Letter from Incident Commander:

To: All Honey Prairie Incident Personnel

As a Type 3 Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated.

Guidelines on in-appropriate behavior both “on Duty” and “off Duty” while assigned are addressed within each agencies policies. Our Team expects all incident personnel to follow established government policies for behavior along with all Illegal drug and alcohol directives.

Our Incident Management Team endorses and supports an attitude of mutual respect for all personnel and the public we serve.

We expect a strong work ethic and an attitude of Safety at all times!

Sincerely,

/s Rick Dolan

Incident Commander
Type 3 Incident Management Team

INCIDENT OBJECTIVES	1. INCIDENT NAME Honey Prairie Complex	2. DATE PREPARED 9/24/11	3. TIME PREPARED 1700												
4. OPERATIONAL PERIOD (DATE/TIME) Sunday, September 25, 2011 0800 – 2000															
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES) <ol style="list-style-type: none"> 1. Provide for safety of incident personnel and public in all incident operations. 2. Maintain a positive working relationship with all adjacent landowners, cooperators, State and Federal partners. Inform, involve and communicate incident planning and operations with all partners. 3. Contain all fires that are within the Okefenokee National Wildlife Refuge, inside the Refuge and/or inside the swamp edge break if possible. 4. In cooperation with local land owners and communities, use full suppression strategies and tactics to minimize damage to private timberlands and structural improvements and to prevent fires outside the Refuge from entering the Refuge. 5. Assist in management and suppression of additional fires (new starts or breakouts) in the vicinity as approved by Agency Administrators and Incident Commander. 6. Protect all cultural and archeological sites and structures within the refuge. 7. Manage the fires cost-effectively consistent with the values at risk. 8. Coordinate suppression actions with assigned Refuge Resource Advisors 															
6. WEATHER FORECAST FOR OPERATIONAL PERIOD See attached forecast for area specific weather information.															
7. GENERAL SAFETY MESSAGE Drive defensively and use spotter when backing. Ensure LCES is in place and known by all personnel. Drink plenty of water and take frequent rest breaks. Ensure proper use of PPE during all operations.

Fire Weather Forecast

FORECAST NO: 141
PREDICTION FOR: Day Shift
SHIFT DATE: Sunday 9/25/11

NAME OF FIRE: Honey Prairie Complex
UNIT: Okefenokee National Wildlife Refuge

FORECAST ISSUED: 9/24/11 at 1600

SIGNED: Jon Jelsema, IMET

WEATHER DISCUSSION: A frontal boundary will remain in place along the Florida/Georgia coast through tonight. The frontal boundary will then shift offshore and further into the Atlantic on Monday as High pressure begins to build in from the west.

TODAY: Partly cloudy with a chance of showers and thunderstorms, mainly after 1400.

MAXIMUM TEMPERATURES: 90°
MINIMUM HUMIDITY: 47 to 52%
20 FT WINDS: Light and variable early, becoming Southeast 3 to 6 mph.
STABILITY/INVERSION: 5500 feet
TRANSPORT WINDS: Southeast 8 mph.
DISPERSION INDEX: 20, Poor
CHANCE OF PRECIPITATION: 30%
LIGHTNING ACTIVITY LEVEL: 3

TONIGHT: Partly Cloudy. Southeast winds 2 to 4 mph in the evening, becoming light and variable. Low temperature 69°.

MONDAY: Partly cloudy.

MAXIMUM TEMPERATURES: 91°
MINIMUM HUMIDITY: 42 to 47%
20 FT WINDS: Light and variable early, becoming Southwest 4 to 7 mph.
STABILITY/INVERSION: 6000 feet
TRANSPORT WINDS: Southwest 10 mph.
DISPERSION INDEX: 30, Fair
CHANCE OF PRECIPITATION: 10%
LIGHTNING ACTIVITY LEVEL: 1

EXTENDED FORECAST High pressure will remain the dominant weather feature through Wednesday, before a weakening cold front approaches from the northwest on Thursday.

	TUESDAY	WEDNESDAY	THURSDAY
SKY/WEATHER	Mostly Sunny	Partly Cloudy	Partly cloudy with isolated showers and thunderstorms
THUNDER/PRECIP	10 %	10 %	20%
20 FT. WINDS	West 6 to 9 mph	West 6 to 9 mph	Southwest 5 to 8 mph.
MIN/MAX	67/92	66/92	67/90
Relative Humidity	35 to 40%	35 to 40%	40 to 45%

FIRE BEHAVIOR FORECAST

Fire: Honey Prairie Complex	Unit: GA-OKR-000001	Prediction for Day Shift
Forecast #141 Issued: 09/24/2011 1600 hrs	Signed: Joe Bishop	Shift Date: Sunday 09/25/2011

GENERAL FIRE BEHAVIOR
 Fuels around the Okefenokee Wildlife Refuge are predominately Fuel Model 7 (Southern Rough). Large to moderate acreage tracts of commercial timberland are mixed in throughout the entire perimeter surrounding the refuge. Fast moving wildfires with extremely high flame lengths and rapid rates of spread occur within and around the swamp.

