Letter from GFC Incident Commander:

To: All Honey Prairie Incident Personnel

As a Type 3 Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated.

Guidelines on in-appropriate behavior both “on Duty” and “off Duty” while assigned are addressed within each agencies policies. Our Team expects all incident personnel to follow established government policies for behavior along with all Illegal drug and alcohol directives.

Our Incident Management Team endorses and supports an attitude of mutual respect for all personnel and the public we serve.

We expect a strong work ethic and an attitude of Safety at all times!

Sincerely,

/s/ Steve Abbott

Incident Commander
Type 3 Incident Management Team

INCIDENT OBJECTIVES	1. INCIDENT NAME Honey Prairie Complex	2. DATE PREPARED 10/27/11	3. TIME PREPARED 1700
4. OPERATIONAL PERIOD (DATE/TIME) Friday, October 28, 2011 0700 – 1900			
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES) 1. Provide for safety of incident personnel and public in all incident operations. 2. Maintain a positive working relationship with all adjacent landowners, cooperators, State and Federal partners. Inform, involve and communicate incident planning and operations with all partners. 3. Contain all fires that are within the Okefenokee National Wildlife Refuge, inside the Refuge and/or inside the swamp edge break if possible. 4. In cooperation with local land owners and communities, use full suppression strategies and tactics to minimize damage to private timberlands and structural improvements and to prevent fires outside the Refuge from entering the Refuge. 5. Assist in management and suppression of additional fires (new starts or breakouts) in the vicinity as approved by Agency Administrators and Incident Commander. 6. Protect all cultural and archeological sites and structures within the refuge. 7. Manage the fires cost-effectively consistent with the values at risk. 8. Coordinate suppression actions with assigned Refuge Resource Advisors			
6. WEATHER FORECAST FOR OPERATIONAL PERIOD See attached forecast for area specific weather information.			
7. GENERAL SAFETY MESSAGE Drive defensively and use spotter when backing. Ensure LCES is in place and known by all personnel. Drink plenty of water and take frequent rest breaks. Ensure proper use of PPE during all operations.			
8. Fire Weather Forecast

FORECAST NO: 174
PREDICTION FOR: Day Shift
SHIFT DATE: Friday 10/28/11

NAME OF FIRE: Honey Prairie Complex
UNIT: Okefenokee National Wildlife Refuge

FORECAST ISSUED: 10/27/11 at 1600 EDT

SIGNED: *Carl Ceruiglia*, IMET

WEATHER DISCUSSION: Moisture will approach the area from the south Friday while a cold front approaches from the north. This will bring about a slight chance of a shower late in the day with some clouds and fairly light winds. The cold front will slide south across the region Friday night with a chance of a shower. Gusty north winds will develop Saturday forcing cooler and drier air over the area, which will create near critical fire weather conditions.

TODAY: Mostly cloudy. Slight chance of an afternoon shower.

MAXIMUM TEMPERATURE: 80-83
MINIMUM HUMIDITY: 40-45%
20 FT WINDS: South to southwest 5 to 8 mph
STABILITY/INVERSION: 5000 feet
TRANSPORT WINDS: Southeast 5 mph becoming northwest
DISPERSION INDEX: 27, Poor to fair
CHANCE OF PRECIPITATION: 20%
LIGHTNING ACTIVITY LEVEL: 1

TONIGHT: Mostly cloudy. Chance of showers. Low near 56. RH recovery 90-100%, excellent. West wind 2 to 4 mph.

SATURDAY: Mostly cloudy with a slight chance of showers early in the morning then mostly sunny.

MAXIMUM TEMPERATURE: 68-71
MINIMUM HUMIDITY: 37-42%
20 FT WINDS: North 13 to 18 mph gusts around 25 mph
STABILITY/INVERSION: 3000 feet
TRANSPORT WINDS: North-northeast 25 mph
DISPERSION INDEX: 58, Good
CHANCE OF PRECIPITATION: 20%
LIGHTNING ACTIVITY LEVEL: 1

EXTENDED FORECAST: High pressure will remain in control of the weather through Tuesday with mostly clear skies, slightly cooler than normal temperatures and low minimum RH values. Breezy conditions will continue Sunday then ease up Monday through Tuesday.

