Fire Weather Forecast

FORECAST NO: 8

NAME OF FIRE: Tres Lagunas

PREDICTION FOR: Day **SHIFT**

UNIT: Pecos District Santa Fe N.F

SHIFT DATE: Thursday, June 6th

SIGNED: J. Brent Wachter

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 2130 MDT June 5th

WEATHER DISCUSSION:

The higher humidity will continue. Look for quite a bit of cloud cover especially mid/late afternoon. There is typically a rule of thumb in the Southwest that when rain and storms cool off an area the day before...the next day isn't as active. This happens during the Monsoon period quite a bit. I still think storms will be around and some of the storms will certainly be of the wetting kind. Still going with a solid chance of being impacted today. An overall drying and warming trend starts up on Friday as the dryline to the west gets more invigorated and tries to battle back the cooler...more moist air to the east. We will be on the dryline boundary once again Friday. Look for a drier storm environment with a limited wetting rain (>0.10") footprint during the afternoon. The atmosphere will be a bit more unstable on Friday. Instability will increase during the weekend with a Subtropical ridge taking hold over the area. Temperatures will be well above normal by Sunday.

WEATHER FORECAST:

...CONTINUED HIGH HUMIDITY...

WEATHER: Partly to Mostly cloudy at times. Chance of showers and thunderstorms (60%). Storm movement towards the Southeast. Believe the storms will fire up a little later today.

LAL: 3

MAX TEMPERATURES: 7500 ft: 75-76 8500 ft: 71-72 9500 ft: 65-66

MIN HUMIDITY: 7500 ft: 30-31% 8500 ft: 35-36% 9500 ft: 38-39%

20 FT WINDS:

RIDGETOP - Light ESE winds becoming SSE by 1000 4 to 7 mph. Becoming SSW 8-12 mph with gusts to 23 mph as the afternoon progresses.

SLOPE/VALLEY - Perhaps a light drainage in sheltered canyons turning more upslope after 0900. Otherwise...SE wind 5 to 9 mph during the morning becoming SSW 7 to 12 mph with occasional gusts to 20 mph during the afternoon. Strongest winds felt within Pecos and Cow canyons.

HAINES INDEX: Haines 3 low

STABILITY/INVERSION: Inversion break by 0930 (not as much smoke to lift this morning).
Max Mix Height: 9000 ft AGL Max Transport Wind: WSW 11 kt (somewhat changeable though)

OUTLOOK FOR THURSDAY NIGHT: WX: Chance of showers and thunderstorms early (30%) otherwise some partial clearing. LAL 3
Min T: 41-47 Max RH: 60-70 % Wind: SE 3 to 7 mph (generally drainage most areas)

EXTENDED FORECAST:

	Max T	Min T	Min RH	Max RH	Wind	Highlights
Fri 7th	69-80		17-27%		SSW 7-12 g 23 mph	LAL 3 (mix wet/dry 60%)
Sat 8th	73-84	44-50	11-19%	50-60%	SSW 8-13 g 24 mph	LAL 2 Slight % of dry storms
Sun 9th	77-88	45-55	8-15%	35-45%	WSW 8-13 g 24 mph	Hotter and Drier

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 6	TYPE OF FIRE: Wildfire
FIRE NAME: Tres Lagunas	OPERATIONAL PERIOD: 6/6/13 Day
DATE ISSUED: 6/5/13	TIME ISSUED: 21:30
UNIT: Santa Fe NF	SIGNED: Galen Roesler (FBAN)

WEATHER SUMMARY:

Chance of thunderstorms. Haines is Low.
See attached weather forecast for detailed weather information

FIRE BEHAVIOR

GENERAL:

Today's fire behavior potential will be diminished from previous days due to the much higher relative humidity and cooler temperatures in conjunction with lingering effects of light rain showers that occurred over parts of the fire yesterday. Remember that all fuels prior to this precipitation were critically dry so this will only provide short-term relief. Fuel moisture in large dead and down fuels is largely unchanged and those fuels will continue to consume to white ash.

Fire behavior will start out with creeping and smoldering. As the sun warms the slopes and begins to dry fuels you could expect some low to moderate intensity surface fire. Large down fuels will burn actively.

