## Fire Weather Forecast

FORECAST NO: 18

PREDICTION FOR: TODAY/TONIGHT

SHIFT DATE: Friday, September 23, 2011

TIME/DATE ISSUED: 2000 hrs, September 22, 2011

NAME OF FIRE: SOUTHEAST TEXAS  
FIRE COMPLEX

UNIT: Texas Forest Service

SIGNED: \_\_\_\_\_

Thomas A. Bird  
Incident Meteorologist  
(240) 778-5276

---

### WEATHER DISCUSSION for SOUTHEAST TEXAS:

#### **\*\*\*Post Frontal Passage – slightly cooler...northerly winds\*\***

A cold front will finish it's push off the coast early today. Any isolated coastal-area storms and lingering inland showers should dissipate through the morning hours. Slightly cooler air will spread into the zones today on light to moderate northerly flow. These off-shore winds will also bring in slightly drier air as they push some of the gulf moisture back to the south. Early cloud cover will give way to mostly sunny skies for the afternoon. For this weekend, temperatures will quickly rebound back to above normal as moisture levels drop lower due to off-shore westerly winds and building high pressure aloft.

---

### TODAY/TONIGHT for SOUTHEAST TEXAS:

Cold front pushing south off the coast early. Partly cloudy north...and cloudy south...with a slight chance of lingering morning showers...mostly south and along the coast. Clearing from north to south becoming mostly sunny. A few degrees cooler with northerly winds behind a cold front. RH dropping below 30% some areas with drier air. Fairly poor recoveries tonight.

**MAX TEMPS: 85 N to 90 S / MIN TEMPS: 58 N to 68 S.**

**MIN RH: 25% to 35% / MAX RH: 50% to 60%.**

**WINDS:** North winds 5-9 mph...some gusts to 15 mph early...slacking in the afternoon.

**LAL: 1**

**CHANCE OF SHOWERS & THUNDERSTORMS: 5% North. 10% Central. 20% Coastal areas.**

---

### SATURDAY / SUNDAY OUTLOOK for SOUTHEAST TEXAS:

Mostly sunny skies. Warmer temperatures...and lowering afternoon RH. Good RH recoveries overnight. Winds increasing a bit Sunday with moderate afternoon breezes.

**MAX TEMPS: 90 to 95.**

**MIN TEMPS: 58 N to 68 S**

**MIN RH: SAT - 20-25% SUN – 25-30% / MAX RH: 80-90%.**

**WINDS:** SAT – Variable and somewhat light 3-6 mph. SUN - South to southwest 5-10 mph G15 mph.

**LAL: 1**

**CHANCE OF SHOWERS & THUNDERSTORMS: 0%.**

---

**#851 (RILEY ROAD FIRE)****WEATHER FORECAST:**

Some lingering morning clouds...even a slight chance of an AM shower. Otherwise...clearing becoming mostly sunny in the afternoon. Temperatures near normal. Dry air moving in with light north winds...keeping RH low in the afternoon. Moderate morning winds slackening by afternoon.

<b>TIME</b>	<b>TEMPS</b>	<b>RH</b>	<b>WIND</b>
<b>0600hrs</b>	64	85%	N 8-12 mph
<b>0900hrs</b>	72	75%	N 6-10 mph
<b>1200hrs</b>	84	40%	NNW 5-9 mph
<b>1500hrs</b>	88	32%	NNW 5-8 mph
<b>1800hrs</b>	86	34%	NNW 4-7 mph
<b>2100hrs</b>	75	40%	NNW 3-6 mph
<b>0000hrs</b>	71	50%	N 4-7 mph
<b>0300hrs</b>	66	55%	NNE 4-7 mph
<b>0600hrs</b>	62	65%	NNE 5-8 mph

**Max/Min TEMP: 90/62 deg Min/Max RH: 30/65% CHANCE OF RAIN: 10%am...0%pm**

---

**#923 Fire**

Some lingering morning clouds. Otherwise...clearing becoming mostly sunny in the afternoon. Temperatures near normal. Dry air moving in with light north winds...keeping RH low in the afternoon. Moderate morning winds slackening by afternoon.