	SUNDAY	MONDAY	TUESDAY
SKY/WEATHER	Mostly clear	Partly cloudy	Mostly clear
THUNDER/PRECIP	0%	10%	0%
20 FT WINDS	Northeast 10 to 15 mph with gusts to 20 mph	North 5 to 10 mph with gusts 15 to 20 mph	North 4 to 9 mph
MIN/MAX	43/72	47/74	49/76
Relative Humidity	35%	35-40%	40-45%

FIRE BEHAVIOR FORECAST

Fire: Honey Prairie Complex	Unit: GA-OKR-000001	Prediction for Day Shift
Forecast #171 Issued: 10/27/2011 1600 hrs	Signed: Troy Floyd, FBAN	Shift Date: Friday 10/28/2011

GENERAL FIRE BEHAVIOR

Fuels around the Okefenokee Wildlife Refuge are predominately Fuel Model 7 (Southern Rough). Large to moderate acreage tracts of commercial timberland are mixed in throughout the entire perimeter surrounding the refuge. Fast moving wildfires with extremely high flame lengths and rapid rates of spread occur within and around the swamp.

Indicators/Threshold for Increased Fire Activity

- **Relative humidity below 45%**
 - Winds above 10 mph
 - **Heavy fuel loadings**
- **Fine dead fuel moisture 8% or less**
 - Dispersion above 70

* Items in BOLD ITALICS are predicted to occur today*

SPECIFIC FIRE BEHAVIOR

- Interior smoldering may become active burning with flare ups and re-burn possible.
- Expect fire to continue smoldering with potential open flame as heated areas are fanned by winds. Backing fire will progress in organic leaf mats, muck soils, and un-burnt shrubs in the Refuge Wilderness swamp area.

LIGHTNING ACTIVITY LEVEL 1

	Rates of Spread	Flame Length	Spotting Distance	Firebrand Ignition
Winds S-SW- 5-8 mph				
Small PL Pines (4)	16-25 ch/hr	9-12 ft	UP to 1/10 MILE	34%
Southern Rough (7)	5-8 ch/hr	2-3 ft	UP to 1/10 MILE	34%
Reburn (9)	1-2 ch/hr	1 -2 ft	UP to 1/10 MILE	34%
Shrub Fuels (sh8)	6-10 ch/hr	5-7 ft	UP to 1/10 MILE	34%

One hour fine dead fuel moisture is 7% for Thursday: Smoldering in the duff and larger fuels will continue. 1,000 hour fuels remain drier than normal for this time of year. Re-burn potential is likely due to lower humidity's in the areas that have received minimal rainfall. The uncontrolled fire edge in the Wilderness swamp will continue to burn through organic soils, leaf litter and downed woody material. If contiguous fuels are ignited, spread and spotting potential will increase due to lower humidity and higher winds

NOTE- OTHER THAN THE RE-BURN, FIRE BEHAVIOR CALCULATIONS ARE FOR FIRES IN UNBURNED FUELS INCLUDING NEW IA STARTS.

All Divisions:

The fire continues a slow spread through the thick bays and muck soils. Roots and fallen trees are protecting heat sources allowing the fire to burn organic soils from the bottom up. Keep a heads-up for falling trees. Re-burn potential is likely.

Air Operations: Clear skies and lower wind speeds will allow for effective air operations all day.

SAFETY:

Live Trees/SNAGS – are falling in all Divisions and will be influenced by Increased winds.

FUELS: Watch for pockets of cured shrubs or blankets of needle cast. Re-burn is possible in some area. 1,000 and 10,000 hour fuels as well as deep duff pockets are providing a heat source. 100 and 1000 hour fuels are still below average in moisture content. Stay focused, and put LCES in place before starting operations.

Smoke Dispersion 27 (poor) for Friday. Mixing height 5200 feet.

Safety Message

INCIDENT: Honey Prairie Fire

DATE: 10/28/2011

TIME: 0800

Major Hazards and Risks: Driving
Hazard Trees
Snakes
Hunting Season

Driving – Following defensive driving techniques. Travel with lights on, increase your following distance, and watch the other driver.

Hazard Trees – With the increased wind and the weakened roots due to the subsurface fires, a lot of the trees are falling. Use caution while working around the edge of these trees. Treat all of them as if they can fall at any time, use a spotter while working in these areas

Snakes – Snakes are on the move, avoid contact and communicate hazards to others

Situational Awareness – Maintain a higher level of Situational Awareness with the increase of external conditions (Deer Hunting, Snakes, winch operations, Hazard Trees, excessive driving, etc.) all within our theater of operations. Remember to apply LCES to all of these activities.