Indicators/Threshold for Increased Fire Activity

- Relative humidity below 45%
 - Winds above 10 mph
 - **Heavy fuel loadings**
 - **Fine dead fuel moisture 8% or less**
 - Dispersion above 70
- * Items in BOLD ITALICS are predicted to occur today*

SPECIFIC FIRE BEHAVIOR

- Interior smoldering and some flare ups are possible.
- Expect fire to continue to slowly creep through organic leaf mats, muck soils, and un-burnt shrubs. Smoldering will continue in dead woody material.

LIGHTNING ACTIVITY LEVEL 3

Fuel Type	Rates of Spread	Flame Length	Spotting Distance	Firebrand Ignition
Winds at 3-6 mph	Possible NORTH WINDS could lead to control problems			
Shrub Fuels (sh8)	2-5ch/hr	4-5 ft	UP to 1/10 MILE	40%
Southern Rough (7)	4-7 ch/hr	2-3 ft	UP to 1/10 MILE	40%
Reburn (9)	1-2 ch/hr	1-2 ft	UP to 1/10 MILE	40%
Small PL Pines (4)	9-17 ch/hr	7-10 ft	UP to 1/10 MILE	40%

One hour fine dead fuel moisture is at 8% for Sunday: Areas are drying out from recent rainfall. Smoldering in the duff and larger fuels will continue. 1,000 hour fuels remain drier than normal for this time of year. Reburn potential and any additional fire spread in un-burnt fuels will continue to increase as fuels dry out. New starts are possible from the lightning strikes.

NOTE- OTHER THAN THE RE-BURN, FIRE BEHAVIOR CALCULATIONS ARE FOR FIRES IN UNBURNED FUELS INCLUDING NEW IA STARTS.

All Divisions:

The fire continues a slow spread through the thick bays and muck soils. Roots and fallen trees are protecting heat sources allowing the fire to burn organic soils from the bottom up. Keep a heads-up for falling trees.

Air Operations: Expect possible areas of smoke.

SAFETY:

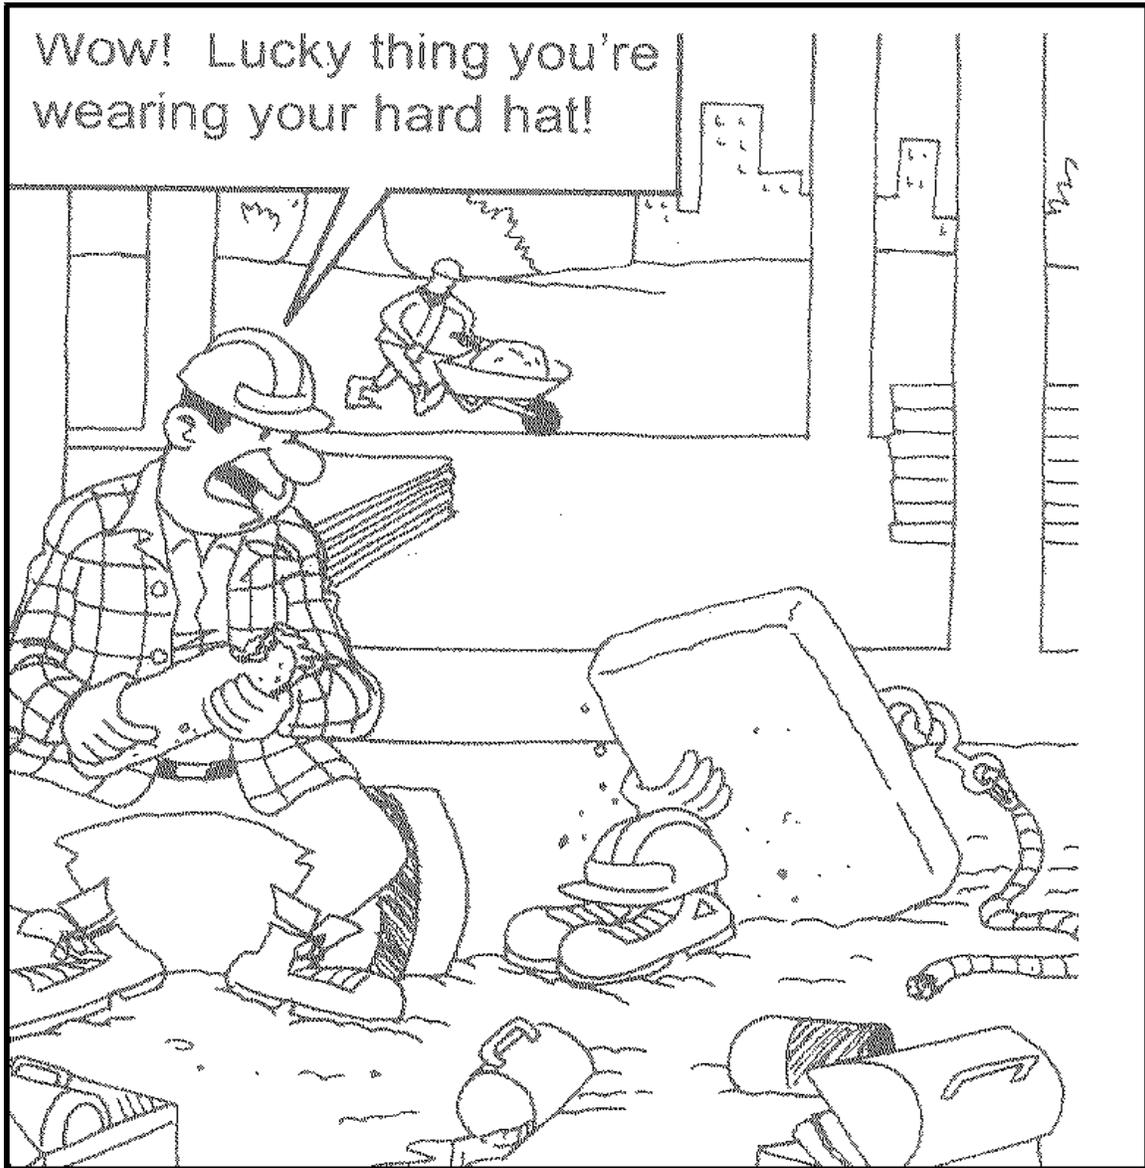

WINDS – Stay abreast of changing wx conditions throughout the entire shift.

THUNDERSTORMS - these severe winds can create extreme fire behavior, with winds gusting over 30 mph
Live Trees/SNAGS – are falling in all Divisions and will be influenced by Thunderstorm outflow winds.

FUELS: Watch for pockets of cured shrubs or blankets of needle cast. Reburn is possible in some area. 1,000 and 10,000 hour fuels as well as deep duff pockets are providing a heat source. 100 and 1000 hour fuels are still below average in moisture content. Stay focused, and put LCES in place before starting operations.

Energy Release Component (ERC) is running WELL ABOVE AVERAGE for this time of year.

SAFETY MESSAGE

EVEN HARD HEADS NEED HARD HATS
DO NOT BECOME COMPLACENT

INCIDENT ACTION PLAN SAFETY ANALYSIS										1. Incident Name Honey Prairie Fire		2. Date 9/25/2011		3. Time Day Shift

All Divisions 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28							2, 23, 28	1. Establish & maintain LCES. Report LCES checks twice daily to DIVS on line & staging.	24	12 17 19 20 22, 26, 27	1, 3, 10 14 19 24 25	16 18 21	26	16. Take adequate rest breaks and encourage to drink water NOW through briefings.		
								2. Look UP,DOWN and AROUND						17. Defensive driving will be addressed in all briefings.		
								3. Post experienced Lookouts. Make sure LCES is in place and make known.						18. All personnel must meet the 2:1 work/rest ratio. Line supervisors and Safety will monitor closely.		
								4. Use Aerial Resources as Lookout if available.						19. Notify Operation and Safety of Railroad track issues to ensure safety of firefighters.		
								5. Flag escape routes on right side of escape route facing outward. Create new escape routes as you progress and identify Safety Zones on the ground and maps.						20. Ensure Traffic Planning is safe and enforced. Heed Defensive Driving techniques noted in Safety Messages.		
								6. Identify, mark & mitigate.						21. Relocate staging area when driving conditions warrant.		
								7. FBAN/Meteorologist to monitor weather updates and advisories.						22. Use spotter when backing vehicle(s).		
								8. Ensure Fireline is Anchored to black or manmade/natural barrier.						23. For insects, use protective spray with deet on skin (Not on Nomex), permethrin can be used on nomex clothing		
								10. Keep Firefighters informed of any changes in predicted weather, consider at least a two day weather pattern when planning Strategic Firing operations.						24. Establish smoke/fog signs on roadways. Coordinate with Department of Transportation.		
								11. Refer to IRPG, pg. 12 on Power Line Hazards.						25. Follow establish communication plan, flight follow through dispatch		
								12. Observe all traffic signals and speed limits. Drive with lights on.						26. Watch-out for school buses and for children along the edge of roadway and crossing the road.		
								14. Ensure GOOD tailgate briefings with resources unable to attend Operational Briefing (Include Ops, Logs, Fin & Plans info.).						27. Treat all intersections as 4-way stops		
								15. Scout ahead of tractor operations to avoid making contact with power poles and guide wires when tying into roads. Power companies are working in some DIVS, avoid all down lines as they may become charged.						28. Bears, Gators, and some snakes are dangerous. Do not approach or feed wildlife at any time.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. **Mode** refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, base stations, mobile or portable radio.

