

PAINS BAY FIRE

NC-ALR-111006
PRF3FT (1502)

Incident Action Plan Sunday

June 26, 2011

0700-1900 hrs

INCIDENT OBJECTIVES	1. INCIDENT NAME PAINS BAY FIRE	2. DATE PREPARED 6/26/2011	3. TIME PREPARED 1830									
4. OPERATIONAL PERIOD (DATE/TIME) Sunday, June 26, 2011 0700 to 1900 hrs												
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)												
<p><u>Control Objectives</u></p> <ol style="list-style-type: none"> 1. Providing for the safety, health, and welfare of firefighters and general public is our highest priority: <ul style="list-style-type: none"> • Adhere to the 10 Standard Fire Orders • Mitigate the 18 Watch-Out Situations • Implement and maintain LCES • Conduct frequent Risk Mgmt. Assessments 2. Coordinate with Dare Emergency Management Coordinator if fire threatens Stumpy Point village and evacuations appear necessary. 3. Continue to provide LE presence at designated location on US 264 to implement immediate road closure if needed for escape fire and dense smoke/fog conditions. 4. Keep fire contained west of US 264, south of US 64 and east of the Milltail Rd / Alligator Rd / Poplar Ridge Rd corridor. 5. Provide for initial attack support in areas as designated in the Delegation of Authority. 6. Continue to implement written Water Handling Plan. Begin evaluating pumping needs as Water Handling Operations moves from increasing water levels to maintaining water levels to the maximum capacity of the canal/ditch system. 7. Ensure that suppression & containment strategies on FWS property follow minimum impact suppression tactics. Any escalation in tactics should consider progress made with current tactics and the likelihood of those tactics being successful. 8. Provide for the protection of infrastructure devices, experimental tree plantations, and soil and water monitoring stations throughout USFWS property and infrastructure, structures, targets, laser city, cameras, etc within Dept. of Defense (DOD) land. 9. Coordinate the identification of potential suppression rehabilitation needs for both USFWS and DOD lands. <p><u>Management Objectives</u></p> <ol style="list-style-type: none"> 1. Keep general public & local officials in affected counties and incident stakeholders informed of fire status through situational updates and personal contacts. 2. Provide for accurate cost tracking and documentation to meet the needs of USFWS and DOD. Ensure financial management conducted per Interagency Incident Business Handbook procedures. 3. Emphasize cost containment through continual assessment of personnel and resource needs and the "right sizing" of incident staffing. 4. Work to allow military flight operation to as near normal operations, even if for limited time each day when it can be done safely, within FAA regulations and without hindering suppression operations on DOD or USFWS lands. 												
6. WEATHER FORECAST FOR OPERATIONAL PERIOD See attached weather forecast.												
7. GENERAL SAFETY MESSAGE See attached Tailgate Safety Briefing Sheet.

Fire Behavior Forecast – Pains Bay

Time and Date Forecast Issued: 1700hrs Saturday 6/25/11
 For: Sunday 6/26/2011

Forecast Number 47
 Lloyd Brown FBAN

Weather Summary: Weak cold front in eastern NC will weaken as it remains over the area through the weekend. The front will reintensify Monday and remain over the area for much of the week. High pressure will try to build back in Friday. **Today will be mostly sunny with a slight chance of showers and thunderstorms early in the afternoon, High Temp 86 degrees, Min RH 56%. Winds light and variable becoming NE 5-6 mph. Expect gusty and erratic winds near thunderstorms. Haines Index 4....Mixing Height max 6100 feet... Transport Winds W 6-13mph becmg SW 2-3mph becmg SE 6-7 mph late.**

Time	0800	1200	1400	1600
Temp	78	85	86	85
RH	77	59	56	59
Wind	N4G5	N5	NE5	NE5

Night Weather: Partly Cloudy... Min Temp 74 Max RH 87% Wind E 5-6 mph in the evening becoming light and variable.