Preventing the Spread of Disease

Step 1

Wash your Hands! Wash thoroughly using soap and water or alcohol based hand cleaner. Never touch your hands to your mouth, eyes or face. Keep your fingernails clean and trimmed. Never use your teeth to trim fingernails.

Step 2

Stay away from sick people. If you see someone sniffing, sneezing and coughing, keep your distance. Many illnesses can be transmitted through the air, and you can pick them up just by breathing air that was coughed or sneezed into. Avoid people who are sick, as much as possible. If you're sick, do everyone a favor, and stay away until you're better.

Step 3

Contain your own germs. If you sneeze, grab a tissue and cover your nose. Completely cover your mouth when you cough. Wash your hands frequently, don't touch others and properly dispose of any tissues or products that contain your germs from coughing and sneezing.

Step 4

Give your body time to heal. If you've got a fever and are sick, stay home until you're better, and not contagious. Call in sick to work or school. If you have a bacterial infection, and your doctor prescribed antibiotics, take them as directed to kill the bacteria and reduce the risk of spreading the disease.

Safety Officers: Troy Floyd, Robert Shoemaker

INCIDENT ACTION PLAN SAFETY ANALYSIS										1. Incident Name Honey Prairie Fire		2. Date 10/28/2011		3. Time Day Shift		
LCES* Analysis of Tactical Applications Lookouts Communications Escape routes Safety zones										Other Risk Analysis						
Divisions	Indirect Fireline	Power lines / Snags	Road Conditions	Frontal Assault	Extreme Conditions	Railroad	Logging Operations	Wildlife, Insects	LCES Mitigations	Smoke	Traffic/Driving	Communications	Hunting season	Fatigue/Hydration	School Buses / Children	Other Risk Mitigations
All Divisions 1, 2, 3, 4, 5, 7, 8, 10, 14	1, 2, 3, 4, 5, 6, 7, 8, 10, 11, 15, 17	2, 6, 11, 15, 17	12, 20, 26	1, 2, 3, 4, 5, 7, 8, 14	7, 10	1	2, 3, 5, 6, 20, 21, 24, 28	2, 23	1. Establish & maintain LCES. Report LCES checks twice daily to DIVS on line & staging.	24	12, 17, 19, 20, 22, 26, 27	1, 3, 10, 14, 19, 24, 25	29	16, 18, 21	26	16. Take adequate rest breaks and encourage to drink water NOW through briefings.
									2. Look UP, DOWN and AROUND							17. Defensive driving will be addressed in all briefings.
									3. Post experienced Lookouts. Make sure LCES is in place and make known.							18. All personnel must meet the 2:1 work/rest ratio. Line supervisors and Safety will monitor closely.
									4. Use Aerial Resources as Lookout if available.							19. Notify Operation and Safety of Railroad track issues to ensure safety of firefighters.
								5. Flag escape routes on right side of escape route facing outward. Create new escape routes as you progress and identify Safety Zones on the ground and maps.							20. Ensure Traffic Planning is safe and enforced. Heed Defensive Driving techniques noted in Safety Messages.	
								6. Identify, mark & mitigate.								21. Relocate staging area when driving conditions warrant.
								7. FBAN/Meteorologist to monitor weather updates and advisories.								22. Use spotter when backing vehicle(s).
								8. Ensure Fireline is Anchored to black or manmade/natural barrier.								23. For insects, use protective spray with deet on skin (Not on Nomex), permethrin can be used on nomex clothing
								10. Keep Firefighters informed of any changes in predicted weather, consider at least a two day weather pattern when planning Strategic Firing operations.								24. Establish smoke/fog signs on roadways. Coordinate with Department of Transportation.
								11. Refer to IRPG, pg. 12 on Power Line Hazards.								25. Follow establish communication plan, flight follow through dispatch
								12. Observe all traffic signals and speed limits. Drive with lights on.								26. Watch-out for school buses and for children along the edge of roadway and crossing the road.
								14. Ensure GOOD tailgate briefings with resources unable to attend Operational Briefing (Include Ops, Logs, Fin & Plans info.).								
								15. Scout ahead of tractor operations to avoid making contact with power poles and guide wires when tying into roads. Power companies are working in some DIVS, avoid all down lines as they may become charged.								27. Treat all intersections as 4-way stops
																28. Bears, Gators, and some snakes are dangerous. Do not approach or feed wildlife at any time.
																29. Wear Hunter safety vest at all times when in the fire area. Be respectful and aware of hunters in your area.

