SOUTHEAST TEXAS FIRE COMPLEX

TEXAS
FOREST SERVICE
The Texas A&M University System

SEPTEMBER 16, 2011

0800-2030 HOURS

TX-TXS-12009

ICS Form 202

INCIDENT OBJECTIVES	1. INCIDENT NAME Southeast Texas Fire Complex	2. DATE 8/15/11	3. TIME 2200
4. OPERATIONAL PERIOD (DATE/TIME) Day Operations – September 16, 2011 – 0800 to 2030			
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)			
<p><u>Management Objectives:</u></p> <ul style="list-style-type: none"> • Provide the leadership necessary to ensure firefighter and public safety. • Build and maintain the Common Operating Picture (COP) with resources assigned to your incident, other incidents in the complex and Lone Star ICP. • Establish and maintain accountability of all personnel assigned to the Southeast Texas Fire Complex. • On the fire ground; Brief, Anchor and Flank following the NWCG guideline and principles. • Establish and maintain effective relations with communities, cooperating agencies and political entities. • Fight fire aggressively having provided for SAFETY first. 			
6. WEATHER FORECAST FOR OPERATIONAL PERIOD

Fire Weather Forecast

FORECAST NO: 11

PREDICTION FOR: TODAY/TONIGHT

SHIFT DATE: Friday, September 16, 2011

TIME/DATE ISSUED: 2000 hrs, September 15, 2011

NAME OF FIRE: SOUTHEAST TEXAS
FIRE COMPLEX

UNIT: Texas Forest Service

SIGNED: _____
Thomas A. Bird
Incident Meteorologist

WEATHER DISCUSSION for SOUTHEAST TEXAS:

*****Warm and muggy with higher RH...slight shower/storm chances*****

A pattern shift has occurred with the large scale pattern now shifted away from extreme heat and dryness under strong high pressure...to more seasonal conditions. Temperatures will remain warm but tracker closer to normal. RH will stay higher with excellent morning recoveries and elevated afternoon minimums. Skies will show a return of clouds with slight precipitation chances. Yesterday's front will wash out and have no appreciable effects on our weather today. Most of the region will remain rain/storm free but a few afternoon storms will likely form over the south and west areas of the SE TX Fire Complex as a disturbance moves over this afternoon/ evening. Increased and deeper SE winds off the gulf will bring increased low-level moisture over the southern half of the area through the weekend. There will be considerable low and mid-level clouds early, partly cloudy skies after mid-day, then developing cumulus cloud fields in the afternoons.

TODAY/TONIGHT for SOUTHEAST TEXAS:

Early cloudiness...followed by partly cloudy skies and slight storm chances. Higher moisture levels this afternoon. Cooler...but still warm and muggy with slightly stronger southeast winds.

Generally E to SE with some moderate breezes...especially along the coast and southern portions.

MAX TEMPS: 88 North to 96 South / MIN TEMPS: 66 North to 76 South.

MIN RH: 35% South/West to 45% North/East / MAX RH: 90-95% South to 85-90% North

WINDS: E to SE 5-8 mph becoming 7-9 mph gusting to 15 mph...except SE 6-12 gust 18 mph along the coast.

CHANCE OF RAIN: 30% West to 10% East

SATURDAY/SUNDAY OUTLOOK for SOUTHEAST TEXAS:

Variable sky conditions. Considerable morning clouds along the coast and south. Generally partly cloudy in the afternoons with some buildups. Slight chances for showers and thunderstorms both days. Temperatures slightly above normal. RH staying elevated with very good to excellent overnight recoveries due to persistent gulf flow.

Winds Southeast light to moderate...except stronger along the coast.

MAX TEMPS: 90 North to 97 South / MIN TEMPS: 64 North to 74 South.

MIN RH: 35% South to 45% North / MAX RH: 90% South to 65% North

WINDS: Southeast 5-10 mph with gusts around 15 mph...except stronger along the coast.

