□ SAFETY MESSAGE

Safety Officer: **John Barnes**

Incident:

Date:

Time:

Sweat Farm Road

June 25, 2007

Day

Major Hazards and Risks:

◦ **Driving**

◦ **Communication**

◦ **Hydration**

◦ **Equipment**

Driving – Monday traffic is heavy. Logging activity is back on. Please be aware of situation around you when driving. Beware the inattentive driver! Look ahead, behind, and to the side – SITUATIONAL AWARENESS!

Communication – Our ETR operations are intermixed with Big Turnaround's suppression forces. We need to make contact with their leaders on the ground – preferably face to face with DIVS/TFLDs. Find out their objectives/locations and provide ours. Make sure you monitor Big Turnarounds command freqs.

Hydration – Temperatures are expected to be high again. Be sure to drink plenty of WATER before, during and after shift.

Equipment - Keep your distance from heavy equipment, make sure operator knows your location. Don't approach moving equipment until you are sure operator is aware of your presence and he has stopped operations. Watch for swinging log ends and domino effect of moving trees, and snags! Also watch for "critters" that may be escaping from disrupted debris piles.

IRPG Note for Aviation:

Aviation Watch Out Situations

- Is this flight necessary?
- Who is in charge?
- Are all hazards identified and have you made them known?
- Should you stop the operation or flight due to change in conditions?
 - Communications - Weather
 - Confusion - Turbulence
 - Conflicting Priorities - Personnel
- Is there a better way to do it?
- Are you driven by an overwhelming sense of urgency?
- Can you justify your actions?
- Are there other aircraft in the area?
- Do you have an escape route?
- Are there any rules being broken?
- Are communications getting tense?
- Are you deviating from the assigned operation or flight?