8. Medical Emergency Procedures

Identify any EMTs and Paramedics in your crews. All medical emergencies will be reported to the Division Supervisor who will assume command and notify Line Medics.

On scene personnel will:

1. Provide medical care & stabilize patient.
2. Call 911 if possible or call phone #'s above for EMS and provide the information requested.
3. Notify Communications via radio over Command Channel
4. Communications will clear radio traffic for medical emergency.
5. Communications will confirm 911 has been notified coordinate with IC, SOF.
6. DIVS will notify the Field Ops Section Chief.

MAJOR EMERGENCIES – Secure the area and identify witness for later investigation. Keep an accurate log of events. NOTE: Do not give Patients Name over the radio!

INJURY REPORTING PROCESS:

Nature of Injury: _____

Location of Patient: _____

Transportation Requested by: Air ___ Ground ___

Pick Up Point: _____

Lat: _____ Long: _____

Patient Unit ID: _____

Is an EMT w/Patient: Yes ___ No ___

Age: ___ Sex: Male ___ Female ___

Weight (If Air Evac. is needed): _____

HELISPOTS

Fire Information IAP messages

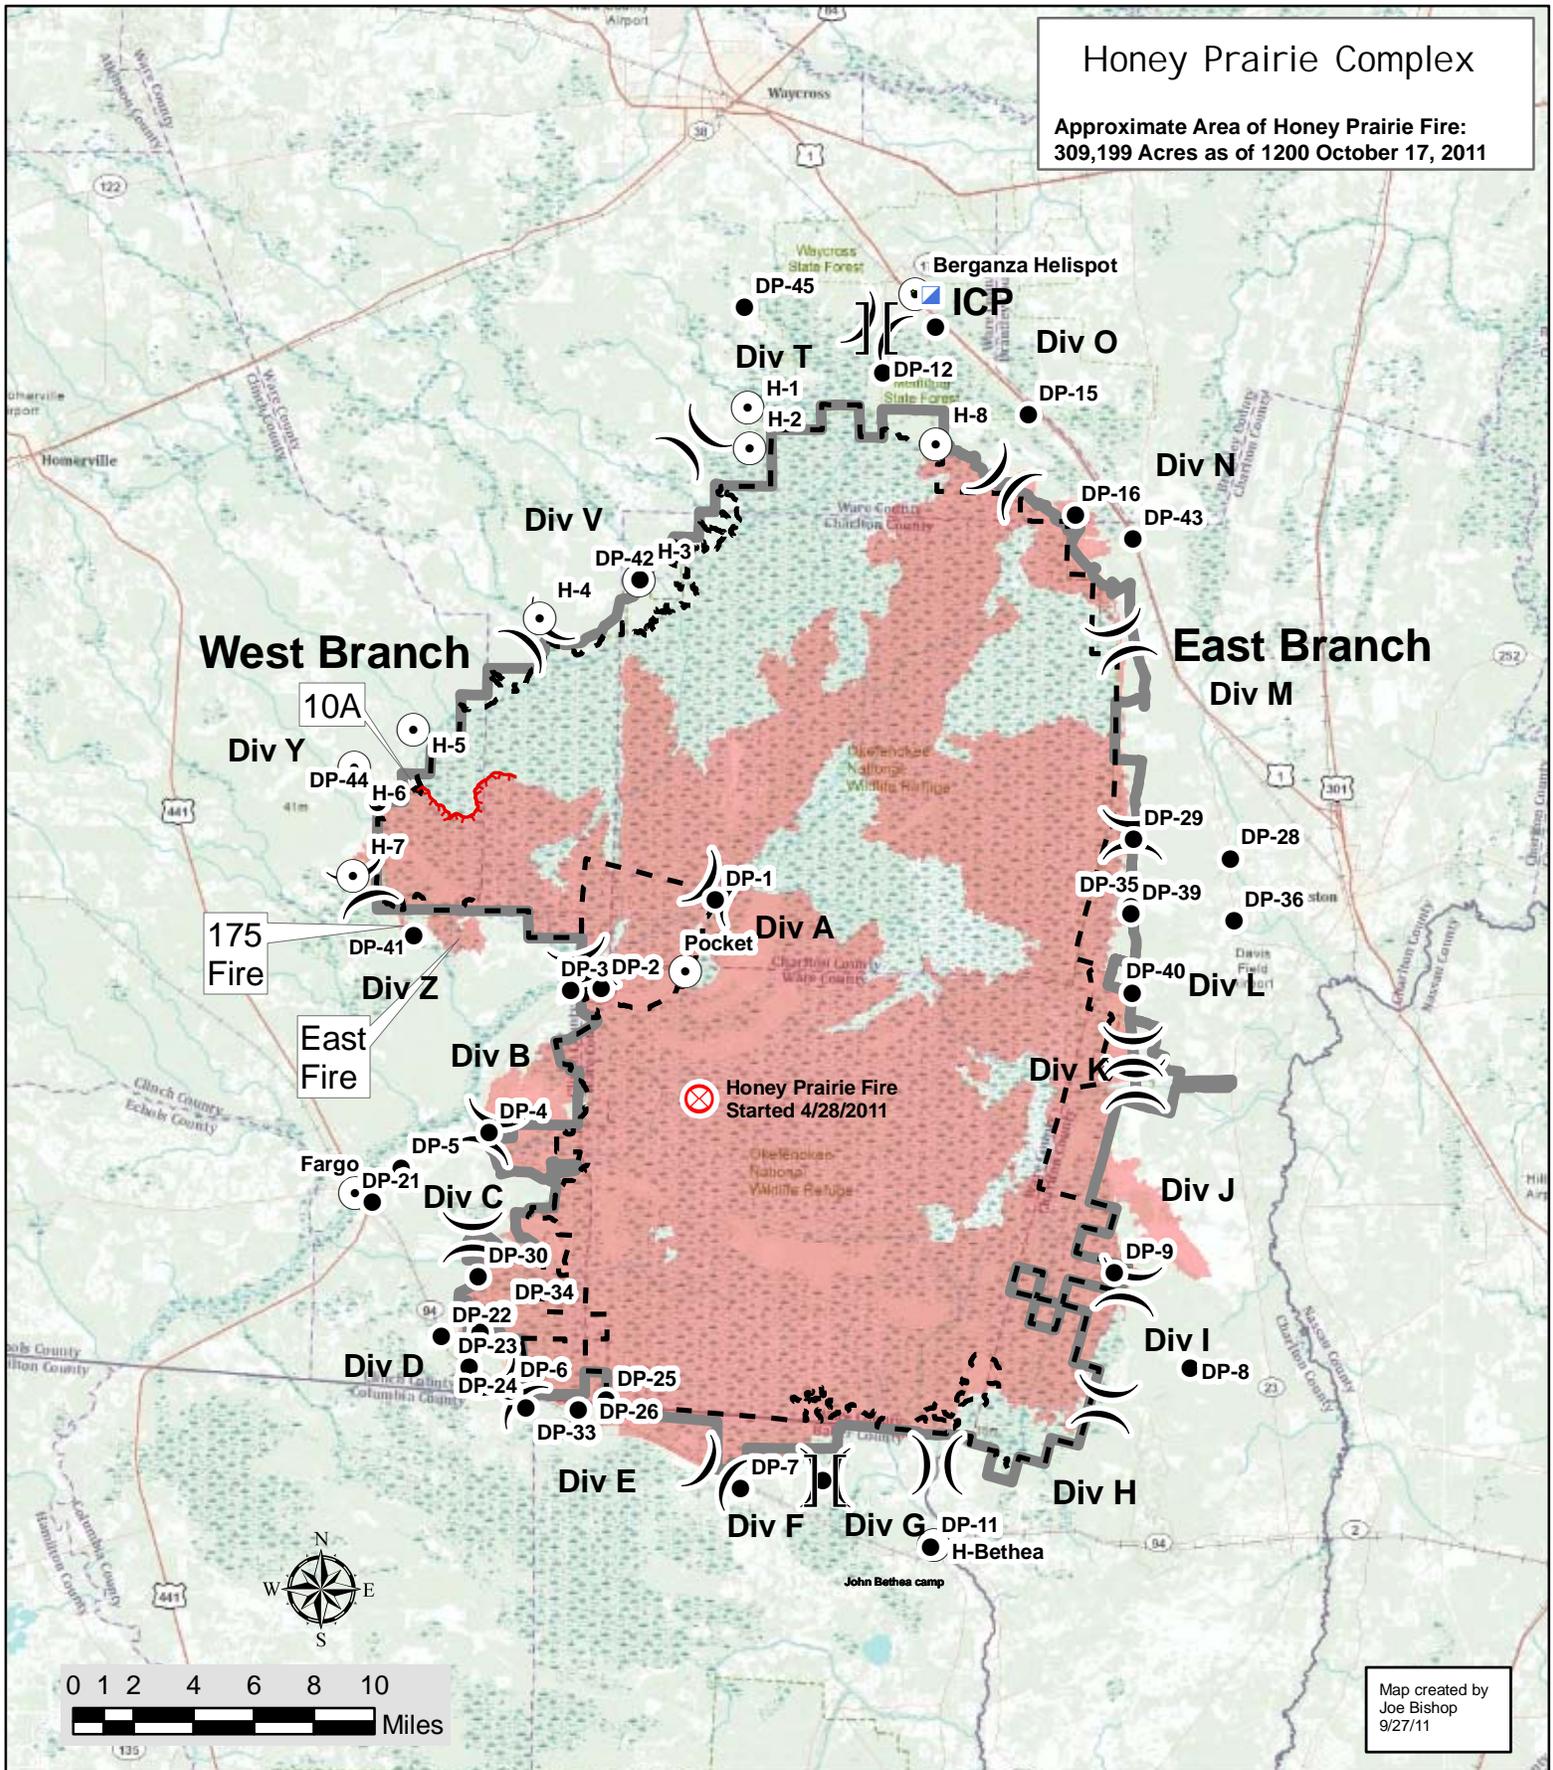

1. Public and firefighter safety remains the top priority for this incident.
2. Fire managers for the refuge have coordinated suppression efforts with the Georgia Forestry Commission and the Greater Okefenokee Association of Landowners (GOAL) representing federal and state agencies, industry and private landowners. Through this Unified