<b>TIME</b>	<b>TEMPS</b>	<b>RH</b>	<b>WIND</b>
<b>0600hrs</b>	63	85%	N 8-12 mph
<b>0900hrs</b>	70	75%	N 6-10 mph

---

**FIRE BEHAVIOR FORECAST**

<b>FORECAST NUMBER: #19</b>	<b>TYPE OF FIRE: Wildland</b>
<b>FIRE NAME: Southeast Texas Fire Complex</b>	<b>OPERATIONAL PERIOD: 09/23 0800-2400 9/24 0001-0759 2011</b>
<b>DATE ISSUED: 09/22/2011</b>	<b>TIME ISSUED: 1700</b>
<b>UNIT: Texas Forest Service</b>	<b>SIGNED: <i>Tom Leuschen</i> Tom Leuschen, FBAN</b>

**FUEL ASSUMPTIONS:** The major fuel type, found in the SE Texas Complex are fuel model TU3 (moderate timber understory) or Fire Behavior Prediction System Fuel model 9 and grass fuel model 1. High risk fuels include pine plantations and southern rough brush with yaupon underneath a mature pine canopy. There are also areas with logging slash.

**WEATHER SUMMARY**

***See Individual incident fire behavior forecasts and the fire weather forecast for detailed information.***

**SE Texas Complex General Forecast:** Expect low to moderate fire behavior in all fuels. Fuels greater than one inch are still very dry and will consume. Relative humidity remains low and provides the environment for fire activity to increase. The fine fuels will support moderate spread today. If they drop to 6% isolated areas may see 2-5 foot flames depending on fuels. Probability of ignition will range from 40-70%. Direct attack with engines and dozers will be successful when flame lengths are less than 8 feet. This will occur when brush and ladder fuels begin to actively burn. Mop-up is very important to keep the fire from escaping the control lines. Large dead fuels will continue to burn for extended periods and will burn deep underground. Leaf litter and needle cast continues to provide the fuels necessary to support a re-burn.

**Critical fire behavior thresholds** pine/hardwood mixed timber (**temp >90°, RH < 30%, winds > 10 mph**).

**Fine Fuel Moisture:** Unshaded 6% Shaded 9%, Probability of Ignition; Unshaded 60% Shaded 40%.

**Flame Length:** Timber litter and slash – 2'- 5'; Grass – 3' – 5'

**Rate of Spread:** Timber litter and slash – 7-9 feet/min; Grass – 70-94 feet/min

**Spotting Distance:** =0.1 **Forecast: BI 29↓7; IC 29 ↓0; ERC 34 ↓6** (Conroe RAWS 415109)

**Fire Behavior Interpretation** Reference: pages 78&79 **IRPG**, NFES 1077; Fine Fuel Moisture tables starting on page 82.

**Specific:**

**#851 Riley Road Max Temp** 89° Min RH 30% Wind Direction & Speed: N 6 mph, Gusts 9 mph  
Smoldering will continue around undetected smokes with a reburn threat where needle and leaf litter exist.

**#923 Max Temp** 88° Min RH 25% Wind Direction & Speed: N 6 mph, Gusts 9 mph. Fuels on this fire include slash, regeneration, and mature trees. Rates of spread will be a little slower in slash, but the heat generated will prevent suppression resources from getting in close. Dozers can be very successful on this fire. Smoldering will continue around undetected smokes with a reburn threat where needle and leaf litter exist.

**Initial Attack Fires**

**Max Temp Day:** 92° **Min RH:** 25%, **Wind Direction & Speed:** N 7-10mph, G-17mph.

Smoldering will continue with a reburn threat where needle and leaf litter exist. Direct attack with hand crews, engines, dozers, and aircraft will be successful. Expect troublesome spotting a couple hundred feet from the fire. Watch for occasional spotting up to .1 miles. Fires will move to the S and are expected to actively burn between 1200 and 2000.

**AIR OPERATIONS:** VFR conditions. Sunrise: 07:11 Sunset:19:18

**FIRE BEHAVIOR SAFETY**

*Watch for fire weakened trees. They will continue to fall without warning!*

**SAFETY  
MESSAGE**

INCIDENT NAME  
**South East  
Texas Complex**

Operational Period  
**Day**

DATE/TIME  
**9/23/11 0800-2030**

# **Keep Your Guard Up!**

*Maintaining situational awareness takes effort!*

*Continue planning to provide for safety then fight  
the fire!*

*Watch for complacency in others, and help them  
stay sharp.*

*Weather is getting hotter and drier!*

*Be methodical and meticulous in your tactics to get  
the job done safely!*

# **Head in the Game!**

***Review the Standard Firefighting Orders***

***Review LCES on page 6 of the IRPG.***

Prepared By:  
Sam Wilbanks SOF1

Approved By:

## PIPELINE AWARENESS

Please follow these general awareness principles were developed by CIIMT 4 Safety Officer in consultation with on site industry representatives.