CHANCE OF RAIN: 10% Saturday...20% Sunday

RILEY ROAD FIRE - WEATHER FORECAST: Warm and muggy. Variable skies...cloudy early then partly cloudy with isolated afternoon showers and thunderstorms. Winds a bit stronger today with moderate gusts. Watch for nearby storms and anticipate gusty & erratic outflow if present.

FIRE WEATHER – IMET

Tom Bird (240) 778-5276

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #12	TYPE OF FIRE: Wildland
FIRE NAME: Southeast Texas Fire Complex	OPERATIONAL PERIOD: 09/16 0700-2400; 09/17 0001-0700 2011
DATE ISSUED: 09/15/2011	TIME ISSUED: 1700
UNT: Texas Forest Service	SIGNED: Craig Carter, FBAN (530-588-0644)

FUEL ASSUMPTIONS: The major fuel types, found in the SE Texas Complex is fuel model TU3 (moderate timber understory) or Fire Behavior Prediction System Fuel model 9. High risk fuels include pine plantations and southern rough brush with yaupon underneath a mature pine canopy. Modeled fire behavior reflects very low fuel moistures: 1 hour 7%, 10 hour 9%, 100 hour 13% for the peak burn period.

WEATHER SUMMARY

See fire weather forecast for detailed information.

Fire:	Riley	#898	#899
Max Temp Day/Night:	96/72	95/70	94/67
Min RH Day/Night:	38%/93%	37%/90%	40%/87%
Wind Dir, Speed Range Day	SE 5-7mph G-15	SE 4-6mph G-12	SE 3-5mph G-11
Night	SSE 6-9mph G-9	ESE 2-5mph	SSE 6-9mph

General: Expect EXTREME fire behavior in any canopied fuels: Juniper, Oak, Pine or Brush when winds 10 mph or greater. All fuels are dry, both dead and live. Foliar moisture in Juniper, Oak, and Pine is extremely low; expect these fires to move into the crowns with ease. With consistently high PIG's, spotting will be very problematic. Direct Line or Mop-up is very important to keep the fire from escaping the control lines. Large dead fuels will continue to burn for extended periods and will burn deep underground. Expect peak burning period with poor humidity recovery from 1300-2100 hours, much later in pine timber fuel types. Fires will burn actively all night in heavier fuels. Transition from surface fire in fine fuels to torching and running crown fire in canopied fuels is certain with winds greater than 15mph. New fire starts and spot fires will grow rapidly and be difficult to control if sustained winds are > 15 mph.

Critical fire behavior thresholds pine/hardwood mixed timber (temp >90°, RH < 35%, winds > 10 mph).

Flame Length: Timber litter – 2'- 5'; Grass – 2' – 7',
Rate of Spread: Timber litter – 2-18 feet/min; Grass – 20-200 feet/min
Spotting Distance: =0.25 - 0.3 mi.

Fire Suppression Interpretations	
<u>Flame Length</u>	<u>Interpretation</u>
0-4'	Direct attack hand line should hold fire.
4-8'	Fire too intense for direct attack on head with hand tools. Equipment can be

Fire:	Riley	#898	#899	Forecast:BI	50 +12
Fine Fuel Moisture Day/Shaded-Night:	9%/17%	9%/17%	7%-11%	IC	18 + 1
Probability of Ignition Day/Shaded/Night:	40%/10%	40%/10%	50%/20%	ERC	57 + 8

SPECIFIC:

Riley Fire: Leaf fall and needle cast is beginning to build on the forest floor. Watch for reburn potential around any remaining smokes. Areas still showing heat on the infrared image are in the NE corner of Div Y, the slop in Div C, and the near the dozer line in Div D just north of Ayala Road. Potential for spotting will be to the west and south.

Extinguishing all smokes near control lines is essential to reduce the potential for spot fires or escapes on these fires!

898 Fire: This fire was contained to the north by a break in the fuels. Potential for spotting will be to the east and south.

899 Fire: Fuels are represented by FM 9, oak timber litter. Unburned fuels near firelines may flare up and spot across line. Potential for spotting will be to the south.

