> Northeast winds 3-8 through 1000, then East 5-10 mph, with gusts up to 15 mph. Becoming East-southeast 5 to 10 mph, with gusts up to 20 mph around 1630. <b>STABILITY/INVERSION:</b> Mixing heights near 6500 ft. Afternoon Dispersion index 55. Haines Index 4 (Low). Transport winds ENE 10-13. Nocturnal inversion lifting and dissipating around 0900. <b>LAL:</b> 2

**☐ WEATHER FORECAST**

**FORECAST NO:** 58

**PREDICTION FOR:** Day Ops

**SHIFT DATE:** Saturday 06/16/07

**TIME AND DATE**

**FORECAST ISSUED:** 1900 hours 06/15/07

**NAME OF FIRE:** Sweat Farm

**UNIT:** Georgia Forestry Commission

**SIGNED:** *Dax Byrd*

**Incident Meteorologist**

**WEATHER DISCUSSION:** Upper level troughing will begin to shift to the east today as strong high pressure builds in. This will result in a hot dry weekend, with minimal chances for precipitation. Moisture will begin to increase over the area on Monday with some isolated thunderstorms, but there will be a significant increase in moisture across the area on Tuesday. With the increase in moisture there will be better chances of wetting rains Tuesday and Wednesday.

**WEATHER FORECAST DAY SHIFT SATURDAY:**

**WEATHER:** Partly Cloudy. Chance of measurable rain 10%.

**MAX TEMPERATURES:** 89-92 (24 hour trend: Up 1 to 2)

**MIN HUMIDITY:** 30 to 35% (24 hour trend: Steady)

**20 FT WINDS:** Northeast winds 3-8 through 1000, then East 5-10 mph, with gusts up to 15 mph. Becoming East-southeast 5 to 10 mph, with gusts up to 20 mph around 1630.

**STABILITY/INVERSION:** Mixing heights near 6500 ft. Afternoon Dispersion index 55. Haines Index 4 (Low). Transport winds ENE 10-13. Nocturnal inversion lifting and dissipating around 0900. **LAL:** 2

**WEATHER FORECAST FOR SATURDAY NIGHT:**

**WEATHER:** Partly cloudy becoming clear overnight.

**MIN TEMPERATURES:** 63-65

**MAX HUMIDITY:** 95-100%

**20 FT WINDS:** East 2 to 4 mph.

**STABILITY/INVERSION:** A nocturnal low level inversion is expected around 300 feet, with localized visibilities of a mile or less in fog after 0100. Smoke drift W. Dispersion 4.

**OUTLOOK FOR SUNDAY:**

Partly cloudy. Highs 92-95. E winds 5 to 10 mph, becoming Southeast 5 to 10 mph, with gusts up to 15 mph. Min RH 28 to 33%. Mixing Height 7500 feet, dispersion index 55, transport winds ESE 6-9 mph.

**Extended Forecast:**

**Monday...**Partly Cloudy with Isolated afternoon Showers and Thunderstorms. Lows 66 to 69. Highs 88 to 91. Min RH 35 to 40%. East winds 5-10 G15 mph.

**Tuesday...**Partly Cloudy with Scattered Showers and Thunderstorms. Lows 68 to 70. Min RH 40 to 45%. Highs 86 to 89. Southwest Winds 5 to 10 G15 mph.

**Wednesday...**Partly Cloudy becoming mostly cloudy with Scattered Showers and Thunderstorms. Lows 67 to 69. Highs 86 to 89. Min RH 40 to 45%. Southwest Winds 5-10 G15 mph.

**EXTRA INFORMATION:**

**Waycross Sun data**

*Sunrise Today :* 625 AM

*Sunset Tonight:* 835 PM

**Friday's Raws Max/Min/Min RH and Precip**

*FWRS-08 Manor:* 95/59/30 .00 Inches

*Waycross RAWs:* 88/65/37 .00 inches

*FWRS-03 Perimeter:* 90/61/35 .00 inches

*FWRS-09 Church:* 92/61/35 .00 inches

Fire Behavior Forecast

<b>INCIDENT</b>	<i>Sweat Farm Rd. Fire</i>	<b>OPERATIONAL PERIOD</b>	06/16/07 Day
<b>ADMINISTRATION UNIT</b>	GA - GAS	<b>FORECAST #58</b>	

**WEATHER SUMMARY:**

A hot dry weekend, with minimal chances for precipitation will continue to dry the fuels. 1 Hour fuels ( grass and pine straw) will dry the quickest.