- Watch for cleared Right-of Ways, 30-60 feet wide. Pipelines will be in the middle of the cleared Right-of-Way and may be found exposed on the surface or buried one to five feet underground.
- Pipeline location markings are approximately 1,000 feet apart and 3 to 6 feet high and can be located near roads, railroads, fences and along the actual pipeline location.
- Signs may include information such as material transported in the pipeline, name of pipeline operator, and a telephone number where the operator can be reached in the event of an emergency.
- Do not continually cross heavy machinery in the same spot across buried pipelines. Vary the location, or cross at a road junction.
- If there is a suspected breach, look for a pool of liquid, a sheen or fog in the area. There may be a hissing or roaring noise or an unusual chemical odor. If any of these indicators are found, evacuate the area immediately and contact your immediate supervisor with the location of the breach and call 911 or your local emergency response number.

5. Prepared by (Communications Unit) Sal Bonilla Jr.					Incident Location County State Latitude N Longitude W					

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. LAST CLONE:

**PLEASE RETURN  
THESE RADIOS  
TO THE  
COMMUNICATIONS  
UNIT BY TUESDAY  
MORNING 9/27/11.**

**DO NOT USE THESE  
FOR TUESDAY'S  
OPERATIONAL  
PERIOD. DO NOT  
TAKE THESE TO  
LUFKIN WITH YOU.  
NO EXCEPTIONS!!!!**

Thank you

## **Working with TIMO/Timber Company Firefighters on the Fireline Standard Operating Guidelines**

---

### **1. FIRE NOTIFICATION**

The TIMO/Timber Company (TTC) will provide updated ownership shape files and contact lists to the TFS, East Texas GIS Coordinator, on a quarterly basis to ensure that all TFS dispatch offices have updated spatial and contact data. The TFS dispatchers will use the shape files to help determine when fires are on TTC property and, to the extent possible, will make immediate notification to the TTC representative.

### **1. RESPONSE PLANNING**

Once contacted, the TTC representative and the TFS representative will determine if TTC firefighters (employees or contractors) are needed on a fire and, if needed, the type and amount of TTC firefighting equipment needed. If needed, the TTC representative will dispatch TTC firefighters to the fire.

- 1.1. TTC firefighters are paid by TTC and are not under the control of the Texas Forest Service. Because of this they are not to be “staged”. They are either used or not used.
  - 1.2. The TTC representative makes the final determination on use of TTC firefighters. When planning please consider that due to land ownership changes it is likely that TTC firefighters will be limited to working certain parts of the fire.
  - 1.3. The TFS representative has exclusive right to reject or curtail the use of TTC firefighter assistance on a wildfire based on safety concerns, lack of need, improper equipment configuration, or failure to properly execute suppression activities. Rejection or curtailment of TTC firefighter use on a wildfire will be communicated by the TFS representative to the onsite TTC representative.
  - 1.4. As with any firefighter, TTC firefighters and representatives have the right to refuse assignment if it is unsafe or if it exceeds their qualifications or equipment capabilities.
-

## **Working with TIMO/Timber Company Firefighters on the Fireline Standard Operating Guidelines**

---

### **2. DISPATCH AND RESPONSE**

TFS will not directly dispatch TTC firefighters. All dispatching and fire line communications related to TTC firefighters must go through the TTC representative.

- 2.1. Once dispatched, TTC firefighters are not to be deployed to the fire line without a TTC representative on location.
- 2.2. Use of TTC firefighters should be limited to mop-up. If necessary to use for initial attack, TTC firefighters, along with the TTC representative, should work in tandem with a TFS dozer or TFS line supervisor. Initial attack operations for TTC firefighters should be limited to working heel and flanks of fire.
- 2.3. TTC firefighters are being paid by the TTC, and they are not a State of Texas resource, therefore they are not to receive “free” TXDOT fuel when available.
- 2.4. Release of TTC contractors during or following suppression activities will be the responsibility of the TTC representative, working closely with the TFS representative to ensure effective control of the fire, while also minimizing the cost of the TTC firefighting resource.

### **3. REQUIRED EQUIPMENT**

TTC firefighters and representatives are required to have radio communications with TFS tactical frequencies, and all necessary personal protective equipment including nomex clothing, hardhat, and fire shelter. Additionally firefighting dozers are required to have lights for night operations.

### **4. REQUIRED TRAINING**

Prior to being on the fire line, TTC firefighters and representatives must attend the TFS wildfire training course (1-day). Additionally, within the previous twelve months, TTC firefighters and representatives must have attended a 1-day wildfire refresher course. Wildfire training and refresher courses in other states can be substituted for this requirement. It is the responsibility of the TTC to ensure its firefighters meet these training requirements.
