

INCIDENT ACTION PLAN

SOUTHEAST TEXAS FIRE COMPLEX

TEXAS
FOREST SERVICE
The Texas A&M University System

SEPTEMBER 22, 2011

0800-2030 HOURS

TX-TXS-12009

ICS Form 202

INCIDENT OBJECTIVES	1. INCIDENT NAME Southeast Texas Fire Complex	2. DATE 9/21/11	3. TIME 2200
4. OPERATIONAL PERIOD (DATE/TIME) Day Operations – September 22, 2011 – 0800 to 2030			
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)			
<u>Management Objectives:</u>			
<ul style="list-style-type: none"> • Provide the LEADERSHIP necessary to ensure firefighter and public safety. • Build and maintain the COMMON OPERATING PICTURE (COP) with resources assigned to your incident, other incidents in the complex and Lone Star ICP. • Establish and maintain ACCOUNTABILITY of all personnel assigned to the Southeast Texas Fire Complex. • On the fire ground; BRIEF, ANCHOR and FLANK following the NWCG guidelines and principles. • Establish and maintain EFFECTIVE RELATIONS with communities, cooperating agencies and political entities. • Fight fire aggressively having provided for SAFETY first. • Ensure that all Incident Management actions are consistent with principles of RESPONSIBLE FISCAL management.

Fire Weather Forecast

FORECAST NO: 17

PREDICTION FOR: TODAY/TONIGHT

SHIFT DATE: Thursday, September 22, 2011

TIME/DATE ISSUED: 2000 hrs, September 21, 2011

NAME OF FIRE: SOUTHEAST TEXAS
FIRE COMPLEX

UNIT: Texas Forest Service

SIGNED: _____

Thomas A. Bird
Incident Meteorologist
(240) 778-5276

WEATHER DISCUSSION for SOUTHEAST TEXAS:

*****Continued Warm and Dry today...ahead of a Evening Frontal Passage*****

Excellent RH recoveries again this morning will keep enough moisture over southeast Texas to promote partly cloudy skies this afternoon. In addition, the advance of a cold front from the north and a seabreeze from the south are expected to produce isolated showers and thunderstorms over southeast Texas in the afternoon. Expect another warm and dry day across southeast Texas, as the area stays just ahead of the approaching cold front. This front should be just entering the Livingston and Woodville zones by late afternoon. Winds will be on the light side again today, especially across central locations. Coastal winds will turn southeast behind an afternoon seabreeze. The influence of the front will turn winds northerly over the northern 1/3 of the zones in the afternoon. The front will push through in the evening and overnight hours with some breezy wind and isolated showers and thunderstorms dropping south across the zones. Friday will be 4-8 degrees cooler with slackening winds.

TODAY/TONIGHT for SOUTHEAST TEXAS:

Mostly sunny early...then becoming partly cloudy with isolated of afternoon showers and thunderstorms...especially coastal w/ the seabreeze and far north with the front. Temperatures seasonally warm. RH dropping low again this afternoon. Winds light and variable early...then turning north over the north areas. Seabreeze turning winds southeast over the coastal plains in the afternoon.

MAX TEMPS: 93 W to 87 E / MIN TEMPS: 60 N to 70 S.

MIN RH: 40% to 45% / MAX RH: 80% to 90%.

WINDS: Light and variable early...with an east component. Turning northerly 4-8 mph in the north in the afternoon...and southeast 6-10 mph coastal areas in the afternoon.

LAL: 1 through noon...2 late afternoon

CHANCE OF SHOWERS & THUNDERSTORMS: 20% North. 10% Central. 20% Coastal areas.

FRIDAY / SATURDAY OUTLOOK for SOUTHEAST TEXAS:

Cooler on Friday with residual cloud cover and scattered light showers behind the front...clearing late day. RH higher due to the cooler temperatures. Winds slacken through the day and continue from the north. Saturday moderating weather with generally sunny skies and light winds. Conditions beginning to dry.

MAX TEMPS: FRI - 80 N to 85 S. SAT - 85 N to 90 S.

MIN TEMPS: FRI - 62 N to 67 S. SAT - 60 N to 70 S.

MIN RH: 40-50% FRI...30-40% SAT / MAX RH: 80-90%.

WINDS: Friday...north 10-15 mph early...slackening to 5-10 mph in the afternoon. Saturday...becoming light and variable most areas...turning southeast coastal.

LAL: 1

CHANCE OF SHOWERS & THUNDERSTORMS: 30% Friday...10% early Saturday.