Command, the partners support the chosen strategy as the appropriate management response to protect adjacent valuable commercial timber, isolated homes scattered on private land, and critical wildlife habitat for threatened and endangered species.
3. Fire is a natural component of the Okefenokee ecosystem; since the refuges creation in 1937, there have been hundreds of wildfires that have burned thousands of acres here. The plants and animals on the refuge are well adapted to survive periodic wildfires.
4. Past experience has shown that conventional fire suppression tactics do not work well inside the swamp. Humans have never been successful in controlling fires within the swamp; only “mother nature” has done this. Attempting suppression within the swamp is ineffective, costly, wastes firefighting resources and needlessly endangers firefighter safety.
5. Fire on the refuge is usually fought by reinforcing firelines along the Swamps Edge Break, including areas of private land, to keep the fire contained within the swamp.
6. Okefenokee National Wildlife Refuge typically employs a contain and control strategy to manage fire; containing it within the swamp and actively suppressing it outside of the swamp in the upland forest.

Commonly asked question:

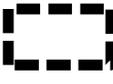

1. Why won't this fire go out? What will it take? Surface burning of available fuels is only part of the current problem. Peat beds (partially decayed vegetation normally floating in a vertical column of water) is what supports these surface fuels. Unfortunately, the current dry conditions have allowed a portion of the peat beds to dry out and the surface burn has transferred into the peat beds and is now burning subsurface. There are now two sources of heat and available fuel that must be extinguished. The current spotty, localized rain storms can have some effect on the surface burns but do not do much to control subsurface burns. It will take a big rain storm blanketing the entire swamp (remember the swamp is huge –over 650 square miles in size) dropping a minimum of 6-8 inches of rain. As the water levels in the swamp slowly rise, as a result of the rain, the peat beds will become water saturated again eliminating one source of the fire. As the surface of the swamp becomes covered by water, burning surface fuels will be extinguished as well. Burning fuels that extend above these water levels (dead and drying trees/shrubs) may continue to burn until they fall over or burn up. Fire that exists in upland habitat on islands within the swamp may also continue to burn but it will be confined to that immediate area by the swamp waters surrounding the island. This is not something that will likely occur overnight. It may take days, weeks, or even months. The refuge has experienced fire events that were not declared officially out for well over a year after the main firefighting effort had ceased.

Honey Prairie Complex

Approximate Area of Honey Prairie Fire:
309,199 Acres as of 1200 October 17, 2011