Since the amount of precipitation varied across the fire area, you should anticipate fire behavior will also vary. Locations that received little to no rain could produce low to moderate fire behavior early with solar heating and drying with the possibility for pockets of active fire behavior with alignment later in the day. Assess fuel conditions in your area and act accordingly.

Spotting will be minimal and would not occur until later in the burning period after fuels have had a chance to dry. Rollout on steep slopes will have the potential to cause spots. Watch for rollout into heavies to continue to cause spread between heavy fuels.

BEHAVE outputs based on today's predicted weather:

Mixed Conifer: Surface Forward Rate of Spread 5-20 ft/min, Flame Length 4-7 ft, Spotting Distance .6 miles

Ponderosa Pine: Surface Forward Rate of Spread 6-22 ft/min, Flame Length 2-4 ft, Spotting Distance .6 miles

SPECIFIC:

Today's Probability of Ignition will range from 50-60%.

All Div: A chance of thunderstorms is in the forecast; watch for outflow winds that could affect fire behavior.

Div B, C, and E: The fire behavior here will be less than previous days, but be aware that with the amount of residual heat in the area you could see behavior increase from what you might expect with today's conditions.

Div T, W, and U: This will be a good day to progress on line construction. Predicted weather will probably preclude a window for burnout operations.

Div A/Z and Y: Today's conditions should be very favorable for securing line and mop-up. Most fire will remain in heavy down fuels.

Structure Groups: The fire has backed nearer or into some of the structure areas. Channeling and funneling of winds will affect your localized fire behavior.

IA Group: Weather conditions are very conducive to successful IA. Lower rates of spread and flame lengths with minimal chance of spotting.

AIR OPERATIONS:

Smoke will affect air operations early. Gusty outflow winds could cause problems for air operations at times.

SAFETY:

Don't let yourself become complacent under today's conditions. **Maintain your situational awareness.**

EMTB	VOITA	1	N		COW CREEK 2000		
7. Control Operations Keep fire West of FR 92. Construct direct and indirect dozer line. Prep and Fell snags along FR 92 and along indirect dozer line.							
8. Special Instructions Ensure LCES; Test communications and utilize human repeaters and air attack if needed. Establish and communicate trigger points to all personnel. Contact OPS prior to initiating any firing operations. Notify planning OPS for resources and supply needs by 1400 for the next shift. Aerial Firefighter use and effectiveness group will be monitoring retardant drops throughout the fire. Treat powerlines as if HOT Air Resources needs coordination thru DIVS who will contact Air Attack.

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Tres Lagunas DATE: 06.06.13 Oper. Period: Day Shift

Major Hazards and Risks:

Driving-Increased traffic Hwy 63 - Snags - Steep Rocky Terrain - Heavy Equipment - Wildlife
Dehydration - Structure Protection - Base and Spike Hygiene - Terrero Mine

Fire Order of the Day – *Maintain control of your forces at all times.*

Hwy 63 Roadblock moved North to Windy Bridge and will greatly increase local resident traffic.

Bears in Alpha and Cow Camp spike No food tossed on the line. Backhaul trash at every opportunity
35 deer counted on Hwy 63 roadside from DP2 to Monastery.

Take care of yourself & crew members (blisters, colds, etc.)

See the medical unit for early treatment & care advice.

Get enough sleep. Eat balanced meal.

Prevent blisters by changing socks and keeping feet dry.

Thunderstorms likely today. Carry extra socks, raingear & cold weather gear.

Stay Alert, Keep Calm, Think Clearly, Act Decisively

Watch Out Situation of the Day

13.ON A HILLSIDE WHERE ROLLING
MATERIAL CAN IGNITE FUEL BELOW

SNAG S.O.P.

- Identify snags, hazard trees and unstable rocks (Look up, look down, look around).
- Identify kill zone and inform others – 2 ½ tree length. (Flag, describe or post lookouts to keep others out). Consider wind and weather.
- Felling of snags and hazard trees will proceed line construction and mop-up.
- Felling by QUALIFIED FALLERS ONLY.
- Secure, eliminate or avoid unstable material on slopes.
- Remember logs can/do roll, spin, slide & shift.
- Do not work below dozers or other firefighters.
- Rocks can/do roll, slide & bounce
- No class B/C felling after dark.
- Establish drop points, rest areas, sleeping and parking areas free of snags.

Remain alert to noise or movement – it could signal immediate danger. Face your danger to decide escape.