**GENERAL FIRE BEHAVIOR: Day Shift**

	<b>Swamp Fuels</b>	<b>Upland Pine</b>
Flame Length (feet)	8'	6'
Rate of Spread (ch/hr)	17 - 25	15 - 20
Spotting Distance (miles)	0.3	0.3
Probability of Ignition (%)	20%	20%

**SPECIFIC FIRE BEHAVIOR:**

**All Divisions:** Overall, fire behavior should be low to moderate activity. Smoldering fuels and duff may begin to pick up and open flame may be visible although the flame lengths will be less than 5'. Ground fire in the bay fuels which will continue to smolder. Remember, fire behavior predictions are based on worse case scenario.

\*\*Continue to monitor the fire inside the Refuge as it continues to back into lines at Group/Division WE & WF. Activity picked up yesterday but was not threatening.

**IA:** Expect low to moderate to active fire behavior once fires become established. Should be well within the production rates and flame lengths constraints for dozers and engines.

**AIR OPERATIONS:**

No restrictions after 0900.

**SAFETY:**

Areas of Unburned Fuels Between You And The Fire!

**SAFETY MESSAGE**

Incident:  
Sweat Farm Road

Date:  
June 16, 2007

Time: 1800  
Day 06-15-07

**Major Hazards and Risks:**

- Driving
- Weather
- Mop Up hazards
- Insects/Animals
- Logging Operations

Use the “What If” strategy as you are scanning the road ahead. **Give driving your full attention** and do not let other passengers distract you from driving.

Weather is getting **HOTTER and DRIER** today and tomorrow! Expect more activity over the next two days. Keep drinking plenty of water throughout the day to prevent heat exhaustion.

**Look Up, Down and Around** for snags, reburns, stump holes, hot pockets and other hazards. Be sure to **communicate** these hazards with all. Mitigate the ones you can and report the ones you can't to your Safety Officer.

**If it lives here, it Bites!** Snakes, ticks, alligators, bears, sand gnats and other critters are on the move so watch where you walk and check yourself for ticks daily. **Do Not play with the wildlife!**

**Be aware** of heavy traffic use by log trucks on both dirt & paved roads. Trucks require **higher** speeds on the sandier dirt roads to get through some spots and the best solution is to pull over & allow them to pass.

**R E S P E C T**

**Know your subordinates and look out for their well-being**

- Put the safety of your subordinates above all other objectives.
- Take care of your subordinate's needs.
- Resolve conflicts between individuals on the team.

**Keep your subordinates informed**

- Provide accurate and timely briefings.
- Give the reason (intent) for assignments and tasks.
- Make yourself available to answer questions at appropriate times.

**Build the team**

- Conduct frequent debriefings with the team to identify lessons learned.
- Recognize individual and team accomplishments and reward them appropriately.
- Apply disciplinary measures equally.

**Employ your subordinates in accordance with their capabilities**

- Observe human behavior as well as fire behavior.
- Provide early warning to subordinates of tasks they will be responsible for.
- Consider team experience, fatigue, and physical limitations when accepting assignments.

**Safety Officers:** Mark Munns, John Godwin, Julian Beasley, Tommy Hawkins, Charles Wood, Phil Spor, Harry Kepler & John Bonds

