

# Coconino National Forest Highway 89 Corridor Prevention Compartment

0 1.25 2.5 5 Miles

Trail Designated Dispersed Camping Permanent Campfire Prohibition Patrol Route

## Closure Plan Prevention Signage Compartment Description

- Gate
- Barricade
- Sign
- Bannerboard
- Birdcage
- Fold Down
- Multi-Use
- Posterboard

Prevention Signage:  
Shows the location  
and type of known  
prevention signs.

**Activity**  
Recreation tends to be focused in the Cinder Hills OHV Area and FR420, FR418 and Lockett Meadow

**Fire Threats**  
Primary fire threats in this compartment include any fire west of highway 89 and south of the 418rd. There is a high occurrence of abandon campfires in the Cinder Hills OHV Area, fires in the cinders tend to burn for a long time, but have few values at risk

## Human Caused Wildfire Potential

**Combination of Fire Risk, Hazard and Values**  
Risk's are defined as those uses or human activities which have the potential to result in a wildland fire ignition. After looking at the risks across the Forest, we look at historical human caused fires and abandon campfire data to validate the assessment. This assessment combines human ignited wildfires caused by campfires and vehicles (two largest categories) and abandon campfires over the last 5 years.

**Hazard's** are defined as the fuels and topography of an area. This is used to determine the large fire potential as a result of an unwanted (human) ignition. This layer was developed using the 40 fuel models from 2012 Landfire data and classifying them under max flame length according to hauling charts.

**Values** are defined as natural or developed resources that if they were damaged a physical or emotional worth could be assigned to it. This dataset was derived from the Southwestern Wildfire Risk Assessment (draft 2016) and includes wildland urban interface, municipal watersheds, wildlife habitat, ecosystem function, range values, tribal values, timber values, and infrastructure.

- Low
- Moderate
- High
- Very High
- Extreme

## TMR Road Status

- Private, limited, or restricted access road
- MVUM-open, all vehicles, yearlong
- Decommissioned or converted
- MVUM-open, hwy-legal vehicles, yearlong
- MVUM-open, all vehicles, seasonal
- MVUM-open, vehicles < 62 inches wide, seasonal
- MVUM-open, public roads or highways
- Closed unless re-opened with NEPA
- Limited FS admin use only
- MVUM-open, hwy-legal vehicles, seasonal