8. Medical Emergency Procedures

Identify any EMTs and Paramedics in your crews. All medical emergencies will be reported to the Division Supervisor who will assume command and notify Line Medics.

On scene personnel will:

1. Provide medical care & stabilize patient.
2. Call 911 if possible or call phone #'s above for EMS and provide the information requested.
3. Notify Communications via radio over Command Channel
4. Communications will clear radio traffic for medical emergency.
5. Communications will confirm 911 has been notified coordinate with IC, SOF.
6. DIVS will notify the Field Ops Section Chief.

MAJOR EMERGENCIES – Secure the area and identify witness for later investigation. Keep an accurate log of events. NOTE: Do not give Patients Name over the radio!

INJURY REPORTING PROCESS:

Nature of Injury: _____

Location of Patient: _____

Transportation Requested by: Air ___ Ground ___

Pick Up Point: _____

Lat: _____ Long: _____

Patient Unit ID: _____

Is an EMT w/Patient: Yes ___ No ___

Age: ___ Sex: Male ___ Female ___

Weight (If Air Evac. is needed): _____

Hunter Encounters and Confrontations

Archery season is open. Crews are likely to encounter hunters either hunting or scouting in the area of the Swamp Edge Break.

Expect many questions about the fire operations and how long the fire will continue to burn. It's a good idea to review the Fire Information section of the plan for a good explanation of what to expect in the coming months. The majority of the hunters will be friendly but should you have a confrontation with someone:

1. Politely excuse yourself and leave the area immediately;
2. Notify your supervisor;
3. Notify the Security Manager by radio or phone:

SECM – Lindel Gregroy 404-772-5401

4. If necessary, call the Georgia DNR at 1-800-241-4113 with a description of the person, vehicle, and the nature of the confrontation. Georgia DNR will send an officer to handle the situation.

Fire Information IAP messages

1. Public and firefighter safety remains the top priority for this incident.
2. Fire managers for the refuge have coordinated suppression efforts with the Georgia Forestry Commission and the Greater Okefenokee Association of Landowners (GOAL) representing federal and state agencies, industry and private landowners. Through this Unified Command, the partners support the chosen strategy as the appropriate management response to protect adjacent valuable commercial timber, isolated homes scattered on private land, and critical wildlife habitat for threatened and endangered species.
3. Fire is a natural component of the Okefenokee ecosystem; since the refuges creation in 1937, there have been hundreds of wildfires that have burned thousands of acres here. The plants and animals on the refuge are well adapted to survive periodic wildfires.
4. Past experience has shown that conventional fire suppression tactics do not work well inside the swamp. Humans have never been successful in controlling fires within the swamp; only “mother nature” has done this. Attempting suppression within the swamp is ineffective, costly, wastes firefighting resources and needlessly endangers firefighter safety.
5. Fire on the refuge is usually fought by reinforcing firelines along the Swamps Edge Break, including areas of private land, to keep the fire contained within the swamp.
6. Okefenokee National Wildlife Refuge typically employs a contain and control strategy to manage fire; containing it within the swamp and actively suppressing it outside of the swamp in the upland forest.

Commonly asked question:

1. Why won't this fire go out? What will it take? Surface burning of available fuels is only part of the current problem. Peat beds (partially decayed vegetation normally floating in a vertical column of water) is what supports these surface fuels. Unfortunately, the current dry conditions have allowed a portion of the peat beds to dry out and the surface burn has transferred into the peat beds and is now burning subsurface. There are now two sources of heat and available fuel that must be extinguished. The current spotty, localized rain storms can have some effect on the surface burns but do not do much to control subsurface burns. It will take a big rain storm blanketing the entire swamp (remember the swamp is huge –over 650 square miles in size) dropping a minimum of 6-8 inches of rain. As the water levels in the swamp slowly rise, as a result of the rain, the peat beds will become water saturated again eliminating one source of the fire. As the surface of the swamp becomes covered by water, burning surface fuels will be extinguished as well. Burning fuels that extend above these water levels (dead and drying trees/shrubs) may continue to burn until they fall over or burn up. Fire that exists in upland habitat on islands within the swamp may also continue to burn but it will be confined to that immediate area by the swamp waters surrounding the island. This is not something that will likely occur overnight. It may take days, weeks, or even months. The refuge has experienced fire events that were not declared officially out for well over a year after the main firefighting effort had ceased.