#851 (RILEY ROAD FIRE)

#923 FIRE

WEATHER FORECAST:

Mostly sunny early...then becoming partly cloudy with a slight chance of late afternoon showers and thunderstorms...w/ the seabreeze. Temperatures seasonally warm. RH dropping low again this afternoon. Winds light and variable early...favoring east to southeast in the afternoon.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #18	TYPE OF FIRE: Wildland
FIRE NAME: Southeast Texas Fire Complex	OPERATIONAL PERIOD: 09/22 0800-2400 9/23 0001-0759 2011
DATE ISSUED: 09/21/2011	TIME ISSUED: 1700
UNIT: Texas Forest Service	SIGNED: Craig Carter, FBAN

FUEL ASSUMPTIONS: The major fuel type, found in the SE Texas Complex are fuel model TU3 (moderate timber understory) or Fire Behavior Prediction System Fuel model 9. High risk fuels include pine plantations and southern rough brush with yaupon underneath a mature pine canopy.

WEATHER SUMMARY

See Individual incident fire behavior forecasts and the fire weather forecast for detailed information.

SE Texas Complex General Forecast: Expect low to moderate fire behavior in all fuels. Fuels greater than one inch are still very dry and will consume. Relative humidity remains low and provides the environment for fire activity to increase. The fine fuels are dry enough to support moderate spread today. If they drop to 6% isolated areas may see 2-5 foot flames depending on fuels. Probability of ignition will range from 40-70%. Direct attack with hand tools should be effective on most fires. Additional support from engines and dozers will be necessary when flame lengths exceed 4 feet. This will occur when brush and ladder fuels begin to actively burn. Mop-up is very important to keep the fire from escaping the control lines. Large dead fuels will continue to burn for extended periods and will burn deep underground. Leaf litter and needle cast continues to provide the fuels necessary to support a re-burn. The effects of the recent rains are diminishing as dryer weather settles in.

Critical fire behavior thresholds pine/hardwood mixed timber (**temp >90°, RH < 30%, winds > 10 mph**).

Fine Fuel Moisture; Unshaded 5% Shaded 8%, Probability of Ignition; Unshaded 70%, Shaded 40%.

Flame Length: Timber litter and slash – 2'- 5'; Grass – 3' – 5'

Rate of Spread: Timber litter and slash – 7-9 feet/min; Grass – 70-94 feet/min

Spotting Distance: =0.1 **Forecast: BI 39 □14; IC 18 □5; ERC 39 □5** (Conroe RAWs 415109)

Fire Behavior Interpretation Reference: pages 78&79 IRPG, NFES 1077; Fine Fuel Moisture tables starting on page 82.

Specific:

#851 Riley Road Max Temp Day 95° Min RH 35% Wind Direction & Speed: SE 5 mph, Gusts 10 mph
Smoldering will continue around undetected smokes with a reburn threat where needle and leaf litter exist.

#923 Max Temp Day 95° Min RH 25% Wind Direction & Speed: NE 5 mph, Gusts 10 mph. Fuels on this fire include slash, regeneration, and mature trees. Rates of spread will be a little slower in slash, but the heat generated will prevent suppression resources from getting in close. Dozers can be very successful on this fire. Watch for spots within .1 miles. There may be undetected spots from yesterday's activity. Torching and spotting will occur in areas where ladder fuels enable the fire to reach the crowns.

Initial Attack Fires

Max Temp Day: 96° Min RH:25%, Wind Direction & Speed: NE-SE 3-10mph.

Smoldering will continue with a reburn threat where needle and leaf litter exist. Direct attack with hand crews can be successful when flame lengths are 0-4'. If they are greater than 4' request assistance from engines, dozers, and aircraft to be successful. Expect troublesome spotting a couple hundred feet from the fire. Watch for occasional spotting up to .1 miles. Fires will move to the NW or W depending upon location. Fires are expected to actively burn between 1200 and 2000.

AIR OPERATIONS: VFR conditions. Sunrise: 07:10 Sunset:19:18 (-3 minutes since yesterday)

FIRE BEHAVIOR SAFETY

ESCAPE ROUTES: In flashy fuels with gusty winds, your escape route should be one foot in the burn. One unexpected gust of wind could ruin your day..

DUST DEVILS: If you see dust devils, use caution. They indicate an unstable air mass and can bring fire across your control lines.

**SAFETY
MESSAGE**

INCIDENT NAME
**South East
Texas Complex**

Operational Period
Day

DATE/TIME
9/22/11 0800-2030

See Something, Say Something

TAKE CHARGE of assigned resources.

*MOTIVATE firefighters with a “can do safely”
attitude.*

*DEMONSTRATE INITIATIVE by taking action in
the absence of orders.*

*COMMUNICATE by giving specific instructions
and asking for feedback!*

SUPERVISE at the scene of the action.

(From “Operational Leadership page v of the IRPG)

Communicate Safety

Review Heat-Related Injuries on page 45 of the IRPG.

Review CPR on page 44 of the IRPG.

Sam Wilbanks SOF1

Approved By:

PIPELINE AWARENESS

Please follow these general awareness principles were developed by CIIMT 4 Safety Officer in consultation with on site industry representatives.