Incident Safety Officers: Daniel Rael, Gary Kemp, TC Smith, Bill Kornrumph, Alan Setzer, Fred Schoeffler, Elmer Orosco, Ray Corral (t)

New Mexico Incident Management Team

LCES Analysis of Tactical Actions - ICS 215A

Incident Name: Tres Lagunas		Date: 06.06.13 Wednesday				Operational Period: Dayshift 0600-1800						
DIVISIONS / GROUPS												
TACTICAL HAZARDS	All DIV	A/Z	B	C	E	T	U	W	Y	Str 1	Str II	LCES MITIGATION
Driving	X											Drive defensively with lights on, seatbelts fastened. Watch for wildlife on highway ROW at dusk and dawn. Keep windshield clean. Use chock blocks. Maintain LCES.
Downhill/Indirect Fireline		X	X		X	X	X					Follow downhill line standards IRPG p8. Ensure line is anchored. Maintain LCES. Ensure lookout can see entire area. Use ATGS as lookout when available.
Mid-slope/Underslung Fireline	X											Build Cup trench as needed. Post lookout that can see all areas of line construction. Monitor Wx and Fire Behavior. Maintain LCES.
Extreme Conditions (Spotting, Wind)												Know current and expected Wx and Fire Behavior. Identify trigger points of engagement and make them known. Maintain LCES.
Unburned Fuels and Reburn Potential	X											Ensure line is anchored. Know current and expected Wx and Fire Behavior. Identify areas, make them known. Maintain LCES. IMET to broadcast Wx changes.
Firing Operations												Develop burn plan for Complex burns. Give complete briefings on assignments, firing sequence and crew spacing. Maintain LCES.
Span of Control												Maintain proper supervisor ratio. Order additional resources as needed.
Heavy Equipment			X			X	X	X				Utilize equipment bosses. Maintain contact with operators. Stay clear of heavy equipment. Be aware of loose soil and rocks. Maintain LCES.
Air Operations / Multi-Aircraft	X											Maintain good communication with ATGS and pilots. Ensure all personnel are at least 500 feet from bucket or retardant drops. Maintain LCES.
Hazard trees/Snags	X											Assess, Identify, Communicate, Isolate. (IRPG pg 20). Watch for wind shifts. Maintain LCES.
Hazardous Materials						X				X	X	Utilize the Incident Response Pocket Guide page 26. Identify, mark and avoid Hazmat situations. Maintain LCES. Use HAZMAT teams.
Mopup		X				X		X	X	X	X	Utilize required PPE. Brief on Common Denominators of Fatality Fires. Use extra caution in areas with ash pits. Maintain LCES.
Transportation greater than 1 hour						X						Limit shifts to 14 hours. Maintain 2:1 work to rest ratio. Consider spike camps.
Communication	X											DO NOT engage unless effective communications exist. Identify dead spots and report to Com unit. Use human repeaters as needed. Only use assigned frequencies. Know Leaders Intent. Maintain LCES.
Weather Conditions	X											Weather observations taken by crews and given to IMET. IMET to broadcast changes in Wx conditions.
Environmental Hazards												Discuss local wildlife, livestock and vegetation hazards (ie bears, snakes, bees, cattle, cactus, poison oak) Do not harass or instigate any confrontation with animals. Identify and flag hazards. Identify location of nearest medical assistance.
Powerline Hazards		X			X					X	X	Locate and avoid high voltage powerlines. Consider all power lines as energized. Contact power company to deactivate line if needed. (IRPG pg. 22)
Structure Protection		X				X	X			X	X	Follow Structural Watch Outs IRPG pgs 10-14. Identify electric/ gas lines, propane tanks and storage sheds. Park vehicles for egress and keep roads/access clear.
Base/Spike Camp				X	X	X	X	X	X	X		Ensure daily briefing is conducted and IAP's are delivered. Maintain personal hygiene. Wash hands before each meal.
Transfer Of Command												Know who your supervisor is, establish communications and leaders intent before engaging.
Mines												Identify, Flag and Avoid areas with current or historical Mining activity. Inform supervisor and others of hazards such as open shafts or tunnels.
Thunderstorm	X					X						Review IRPG pg 19 for thunder
Operations Section Chief: J Beard, L Elmore, P.Delmerico		Date / Time prepared:				Safety Officer: D. Rael, G.Kemp (t)			Date / Time Prepared: 06.06.13			

Incident within an Incident Checklist and Initial Action (June 6, 2010)

Purpose: The purpose of this checklist is to provide guidelines to initiate an orderly action on an emergency within the responsibilities delegated to the New Mexico Incident Management Team on this incident. This checklist is designed as a tactical approach as an initial action and part of this Incident Action Plan. The Incident Commander may approve subsequent actions that address additional needs due to the nature of the emergency.