AIR OPERATIONS: Visibility may be problematic in the morning. Sunrise: 07:06 Sunset: 19:26 -1 minute.

FIRE BEHAVIOR SAFETY

Situational Awareness:

- Expect spotting distances up to 0.2 mi. Detection is very difficult in brushy or tree covered flat terrain.
- Spotting is prolific when PIG's are above 70%.
- Live fuel moistures are extremely low. In brush and timber fuels torching is almost guaranteed, crowning runs are highly likely with winds above 15 mph.
- Use direct attack when safe to do so.
- Mop up must be aggressive and thorough, large fuels and soil organics are holding fire. Many fires have re-kindled days after control.

**SAFETY
MESSAGE**

INCIDENT NAME
**Southeast Texas
Fire Complex**

Operational Period
Day

DATE/TIME
9/16/11 0800-2000

HYPERTHERMIA

*Your body absorbs more heat than it can
dissipate.*

*Watch for hot, dry skin, nausea, headaches,
dizziness.*

*If you experience these symptoms. NOTIFY your
supervisor immediately. Stop work, loosen
clothing get to a cool area such as an air
conditioned vehicle or facility.*

*Avoid “energy drinks” such as Red Bull, Monster
and Rock Star. These ARE NOT sports drinks.*

An open well was found on the 899 Incident.

*When working with dozers in timber, STAY BACK
at least one and a half tree lengths.*

**HEAT RELATED ILLNESS IS PREVENTABLE
DRINK WATER OR GATORADE/WATER IN A 70/30 mix**

Prepared By:	Approved By:
--------------	--------------

PIPELINE AWARENESS

There are four identified highly flammable product pipelines located in the fire area. They are identified on the Incident Map. Please follow these general awareness principles were developed by CIIMT 4 Safety Officer in consultation with on site industry representatives.

- Watch for cleared Right-of Ways, 30-60 feet wide. Pipelines will be in the middle of the cleared Right-of-Way and may be found exposed on the surface or buried one to five feet underground.
- Pipeline location markings are approximately 1,000 feet apart and 3 to 6 feet high and can be located near roads, railroads, fences and along the actual pipeline location.
- Signs may include information such as material transported in the pipeline, name of pipeline operator, and a telephone number where the operator can be reached in the event of an emergency.
- Do not continually cross heavy machinery in the same spot across buried pipelines. Vary the location, or cross at a road junction.
- If there is a suspected breach, look for a pool of liquid, a sheen or fog in the area. There may be a hissing or roaring noise or an unusual chemical odor. If any of these indicators are found, evacuate the area immediately and contact your immediate supervisor with the location of the breach and call 911 or your local emergency response number.

Standard Firefighting Orders and 18 Watchout Situations

The original Ten Standard Firefighting Orders were developed in 1957. The task force reviewed the records of 16 tragedy fires that occurred from 1937 to 1956. The Standard Firefighting Orders were based in part on the successful "General Orders" used by the United States Armed Forces. The Standard Firefighting Orders are organized in a deliberate and sequential way to be implemented systematically and applied to all fire situations.

Shortly after the Standard Firefighting Orders were incorporated into firefighter training, the 18 Situations That Shout Watch Out were developed. These 18 situations are more specific and cautionary than the Standard Fire Orders and described situations that expand the 10 points of the Fire Orders. If firefighters follow the Standard Firefighting Orders and are alert to the 18 Watch Out Situations, much of the risk of firefighting can be reduced.

Standard Firefighting Orders

1. Keep informed on fire weather conditions and forecasts.
2. Know what your fire is doing at all times.
3. Base all actions on current and expected behavior of the fire.
4. Identify escape routes and safety zones and make them known.
5. Post lookouts when there is possible danger.
6. Be Alert. Keep Calm. Think Clearly. Act Decisively.
7. Maintain prompt communications with your forces, your supervisor, and adjoining forces.
8. Give Clear instructions and insure they are understood.
9. Maintain control of your forces at all times.
10. Fight fire aggressively, having provided for safety first.