INCIDENT ACTION PLAN SAFETY ANALYSIS										1. Incident Name Sweat Farm & Roundabout Fires		2. Date 6/16/2007		3. Time Day Shift					
LCES* Analysis of Tactical Applications Lookouts Communications Escape routes Safety zones										Other Risk Analysis									
Branch	Indirect Fireline	Burn out Operations	Power lines	Road Conditions	Frontal Assault	Anchor Points	Extreme Conditions	Reburn Potential	Snags	Insects, snakes	LCES Mitigations	Smoke	Traffic & Railroad	Communications	Structure Protection	Fatigue/Hydration	Multi-aircraft	Other Risk Mitigations	
Sweat Farm	1,	1,			1,						1. Establish & maintain LCES. Report LCES checks twice daily to DIVS on line & staggng.	1, 3 4, 20 23, 26 27, 28 32, 31 33, 10 33, 27	20	1, 23 3, 25 10, 26 14, 27	3, 5, 11 19, 23 25, 26 18, 29 21, 30			18. Take plenty rest breaks and encourage to drink water NOW through briefings.	
	3,	3,			3,					2. Look UP,DOWN and AROUND - Use protective spray with deet on skin (Not on Nomex), permethrin can be used on nomex clothing. Do Not try to catch or kill snakes!	19. Watch out for complacency and fatigue. 8. Utilize Fire Departments for structure protection. Tailgate briefings on WUI hazards.								
	4,	4,			4,					3. Post experienced Lookouts. Make sure LCES is in place and make known.	20. Defensive driving will be addressed in all briefings.								
	5,6, 7, 8, 10, 13, 37	5,6, 7, 8, 10, 13, 37			5,6, 7, 8, 10, 13, 37					4. Use Air Attack as Lookout.	21. All personnel must meet the 2:1 work/rest ratio. Line supervisors and Safety will monitor closely.								
											5. Flag escape routes on right side of escape route facing outward. Create new escape routes as you progress. Maintain LCES at all times.							22. Notify EOC of need to close CSX track adjacent track to ensure safety of firefighters due to excessive smoke or fire activity.	
											6. Post lookout for Snags, Runs, and Spot Fires.								23. Recongnize, Communicate & Avoid Hazmat situations.
											7. FBA/Metereoroligist to develop weather watch system.								24. Line Supervisors will provide clear, concise briefings.
											.8 Ensure Fireline is Anchored.								25. Review Structural "Watch Out" situations.
											9. All Firefighters must review current weather, predicted weather & fire behavior forecast.								26. Ensure Traffic Planning is safe and enforced. Heed Defensive Driving techniques noted in Safety Messages.
											10. Keep Firefighters informed of any changes in predicted weather, consider at least a two day weather pattern when planning burnout operations.								27. Avoid trash dumps in line construction & avoid smoke from dumps
											11. Refer to IRPG, pg. 12 on Power Line Hazards.								28. Relocate staggng area when driving conditions warrant.
											12. Observe all traffic signals and speed limits.								29. Air Attack and/or lead plane will always be in the air to coordinate aircraft.
											13. Ensure any burnout operations have been clearly communicated to ALL, prior to burning.								30. Personnel on ground will stay out of drop zones.
											14. Ensure GOOD tailgate briefings with resources unable to attend Operational Briefing (Include Ops, Logs, Fin & Plans info.).								31. Use spotter when backing vehicle(s).
											15. Scout ahead of tractor operations to avoid making contact with power poles and guide wires when tying into roads. Power companies are working in some DIVS, avoid all down lines as they may become charged.								32. Use bandanna to filter smoke in heavy smoke areas.
																			33. ALL vehicles and equipment must have lights on when running. Plastic colverts under some roads have burned and are collapsing under heavy loads, DIVS will coordinate which roads transport and tractors will use. GSP (912) 287-6500 : EMA (912) 287-4499.

# DEMOBILIZATION PROCEDURES

## **A. HOW WILL IT HAPPEN?**

1. Your supervisor declares your position excess.
2. The Section Chief agrees and notifies the Demob Unit Leader.
3. The Demob Unit Leader has a 24+ hour window to reassign you to another incident or arrange for transportation to your home unit.

## **B. WHAT CAN YOU DO TO EXPEDITE THE PROCESS?**

1. Turn in all time report and equipment use records to **Time**.
2. If you have equipment, have an inspection completed by **Ground Support**.
3. Turn in any non-essential items you have checked out to **Supply** or **Communications**.
4. Complete and turn in Unit Logs on a daily basis to **Documentation** and get a Performance Evaluation from your supervisor (you keep original and a copy goes to the files)
5. If there is any change in your status, notify **Demob** immediately.
6. Check the Demob Board on a regular basis. Be available to move within a 1 to 2 hour notice.

## Human Resource Message

“Live life to the fullest...”

Imagine yourself to be the type of person you want to be, and then be it! You may have to let go of some bad habits and develop some more positive ones, but don't give up! Because it is only in trying and persisting that dreams come true. Expect changes to occur and realize that the power to make those changes comes from within you. Your thoughts and actions, the way you spend your time, and your choices and decisions determine who you are and who you will become. Live life to the fullest!

Sherri Cummings

Human Resource Specialist (T)
