

# Key to Symbols used by Nevada Natural Heritage Program

---

## U. S. Fish and Wildlife Service (Usfws) Categories for Listing under the Endangered Species Act:

LE	Listed Endangered - in danger of extinction in all or a significant portion of its range
LT	Listed Threatened - likely to be classified as Endangered in the foreseeable future if present trends continue
LENL/LTNL	Listed Endangered or Threatened in portions of its range, not listed in other portions of its range
PE	Proposed Endangered
PT	Proposed Threatened
C	Candidate
RI	Former Category 1 Candidate/proposed species, now species of concern for which there is insufficient evidence of vulnerability and threats
<	Other former status as indicated, now species of concern
<CI	Former Category 1 Candidate, now species of concern
<C2	Former Category 2 Candidate, now species of concern
_SA	Similarity of appearance species

## Bureau of Land Management (Blm) Species Classification:

S	Nevada Special Status Species - USFWS listed, proposed or candidate for listing, or protected by Nevada state law
N	Nevada Special Status Species - designated Sensitive by State Office
P	Proposed Nevada Special Status Species - designated proposed Sensitive by State Office
C	California Special Status Species (see definition S and N)

## United States Forest Service (Usfs) Species Classification:

S	Region 4 (Humboldt-Toiyabe NF) sensitive species
I	Region 5 (Inyo NF) sensitive species
W	Region 5 (Inyo NF) watch species
L	Region 5 (Lake Tahoe Basin Management Unit) sensitive species
C	Region 5 sensitive species, not yet known from Inyo NF or Lake Tahoe Basin Management Unit
E	Region 4 and/or Region 5 Endangered species
T	Region 4 and/or Region 5 Threatened species

## Nevada Natural Heritage Program Global (Grank) and State (Srank) Ranks for Threats and/or Vulnerability:

G	Global rank indicator, based on worldwide distribution at the species level
T	Global trinomial rank indicator, based on worldwide distribution at the infraspecific level
S	State rank indicator, based on distribution within Nevada at the lowest taxonomic level
1	Critically imperiled and especially vulnerable to extinction or extirpation due to extreme rarity, imminent threats, or other factors
2	Imperiled due to rarity or other demonstrable factors
3	Vulnerable to decline because rare and local throughout its range, or with very restricted range
4	Long-term concern, though now apparently secure; usually rare in parts of its range, especially at its periphery
5	Demonstrably secure, widespread, and abundant
_H	Historical; could be rediscovered
_P	Potential within Nevada
_Q	Taxonomic status uncertain
_NR	Taxon is not yet ranked
_NA	Rank is not applicable; Taxa is not a suitable target for conservation (usually due to accidental or exotic status)
_U	Unrankable
_X	Presumed extirpated or extinct
?	Assigned rank uncertain

For populations of migratory species, additional qualifiers added to rank include:

B_	Breeding status within Nevada
M_	Transient or migratory population
N_	Non-breeding status within Nevada

## Nevada State Protected (State) Species Classification:

Fauna:	
YES	Species protected under NRS 501.
Flora:	
CE	Critically endangered - species whose survival requires assistance because of overexploitation, disease or other factors or because their habitat is threatened with destruction, drastic modification or severe curtailment (NRS 527.260-.300)
CE#	Recommended for listing as critically endangered
CY	Protected as a cactus, yucca, or Christmas tree (NRS 527.060-.120)

## Endemic (End) Status:

Y	Found only in Nevada
P	Probable endemic of Nevada

Eors: The number of occurrences currently in the database.