- Watch for cleared Right-of Ways, 30-60 feet wide. Pipelines will be in the middle of the cleared Right-of-Way and may be found exposed on the surface or buried one to five feet underground.
- Pipeline location markings are approximately 1,000 feet apart and 3 to 6 feet high and can be located near roads, railroads, fences and along the actual pipeline location.
- Signs may include information such as material transported in the pipeline, name of pipeline operator, and a telephone number where the operator can be reached in the event of an emergency.
- Do not continually cross heavy machinery in the same spot across buried pipelines. Vary the location, or cross at a road junction.
- If there is a suspected breach, look for a pool of liquid, a sheen or fog in the area. There may be a hissing or roaring noise or an unusual chemical odor. If any of these indicators are found, evacuate the area immediately and contact your immediate supervisor with the location of the breach and call 911 or your local emergency response number.

Working with TIMO/Timber Company Firefighters on the Fireline Standard Operating Guidelines

1. FIRE NOTIFICATION

The TIMO/Timber Company (TTC) will provide updated ownership shape files and contact lists to the TFS, East Texas GIS Coordinator, on a quarterly basis to ensure that all TFS dispatch offices have updated spatial and contact data. The TFS dispatchers will use the shape files to help determine when fires are on TTC property and, to the extent possible, will make immediate notification to the TTC representative.

1. RESPONSE PLANNING

Once contacted, the TTC representative and the TFS representative will determine if TTC firefighters (employees or contractors) are needed on a fire and, if needed, the type and amount of TTC firefighting equipment needed. If needed, the TTC representative will dispatch TTC firefighters to the fire.

1.1. TTC firefighters are paid by TTC and are not under the control of the Texas Forest Service. Because of this they are not to be “staged”. They are either used or not used.

1.2. The TTC representative makes the final determination on use of TTC firefighters. When planning please consider that due to land ownership changes it is likely that TTC firefighters will be limited to working certain parts of the fire.

1.3. The TFS representative has exclusive right to reject or curtail the use of TTC firefighter assistance on a wildfire based on safety concerns, lack of need, improper equipment configuration, or failure to properly execute suppression activities. Rejection or curtailment of TTC firefighter use on a wildfire will be communicated by the TFS representative to the onsite TTC representative.

1.4. As with any firefighter, TTC firefighters and representatives have the right to refuse assignment if it is unsafe or if it exceeds their qualifications or equipment capabilities.

Working with TIMO/Timber Company Firefighters on the Fireline Standard Operating Guidelines

2. DISPATCH AND RESPONSE

TFS will not directly dispatch TTC firefighters. All dispatching and fire line communications related to TTC firefighters must go through the TTC representative.

2.1. Once dispatched, TTC firefighters are not to be deployed to the fire line without a TTC representative on location.

2.2. Use of TTC firefighters should be limited to mop-up. If necessary to use for initial attack, TTC firefighters, along with the TTC representative, should work in tandem with a TFS dozer or TFS line supervisor. Initial attack operations for TTC firefighters should be limited to working heel and flanks of fire.

2.3. TTC firefighters are being paid by the TTC, and they are not a State of Texas resource, therefore they are not to receive “free” TXDOT fuel when available.

2.4. Release of TTC contractors during or following suppression activities will be the responsibility of the TTC representative, working closely with the TFS representative to ensure effective control of the fire, while also minimizing the cost of the TTC firefighting resource.

3. REQUIRED EQUIPMENT

TTC firefighters and representatives are required to have radio communications with TFS tactical frequencies, and all necessary personal protective equipment including nomex clothing, hardhat, and fire shelter. Additionally firefighting dozers are required to have lights for night operations.

4. REQUIRED TRAINING

Prior to being on the fire line, TTC firefighters and representatives must attend the TFS wildfire training course (1-day). Additionally, within the previous twelve months, TTC firefighters and representatives must have attended a 1-day wildfire refresher course. Wildfire training and refresher courses in other states can be substituted for this requirement. It is the responsibility of the TTC to ensure its firefighters meet these training requirements.

As you know, it can often be frustrating, and even challenging, working as part of a crew, team or incident. Please remember to focus on other's strengths and contributions rather than focusing on their weaknesses. If you have the time, take the opportunity to teach or train others that may not have the same level of knowledge, skills or abilities as you.

Incident Human Resource Specialist is: Diane Simpson

FIELD MEDICAL EVACUATION PLAN

Zone:		Incident:		Division:	
Date:				Plan Prepared By:	
Qualified First Responders or the most qualified medical provider will provide patient assessment and first aid. Evacuation of serious injuries will be implemented following the "Medical Emergency" procedures on the Medical Plan / 206. Minor injuries will be treated and may be transported by vehicle to a medical facility as necessary. Notify Lone Star Communications on patient condition and transport destination as soon as possible for support needs.