Direction from the Incident Commander:

- The nearest Operations Chief, Division Supervisor or highest qualified overhead on scene will initially be the **POINT OF CONTACT** for the emergency.
- Radio Communication will be on that division's tactical frequency, unless otherwise designated by the Operations Chief and will take priority over other radio traffic.
- The involved Division will communicate with Communications "on Command"
- Names of injured or deceased individuals will not be given over the radio. Use of crew names or designators should be limited. Deceased individuals and their equipment are not to be moved, except to accomplish rescue work or to protect the health and safety of others.

OPERATIONS CHIEF, DIVISION SUPERVISOR, OR HIGHEST QUALIFIED OVERHEAD

- Communications will be informed of the on-scene **POINT OF CONTACT** by position/last name (i.e. Task Force Leader - Smith, Facilities Unit Leader – Jones)
- Size-up emergency: nature, number of people, medical condition, details of aircraft or vehicles involved, location, medical treatment and transportation needs, law enforcement, rescue or hazmat response needs.
- Communicates size-up to Operations Section Chief
- Coordinates line EMT & Paramedic response and communications for air-medical and/or ground transportation needs and with the Medical Unit.
- Remove all unnecessary personnel from the site.

AIR ATTACK SUPERVISOR

- Obtain Coordinates of location and Coordinate air-medical response.
- Assists designated **POINT OF CONTACT** in coordinating the emergency response.

SAFETY OFFICER

- Responds to scene after coordination with the designated Operations supervisor.
- Assesses and recommends investigative responses and critical incident stress response.
- IMT Safety Officer in coordination with the Medical Unit Leader will identify and prioritize transport options in terms of efficiency.

COMMUNICATION UNIT LEADER

- Maintains clear radio traffic and monitors communications to support response.
- Immediately Notify Medical Unit Leader and Safety Officer.
- Notify IC, Deputy IC, Operations Chief and the Plans Chief of the emergency.

MEDICAL UNIT LEADER

- Coordinate with Operations to support the response.
- Assign a MEDL to the scene. Assign other positions to support the response, as needed.
- Constantly monitor and assess the appropriate response in coordination with Operations.

IC, COMMAND & GENERAL STAFF

- Manage the emergency and direct specific responsibilities to individual positions for a continued appropriate response.
- Notify the host unit and host dispatch center of the size-up information.
- Constantly monitor and assess the appropriate response and adapt direction, as needed.
- Submit all documentation pertaining to the emergency to the Plans Chief.

Medical Emergency Procedures					
<p>In the event of a medical emergency the On-Scene Point of Contact (POC) will provide the following information to Communications</p> <ol style="list-style-type: none"> 1. Declare the nature of the emergency. <ol style="list-style-type: none"> a. Medical injury/illness? If injury/illness is it life threatening? (Medical Transport vs. Medical Emergency) <ul style="list-style-type: none"> "Medical Emergency" = Life Threatening incidents. "Medical Transport" = non-life threatening incidents. 2. If Life Threatening, request that the designated frequency be cleared for emergency traffic 3. Contact Tres Lagunas Communications on Command frequency 4. Identify the highest qualified overhead as on-Scene POC by Last name (i.e. Smith) 5. Identify nature of incident, number injured, patient assessment(s) and location (geographic and GPS coordinates) 6. Identify on-scene medical personnel by name (i.e. Jones) 7. Identify preferred method of patient transport. 8. Request any additional resources and/or equipment needed. 9. Document all information received and transmitted on the radio or phone. 10. Identify any changes in the On-Scene POC or medical personnel as they occur.

Tres Lagunas Fire

RESOURCE CONSIDERATIONS

Pecos-Las Vegas Resource Concerns:

WILDLIFE

Mexican Spotted Owl (Federally Threatened) – Occurrence of MSO protected activity center in Indian Creek and Cow Creek.