Time	1800	2200	0200	0400
Temp	84	77	75	75
RH	62	80	87	85
Wind	NE5	E5	S3	S3

Local Thresholds – Watch Out (Fire Danger Pocket Card) Wind Speed > 15mph RH < 25% Temp >90

General Fire Behavior

Approximately ½ to 1 inch of rain fell Thursday night 6/23. The rain should diminish the fire activity for several days. Smoldering and active flame ground fire has been observed along with active fire creeping in the litter and flare-ups with torching that die back down. The fire has burned actively in green and cured fuels. Torching has been observed with some spotting. Watch for needle/leaf cast on all divisions which will provide surface fuels for smoldering or active ground fire.

Specific Fire Behavior

Alpha, Bravo, Foxtrot – Organic soils will continue to dry and some of the remaining ground fire should heat up and begin to smolder during the mid to late afternoon. Some interior reburn and torching is possible in unburned cured fuels and in any remaining green pockets of fuel.

Echo - Organic soils will continue to dry and some of the remaining ground fire should heat up and begin to smolder during the mid to late afternoon. Interior reburn and torching is possible in unburned fuels

Charlie, Mike, November - Organic soils will continue to dry and some of the remaining ground fire should heat up and begin to smolder during the mid to late afternoon. Reburn and torching is possible in unburned fuels.

Kilo, Lima, Oscar – Organic soils will continue to dry and some remaining ground fire should heat up and begin to smolder during the mid to late afternoon. Reburn and torching is possible in unburned fuels. Wind direction and speed today should be more favorable for continued containment.

Fuel Model	ROS Chains/Hr	Flame Length	Spot Distance Feet	PIG
Sh9 very high load humid climate shrub	12	9	500	28%

Dare Bomb Range Predicted NFDRS Indices for Today

1 hour fuel moisture	10 hour fuel moisture	100 hour fuel moisture	1000 fuel moisture	BI	IC	ERC	KBDI
9%	11%	16%	16%	32	13	35	582

Controllability- Indirect attack should be used if fires become established. Aircraft should always be utilized in the containment effort.

SAFETY MESSAGE

UNIFIED COMMAND

DATE: 6/26/11

HYDRATION- start your fluid intake in the morning and continue throughout the day and evening hours, don't let yourself become thirsty. 4:1 water to sports drinks. Take breaks, stay cool, don't over heat and watch out for your fire fighting family.

SIGNS OF COMPLACENCY- less alert, day dreaming, horse playing, miss the details, briefings are poorly attended, take short cuts: no PPE, neglect personal hygiene, tunnel vision

AVOIDING COMPLACENCY-maintain professional conduct, stay focused on hazards, review the objectives, ask what if, gather and update information

MITIGATION SUGGESTIONS- be on time and lead by example, brief with the safety officer, read the IAP, review the 10s and 18s, review the accident plan as well as the medical plan

Together
Everyone
Achieves
More

TEN STANDARD FIRE ORDERS

Fire Behavior:

1. Keep informed on fire weather conditions and forecasts.
2. Know what your fire is doing at all times.
3. Base all actions on current and expected behavior of the fire.

Fireline Safety:

4. Identify escape routes and make them known.
5. Post lookouts when there is possible danger.
6. Be alert. Keep calm. Think clearly. Act decisively.

Organizational Control:

7. Maintain prompt communications with your forces, your supervisor, and adjoining forces.
8. Give clear instructions and ensure they are understood.
9. Maintain control of your forces at all times.

If 1-9 are considered, then:

10. Fight fire aggressively, having provided for safety first.

Common Denominators of Fire Behavior on Tragedy Fires

1. On relatively small fires or deceptively quiet areas of large fires.
2. In relatively light fuels, such as grass, herbs, and light grass.
3. With unexpected shifts in wind direction or wind speed.
4. When fires respond to topographic conditions and run uphill.

SAFETY OFFICERS: Mike Kretschmar, Mike Huffman