18 Watchout Situations

1. Fire not scouted and sized up.
2. In country not seen in daylight.
3. Safety zones and escape routes not identified.
4. Unfamiliar with weather and local factors influencing fire behavior.
5. Uninformed on strategy, tactics, and hazards.
6. Instructions and assignments not clear.
7. No communication link with crew members/supervisors.
8. Constructing line without safe anchor point.
9. Building fireline downhill with fire below.
10. Attempting frontal assault on fire.
11. Unburned fuel between you and the fire.
12. Cannot see main fire, not in contact with anyone who can.
13. On a hillside where rolling material can ignite fuel below.
14. Weather is getting hotter and drier.

15. Wind increases and/or changes direction.
16. Getting frequent spot fires across line.
17. Terrain and fuels make escape to safety zones difficult.
18. Taking a nap near the fire line.

Working with TIMO/Timber Company Firefighters on the Fireline Standard Operating Guidelines

1. FIRE NOTIFICATION

The TIMO/Timber Company (TTC) will provide updated ownership shape files and contact lists to the TFS, East Texas GIS Coordinator, on a quarterly basis to ensure that all TFS dispatch offices have updated spatial and contact data. The TFS dispatchers will use the shape files to help determine when fires are on TTC property and, to the extent possible, will make immediate notification to the TTC representative.

1. RESPONSE PLANNING

Once contacted, the TTC representative and the TFS representative will determine if TTC firefighters (employees or contractors) are needed on a fire and, if needed, the type and amount of TTC firefighting equipment needed. If needed, the TTC representative will dispatch TTC firefighters to the fire.

- 1.1. TTC firefighters are paid by TTC and are not under the control of the Texas Forest Service. Because of this they are not to be “staged”. They are either used or not used.
- 1.2. The TTC representative makes the final determination on use of TTC firefighters. When planning please consider that due to land ownership changes it is likely that TTC firefighters will be limited to working certain parts of the fire.
- 1.3. The TFS representative has exclusive right to reject or curtail the use of TTC firefighter assistance on a wildfire based on safety concerns, lack of need, improper equipment configuration, or failure to properly execute suppression activities. Rejection or curtailment of TTC firefighter use on a wildfire will be communicated by the TFS representative to the onsite TTC representative.
- 1.4. As with any firefighter, TTC firefighters and representatives have the right to refuse assignment if it is unsafe or if it exceeds their qualifications or equipment capabilities.

Working with TIMO/Timber Company Firefighters on the Fireline Standard Operating Guidelines

2. DISPATCH AND RESPONSE

TFS will not directly dispatch TTC firefighters. All dispatching and fire line communications related to TTC firefighters must go through the TTC representative.

- 2.1. Once dispatched, TTC firefighters are not to be deployed to the fire line without a TTC representative on location.
- 2.2. Use of TTC firefighters should be limited to mop-up. If necessary to use for initial attack, TTC firefighters, along with the TTC representative, should work in tandem with a TFS dozer or TFS line supervisor. Initial attack operations for TTC firefighters should be limited to working heel and flanks of fire.
- 2.3. TTC firefighters are being paid by the TTC, and they are not a State of Texas resource, therefore they are not to receive “free” TXDOT fuel when available.
- 2.4. Release of TTC contractors during or following suppression activities will be the responsibility of the TTC representative, working closely with the TFS representative to ensure effective control of the fire, while also minimizing the cost of the TTC firefighting resource.

3. REQUIRED EQUIPMENT

TTC firefighters and representatives are required to have radio communications with TFS tactical frequencies, and all necessary personal protective equipment including nomex clothing, hardhat, and fire shelter. Additionally firefighting dozers are required to have lights for night operations.

4. REQUIRED TRAINING

Prior to being on the fire line, TTC firefighters and representatives must attend the TFS wildfire training course (1-day). Additionally, within the previous twelve months, TTC firefighters and representatives must have attended a 1-day wildfire refresher course. Wildfire training and refresher courses in other states can be substituted for this requirement. It is the responsibility of the TTC to ensure its firefighters meet these training requirements.