Mitigations – Please minimize large amounts of disturbance such as dozer lines in narrow canyons that remove large snags, large diameter trees and wood piles.

Fish – Rio Grande Cutthroat Trout – Occur in headwaters of Indian Creek, Macho Creek, Dalton Creek. Very distinct lineage in Pecos. Different from rest of populations in NM since isolated for so long.

Mitigations – If fire enters these areas minimize the amount of shade removed from streams. Removal of conifers is OK. Try to keep deciduous vegetation to provide shade and keep stream temperatures cool. If fire gets within a few miles of these headwaters of these streams-contact Resource Area Advisor, Esther Nelson to employ fish removals.

PLANTS

Holy Ghost Ipomopsis – Federally Threatened. This plant occurs in only four populations in the ENTIRE Pecos area. If we lost the Holy Ghost population, there is high probability the plant will go extinct. Occurs in Indian Creek, Holy Ghost Canyon and others.

Mitigations – Populations flagged in Indian creek (white and orange spotted flagging) and Holy Ghost Canyon (blue and black-striped flagging) along roadside. No ground disturbance of this plant. No dozer or digging of line through population. Light fire OK. No fire retardant drops on this plant. Very vulnerable.

WATER

Let Resource Advisor know of any activities that cause disturbance in waterways.

RANGE

Livestock present on Rosilla allotment, Bull Creek allotment, Valle Medio allotment, Beaver allotment. When conducting burnouts, need to determine locations of water and spring developments and corrals to minimize destruction of those structures.

TIMBER

Ridge between Dalton and Indian Creek has old growth, mature ponderosa pine. Would like to keep these trees intact.

Human Resource Message

June 6, 2013

ATTITUDE

The longer I live, the more I realize the impact of attitude on my life.

Attitude is more important than facts.

It is more important than the past, than education, than money, than circumstances, than failures, than successes, than what other people think or say or do.

It is more important than appearance, giftedness or skill.

It will make or break a company, a church, home, or a fire team.

We have a choice every day regarding the attitude we will embrace for that day.

The only thing we can do is play on the one string we have, and that is our attitude.

Life is 10% what happens to you, and 90% how you react to it.

And so it is with you. You are in charge of your attitude!

**KEEP A POSITIVE MENTAL ATTITUDE (PMA) AND
BE SAFE!!**

TRAINING MESSAGE

TRAINEES AND EVALUATORS:

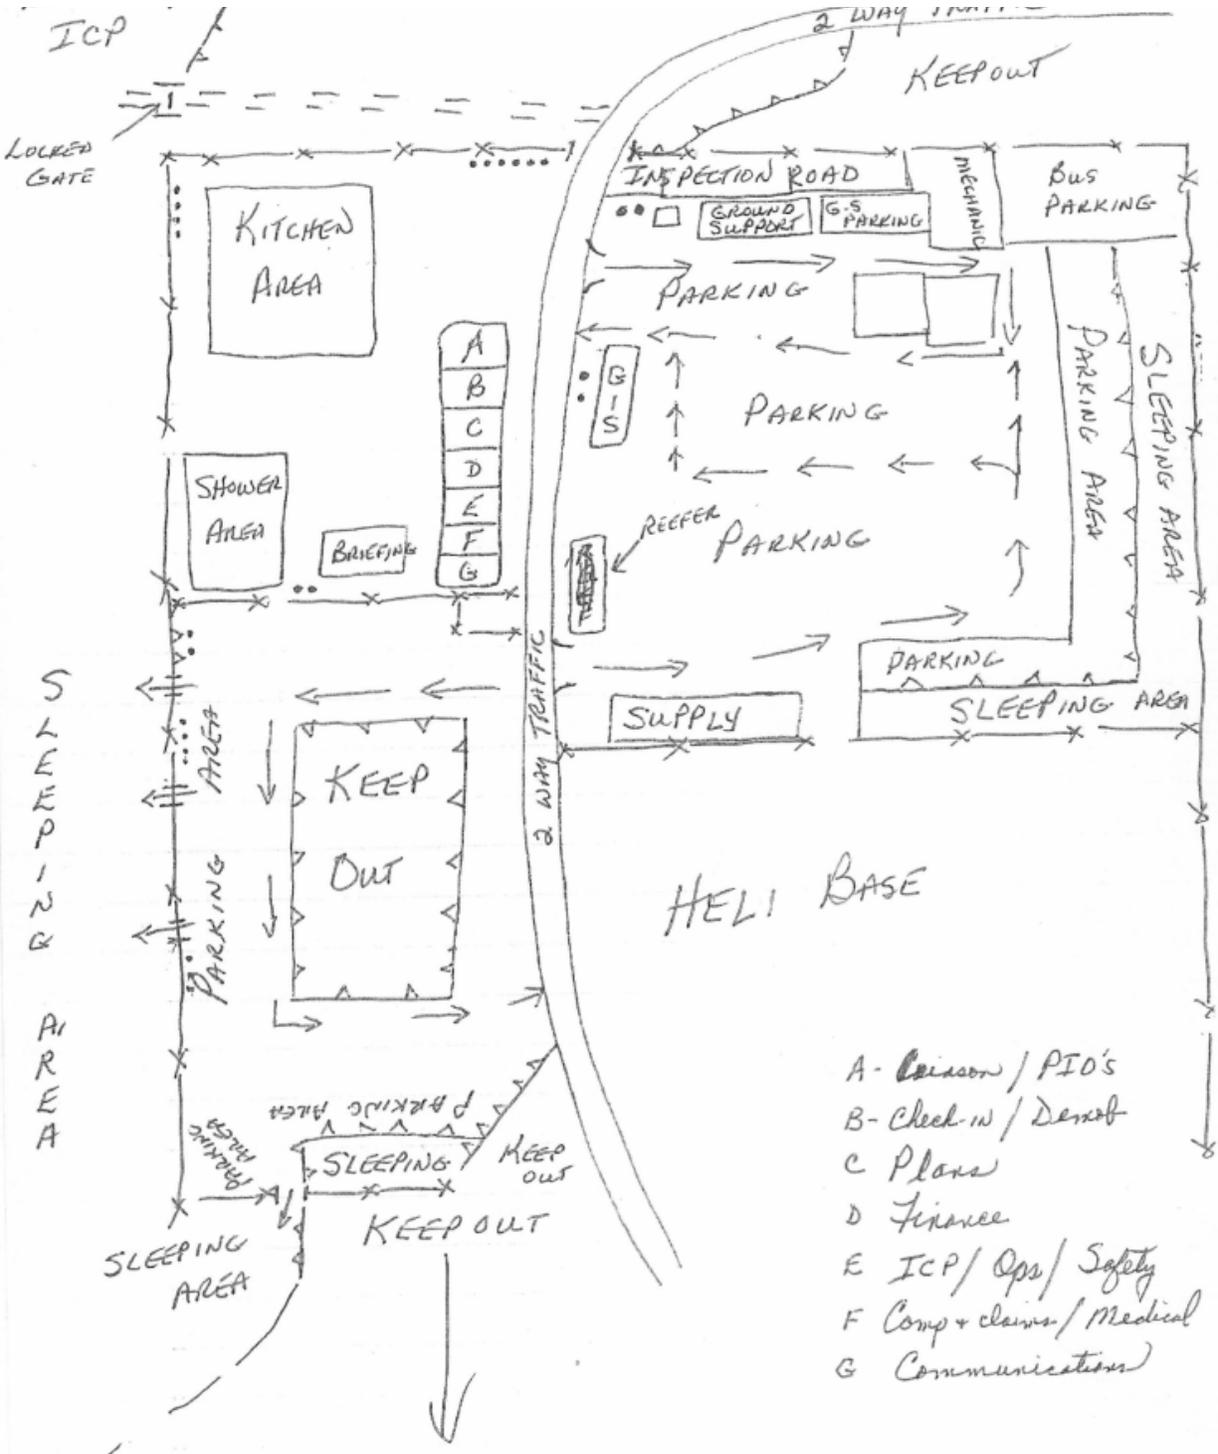

**KEEP FOCUSED ON THE INCIDENT, BUT DON'T FORGET TO COMPLETE
THE EVALUATIONS ON YOUR TASK BOOKS.**

**THANK YOU FOR TAKING THE TIME TO STOP BY THE
PLANS TENT (2ND Row) TO DOCUMENT YOUR ASSIGNMENT**

~~Thought for the Day~~

In any contest between power and patience, bet on patience—
W.B. Prescott
